BASIC CANTONESE

A GRAMMAR AND WORKBOOK

ROUTLEDGE

Virginia Yip and Stephen Matthews

BASIC CANTONESE: A GRAMMAR AND WORKBOOK

Basic Cantonese introduces the essentials of Cantonese grammar in a straightforward and systematic way. Each of the 28 units deals with a grammatical topic and provides associated exercises, designed to put grammar into a communicative context. Special attention is paid to topics which differ from English and European language structures.

Features include:

- clear, accessible format
- lively examples to illustrate each grammar point
- informative keys to all exercises
- glossary of grammatical terms

Basic Cantonese is ideal for students new to the language. Together with its sister volume, *Intermediate Cantonese*, it forms a structured course of the essentials of Cantonese grammar.

Virginia Yip is Associate Professor at the Department of Modern Languages and Intercultural Studies, Chinese University of Hong Kong. **Stephen Matthews** lectures in the Department of Linguistics at the University of Hong Kong. They are the authors of *Cantonese: A Comprehensive Grammar* (1994).

INTRODUCTION

This book is for learners of Cantonese who aim to take their knowledge of the language beyond the phrase-book level. While our *Cantonese: A Comprehensive Grammar* was designed as a reference book, *Basic Cantonese* is more pedagogical in orientation. It highlights the key building blocks of sentence structure, leaving details of grammar and usage for the more advanced learner. It also provides practice for the grammar points of each unit in the form of communicatively oriented exercises.

The book is self-contained in the sense that it can be used on its own for self-paced learning. With the grammar points presented in approximate order of difficulty, it should also be useful for practice, revision and reference. It can be used in conjunction with a language course or lessons from a tutor. Either way, it should be understood that to learn a tone language such as Cantonese effectively requires some aural support – ideally from native speakers, or as a second best option from audiovisual materials such as tapes or CD-ROMs.

The Cantonese language

Cantonese is named after the city of Canton (known as Guangzhou in Mandarin), the capital of Guangdong province in southern China. Apart from the provinces of Guangdong and Guangxi, it is spoken in neighbouring Hong Kong and Macau, and also in Chinese communities overseas where it is often the predominant form of Chinese. Both in southern China and in Singapore and Malaysia, where it is widely spoken, it enjoys considerable prestige due to its association with the prosperous southern provinces as well as with the Cantonese culture of films and popular music ('Canto-pop'). It is also widely heard in cities such as Toronto and Vancouver in Canada, Sydney in Australia, New York and San Francisco in the USA. Cantonese will continue to be spoken widely around the Pacific Rim in the twenty-first century.

Cantonese is generally regarded, even by its own speakers, as a dialect of Chinese. This tends to imply, misleadingly, that it differs from standard Chinese (Mandarin or *Putonghua* 'common speech') largely in pronunciation, with some differences in vocabulary and relatively few in grammar. The grammatical differences are often underestimated, and it is dangerous to assume that the same Chinese grammar (essentially that of Mandarin) can be applied straightforwardly to Cantonese. In fact Cantonese has its own fully-fledged grammatical system, largely independent of Mandarin grammar. Indeed the Chinese 'dialects' vary in grammar,

x Introduction

as they do in other respects, as much as the various Romance languages such as French, Spanish and Italian. Moreover, the dialects of southern China, which include Cantonese and Taiwanese, are especially distinctive and diverse. Naturally, some knowledge of Mandarin can be helpful in learning Cantonese, but one cannot assume that it is simply a matter of learning a new pronunciation for the same language, or a new set of vocabulary to go with the same grammar. Hence to learn Cantonese effectively one needs to pay attention to its grammar.

Cantonese grammar

Readers should be aware that the concept of 'grammar' used here is essentially that of contemporary linguistics, which is descriptive in approach, rather than that of traditional school grammar with its prescriptive concern for what is 'good' or 'correct'. The descriptive approach aims to capture the patterns of language as they are actually used by native speakers, without imposing value judgements on particular grammatical forms. Speakers of Cantonese are often puzzled by the idea of Cantonese, as a 'dialect', having its own grammar. Perhaps the simplest way to demonstrate that it does is to consider examples of 'Cantonese' as spoken by foreign learners, such as the following:

*Ngóh fāan ūkkéi chìh dī I'll go home later *Kéuih móuh heui-jó He didn't go

These two sentences are unacceptable to a native speaker (the asterisk * marks them as ungrammatical), the first because in Cantonese adverbs of time such as **chìh dī** meaning 'later' come before the verb, not after as in English, and the second because the suffix **-jó** indicating completion is incompatible with most types of negative sentence. These explanations, simply put, are rules of grammar (the precise details are, of course, more complicated). By grammar, then, we mean the rules or principles governing the structure of sentences.

The kind of grammar to be learnt in mastering Cantonese, however, is not like that of Latin or Spanish where the forms of words – noun declensions, verb conjugations and the like – call for study. Instead, the more important questions are those of syntax: the order and patterns in which words are put together to form sentences. Sometimes Cantonese syntax resembles English:

leng sāam taai loih gwa héi ngóh sīk kéuih pretty clothes too long hang up I know him In other cases, the order of words is markedly different. In some of these features, Cantonese differs from English as well as from Mandarin – the construction with **béi** 'to give' being a well-known example:

Ngóh béi chín léih

(lit. I give money you) I give you money

Where the syntax is likely to cause difficulty in following the examples, as in this case, we give a literal word-by-word gloss reflecting the Cantonese word order as well as the natural, idiomatic English translation. As a general principle we have aimed to do this where the English translation diverges substantially from the Cantonese original, as in the case of questions and 'topicalized' sentences:

Léih sihk mātyéh a?

(lit. you eat what) What are you eating?

Tìhmbán ngóh mh sihk la

(lit. dessert I not eat) I don't eat dessert

The glosses, within parentheses preceded by *lit.*, are generally omitted once a pattern has been established.

Chinese writing and romanization

The relationship of spoken Cantonese to Chinese writing is complicated. The Chinese writing system is based on Mandarin, the spoken language of Beijing and northern China. Although Cantonese can be written as it is spoken – with some difficulty, since many Cantonese words lack established characters – written Cantonese of this kind is hardly used for serious purposes, being largely confined to popular magazines and newspaper columns. For serious writing, standard Chinese is used instead. This standard written Chinese can then be read aloud with Cantonese 'readings' (pronunciations) for each character, which are taught in schools in Hong Kong and Macau, enabling educated Cantonese speakers to be literate in standard Chinese while speaking only Cantonese.

For most western learners wishing to learn to read or write Chinese, however, it will be useful to do so in conjunction with spoken Mandarin, rather than Cantonese alone. For these reasons, we have not included characters, but use the Yale romanization system (with the minor modifications introduced in our Cantonese: A Comprehensive Grammar). This

xii Introduction

system has proved effective for learners and is used in most language courses, textbooks, dictionaries and glossaries. The main disadvantage of the Yale system is that most native speakers are unfamiliar with it, and therefore find it quite difficult to read: it should be considered merely as an aid to learning the spoken language.

Pronunciation

Beyond grammar, one of the main difficulties of Cantonese is posed by its pronunciation, and tones in particular. For this reason, the first three chapters are devoted to establishing and reinforcing the main features of Cantonese pronunciation. Learners who do not have access to native speakers or Cantonese media should be sure to acquire some tapes or other audiovisual materials in order to practise recognition and production of tones.

Exercises

The exercises in this book are intended to be communicatively useful tasks, rather than the mechanical rote practice of some past grammars. The emphasis is placed on expressing ideas and, to give them a more authentic feel, some are situated in a real-life context: ordering dishes in a restaurant, asking for directions, and the like. Because many of the exercises are open-ended, they naturally allow more than one answer: the suggested answers given in the key by no means represent the only options. Learners with access to native speakers may benefit from reading out their own answers to them and eliciting alternatives. More demanding exercises, which may require additional knowledge or reference to other units, are marked with a dagger (†).

Further practice

Few learners will be satisfied with armchair knowledge of the language: to put grammatical knowledge to practical use, exposure to Cantonese media and practice with native speakers will be needed. This book aims to provide a firm foundation on which to build proficiency. Using the minimum of terminology, it should provide just enough grammatical apparatus for the teacher and learner to devise further practice activities of their own. Readers graduating from this book will also be able to progress to *Intermediate Cantonese* which takes them into new and more challenging territory.

UNIT ONE

Consonants

In Cantonese it is useful to distinguish initial consonants, that is those which occur at the beginning of a syllable, from those found at the end of a syllable.

Initial consonants

	Unaspirated	Aspirated	Fricative	Nasal/ liquid
Bilabial Dental/alveolar Velar/glottal Labio-velar Alveolar affricates	b d g gw j	p t k kw ch	f s h	m n/l ng

The consonant sounds in the third and fourth columns – the fricatives **f**, **s**, **h** and the nasals **m**, **n**, **ng** – are pronounced much as in English, while the first two columns pose greater difficulty. Whereas English stops such as **p** and **b** are distinguished by the fact that **p** is voiceless and **b** voiced, no Cantonese stops are distinctively voiced; instead they are distinguished by aspiration – a burst of air emitted in the process of articulation. In English, this feature is also present in that initial **p** is normally aspirated and **b** not; however, this contrast is not a distinctive one. To an English speaker, Cantonese **b** as in **béi** 'give' may sound either like **p** (because of the lack of voicing) or like **b** (because of the lack of aspiration). This combination of features – voiceless and unaspirated – is not found in English, making the Cantonese consonants **b**/**d**/**g** difficult to recognize and produce at first. Remember that **b**- as in **bāt** 'pen', **d**- as in **deui** 'pair' and **g**- as in **gwai** 'expensive' are not voiced. The problem also arises

in romanized place names: *Kowloon*, for example, is generally pronounced by English speakers with an aspirated [k], but in the Cantonese form **Gáulùhng** the initial consonant is not aspirated.

In the labio-velar consonants **gw** and **kw**, the initial velar consonant is articulated more or less simultaneously with the bilabial [w] as in **gwa** 'hang' and **kwàhn** 'skirt'. There is a tendency to simplify **gw** and **kw** to [g] and [k] respectively before **o** or **u**, e.g. **gwok** 'country' sounds identical to **gok** 'feel'. Similarly:

Gwóngjāu → **Góngjāu** Canton (Guangzhou)

 $\mathbf{g}\mathbf{w}\mathbf{\acute{u}} \qquad \rightarrow \quad \mathbf{g}\mathbf{\acute{u}} \text{ guess}$

gwun → **gun** can (of beer, Coke, etc.)

kwòhng → **kòhng** crazy

The affricates j and ch are probably the most difficult of the initial consonants. They are distinguished by aspiration: ch is accompanied by a breath of air while j is not. There are two rather different pronunciations for each consonant, depending on the following vowel:

(i) Before the front vowels **i**, **yu** and **eu** or **eui** they are alveo-palatal, [t] and [t] respectively, formed with the tongue touching both the alveolar ridge and the palate:

jī	know	chī	to stick
jyū	pig	chyūn	village
jēui	chase	chēui	to blow

In these cases the sounds are fairly close to their English counterparts as in 'June' and 'choose'.

(ii) In all other cases they are alveolar, [ts] and [ts'] respectively, formed at the front of the mouth (like **d** and **t**) at the alveolar ridge just behind the teeth:

jā	to drive	chàh	tea
johng	crash	cho	wrong

These sounds are different from any in English: **chàh** should not be pronounced like 'char'. In all cases remember that the Cantonese \mathbf{j} is not voiced, just as \mathbf{d} is not, while **ch** as in **chín** is aspirated, like \mathbf{t} .

Consonants and names

The romanized forms of names used in Hong Kong and south China follow various older transcription systems which can be confusing for the learner. To pronounce them correctly, bear in mind the following correspondences:

Place name	Yale romanization	Surname	Yale romanization
Kowloon	Gáulùhng	Kong	Gōng
Kwun Tong	Gwūn Tòhng	Kwok	Gwok
Tai Po	Daaih Bou	Tang	Dahng
Tsimtsatsui	Jīmsājéui	Tse	Jeh
Shatin	Sātìhn	Shek	Sehk

Semivowels

The semivowels **w**- and **y**- also occur at the beginning of a syllable. They can be pronounced much as in English:

W -	wah	say	wúih	will
V-	viu	want	vuhng	use

In the case of initial y- followed by the vowel yu, technically we would have yyu, but this is conventionally written more simply as yu, as in yuht 'month'

Nasals

The velar nasal written as **ng-** is a single consonant which presents two problems:

- It is basically the same sound that we find in 'sing' and 'singer', but in Cantonese it can begin a syllable, as in **ngóh** 'I'. It can be produced by pronouncing 'singer' as 'si-nger'.
- Cantonese speakers frequently do not pronounce it where expected. Thus the pronoun 'I' is often heard as **óh**, 'duck' is either **ngaap** or **aap**, while **ngh** 'five' may be pronounced as **mh** instead.

A similar problem arises with the distinction between $\bf n$ and $\bf l$ which is made in dictionaries and some textbooks. Although certain words nominally

4 Unit 1

begin with **n**, notably the pronoun **néih** 'you', most speakers pronounce these with **l** instead:

néuih-yán or léuih-yán woman

nám or lám think nīdouh or līdouh here

Syllabic nasals

The nasal consonants **m** and **ng** occur as syllables in their own right, albeit only in a few words. The most frequently encountered examples are:

mh not (the main negative word: see Unit 14)
five (also pronounced mh: see above)

Ngh Ng (a common surname)

Note that these words each carry a tone of their own.

Final consonants

Only two kinds of consonants occur at the end of a syllable:

• the stops -p, -t, -k: these stops are unreleased, i.e. the airstream is closed to make them, but not reopened again, so that no air is released. Such consonants occur in casual pronunciation in English (e.g. 'yep!') as well as in German and many other languages, and are not difficult to produce. What is more difficult is to hear the difference between them, as they tend to sound alike:

```
baat (eight) vs. (yāt) baak ((one) hundred)
sāp chē (wet car) vs. sāt chē (missing car) vs. sāk chē (traffic jam)
```

• the nasals -m, -n, -ng: these are easily pronounced, although Mandarin speakers may have difficulty with -m.

```
sāam (three) vs. sāan (to close) vs. sāang (alive)
làahm (south) vs. làahn (difficult) vs. láahng (cold)
```

One complication here is that many speakers pronounce the **-ng** words with **-n** in certain syllables, so that **hohksāang** 'student', for example, is pronounced **hohksāan**.

Exercise 1.1

Pronounce the following words paying special attention to the consonants. You may need to look at Unit 2 (vowels) and Unit 3 (tone) in order to pronounce the words correctly. If possible check your pronunciation with a native speaker.

- 1 baat eight
- 2 taap tower
- 3 **ie** lend/borrow
- 4 **ngoh** hungry
- 5 **ngāam** exactly
- 6 luhk six
- 7 seun letter
- 8 **cheung** sing
- 9 **ngh** five
- 10 **yaht** day

Exercise 1.2

The following words are 'minimal pairs' differing in only one feature. Identify this difference and make sure that your pronunciation distinguishes the two words.

pin a slice 1 **bin** change 2 **baai** worship paai distribute 3 daai bring taai too (excessively) 4 dīn mad tīn skv 5 iēui chase chēui blow 6 ieun bottle chēun spring 7 gok feel kok accurate 8 gau enough kau deduct 9 **gwan** stick kwan difficult 10 **jēung** sheet (of paper) chēung window

† Exercise 1.3

The following surnames (1–6) and place names (7–12) are written in obsolete romanization systems. Pronounce them and write them in Yale romanization.

1 Cheung 7 Tai O

2 Chiu 8 Lai Chi Kok

- 6 Unit 1
- 3 Kwan

- 4 Ting 5 Shum 6 Chung

- 9 Tseung Kwan O10 Shaukeiwan
- 11 Tai Kok Tsui
- 12 Sham Shui Po

UNIT TWO

Vowels and diphthongs

The vowels written **a**, **aa**, **e**, **i**, **o**, **u**, **eu** and **yu** are all single vowels which should be pronounced with consistent quality throughout: for example, Cantonese **so** should not sound like 'so' in English, but more like 'saw'. The first six are comparable to English vowels, while the last two are not, being closer to French:

a	bāt pen	similar to the vowel in 'but'
aa	sāam three	similar to the vowel in 'father'
i	sī silk	similar to the vowel in 'see'
e	leng pretty	similar to the vowel in 'pet'
0	dō many	similar to the vowel in 'paw'
u	fu trousers	similar to the vowel in 'fool'
yu	syū book	similar to the vowel in French 'tu'
eu	seun letter	similar to the first vowel in French 'Peugeot'

Long and short a

A peculiarity of Cantonese not shared with most other varieties of Chinese is the distinction between short **a** and long **aa**. The following minimal pairs differ in the length of the vowel:

sām	heart	sāam	three
mahn	ask	maahn	slow
hàhng	permanent	hàahng	walk
kāt	cough	kāat	card

These vowels differ in sound quality as well as length: $s\bar{a}m$ sounds much like English 'sum', while $s\bar{a}am$ has an open vowel more like that of 'sample' in (southern British) English. When **a** comes at the end of a syllable as in **fa** 'flower' it is written with a single **a** but pronounced as in 'fa-ther'.

Front rounded vowels

The digraphs vu and eu represent single vowels produced at the front of the mouth with rounded lips; counterparts to these are not generally used in English, but exist in several European languages:

yu is similar to French 'u' and German 'ü'. In English something like it appears in the second syllable of 'issue'.

eu is similar to French 'eu' as in the second syllable in 'hors d'oeuvre'. English speakers may try pronouncing 'her' with rounded lips (as if pouting).

Variable vowels

The sound of a vowel can be affected by a following consonant. In particular, high vowels become more open before the velar consonants -k and -ng:

- 1 The vowel in sihk 'eat' lies between i and e, but is still distinct from sehk 'stone'. Similarly, gīng 'pass by' can be difficult to distinguish from geng 'be afraid'. In a few words usage varies between i and e, for example, sìhng or sèhng 'whole'.
- 2 The vowel in **luhk** 'green' lies between **u** and **o**, but is still distinct from lohk 'go down'. Similarly, tùhng 'with' can be difficult to distinguish from tòhng 'sugar'.
- 3 The rounded vowel eu before the velar consonants k and ng as in jeuk 'wear' and cheung 'sing' is more open than that in cheut 'go out', jeun 'bottle', seun 'letter', and so on.

Diphthongs

These combinations of two vowel sounds are produced by shifting from one vowel to another over the course of one syllable:

iu	giu	call(ed)	as in English 'few'
oi	choi	vegetable	as in English 'boy'
ou	dou	arrive	as in English 'hold'
ei	sei	four	as in English 'say'
ui	guih	tired	as in English 'goo-ey '(but pronounced as
			only one syllable)
eui	seui	tax	(the front rounded vowel eu followed by the
			glide i)

Note that there are diphthongs corresponding to both short **a** and long **aa**:

ai	sāi	west	aai	sāai	to waste
	máih	rice		máaih	to buy
au	gau	enough	aau	gaau	to teach
	lauh	leak		laauh	to scold

The long diphthongs are close to those in English: **aai** is similar to that in 'sky', **aau** to that in 'how'.

Exercise 2.1

Pronounce the following minimal pairs (refer to Unit 3 for the tones, which are the same for each pair):

1	gān	follow	gāan	(classifier for house)
2	fān	separate	fāan	back, return
3	sān	new	sāan	mountain
4	gām	gold	gāam	prison
5	lám	think	láam	hug, embrace
6	gám	dare	gáam	deduct, reduce (prices)
7	làhm	to water	làahm	blue
8	gāi	chicken	gāai	street
9	láih	polite	láaih	milk
10	chāu	autumn	chāau	copy
11	ling	shiny	leng	pretty
12	pìhng	flat	pèhng	cheap
13	līk	take, pick	lēk	clever, smart
14	sihk	eat	sehk	stone
15	gīng	pass	gēng	fear
16	mohk	curtain, screen	muhk	wood
17	song	lose, die	sung	send
18	lohk	happy	luhk	green
19	dohk	measure	duhk	read
20	mohng	to stare	muhng	dream

Exercise 2.2

Pronounce the following words, paying special attention to the rounded vowels **yu** and **eu** (if possible check your pronunciation with a native speaker or against a recording):

10 Unit 2

1	syut	snow	11	yuhbeih	prepare
2	hyut	blood	12	kyutdihng	decide
3	hēung	fragrant	13	yuhtbéng	mooncake
4	kèuhng	strong	14	leuhnjeuhn	clumsy
5	yuhnyi	willing	15	màauhtéuhn	contradiction
6	chyun	to spell/an inch			
7	lyuhn	chaotic, messy			
8	jēun	bottle			
9	jyuh	to live			
10	dyún	short			

Exercise 2.3

Pronounce the following pairs of words paying special attention to the diphthongs:

A	monosyllabi	c	B disyllabic	
1	meih	not yet	meihdouh	taste
2	gei	mail	jihgéi	oneself
3	yiu	want	jiugu	take care
4	siu	smile	diu-yú	fishing
5	tiu	jump	tiu-móuh	to dance
6	múih	every, each	mùihmúi	sister
7	míuh	seconds	kèihmiuh	wonderful
8	guih	tired	hauhfui	regret
9	giu	call	gīu-ngouh	proud
10	wúih	will	hōi-wúi	have a meeting
11	dói	bag	joigin	see you (lit. see again)
12	gói	change	yīnggōi	should
13	gōu	tall	gwónggou	advertisement
14	lóuh	old	dihnlóuh	computer
15	tēui	push	teui-yāu	retire

UNIT THREE

Tone

Like other varieties of Chinese and many south-east Asian languages, Cantonese is a tonal language: the relative pitch at which a syllable is pronounced plays a role in distinguishing one word from another. While tone presents one of the biggest obstacles, both real and psychological, to a working command of Cantonese, it also gives a musical quality to the language, and some learners find musical analogies helpful.

The importance of tones

Whereas in other languages deviation in pitch might merely result in a foreign accent, in Cantonese it changes the identity of a word:

High le	evel	Low level	1	Mid	level	Low le	evel
Sān	new	sahn	kidney	_	enough	0	old, dated
Syū	book	syuh	tree	dim	to touch	dihm	OK, done
lāu	jacket	láu	ng apartment one (book)	ngó	goose	Low ringóh	_

Fortunately a word pronounced with an inaccurate tone can often be recognized from the context, although the errors are sometimes amusing.

How many tones?

To begin with a perennial question: how many tones are there? Linguists of different persuasions debate the issue, and different dialects of Cantonese vary in this respect. Although some reference books distinguish seven, nine or even ten tones, most current analyses assume six in

Hong Kong Cantonese – and for the beginner six tones are plenty. These are shown, with the vowel **a** as an example, in the following table.

	Rising	Level	Falling
High	á	ā	(à)
Mid		a	(11)
Low	áh	ah	àh

The 'high level' tone is sometimes pronounced with a noticeable fall (à) as in sìn 'first'. Some books and dictionaries attempt to distinguish high level as in sāan 'hill' from high falling as in sàan 'to close', but most speakers make no such systematic distinction and these two words sound identical. Some other textbooks show this tone as 'falling' (à) for typographical convenience; we write them with the 'high level' diacritic (ā) throughout as this pronunciation seems to be dominant among younger speakers in Hong Kong.

For many beginners, two strategies may be useful in tackling the six tones:

- The three level tones (high, mid and low) are relatively easy to recognize and produce, providing three anchor points. In musical terms, the difference between the high and mid-level tones is about one and a half tones (a minor third), while that between the mid-level and low-level tones is one whole tone.
- It is relatively easy to recognize a tone as being one of the higher or one of the lower three. The 'h' marking the three low tones in the Yale romanization system comes in useful here, effectively marking the lower register. To distinguish between the various lower tones, especially between the low level and low falling, is more demanding. The low falling tone as in làih 'come' can often be recognized by a 'creaky' voice quality as the pitch reaches the bottom of the speaker's voice range.

The pronunciations are best learnt from native speakers or recordings, but English intonation patterns approximate some of the tones:

- The high rising tone as in **dím** 'how?' resembles a question showing surprise ('who? really??');
- The low rising tone as in **ngóh** 'I' begins with a slight dip and can be compared to a hesitant 'well, . . . ';
- The low falling tone as in **yahn** 'person' resembles a dismissive intonation, as in a calm but definitive 'no'.

It may be some consolation to note that speakers of other Chinese dialects, and even some native speakers, have difficulty distinguishing the two rising tones, sometimes confusing phrases such as:

sung séung heuisend some pictures (séung)sung séuhng heuisend something up (séuhng)

Méihgwok síAmerican historyMéihgwok síhthe American market

Tone versus stress and intonation

In English a word such as 'yes' can be pronounced with a variety of intonation patterns:

• falling: yes! (We've done it!)

• dipping: yes, (but . . .)

• low level: yes . . . (What is it this time?)

In Cantonese the word **haih** 'yes' must be pronounced with a low-level tone regardless of the context, otherwise it will sound like another word. Word stress and intonation patterns as used in English and other European languages often interfere with production of tones. When we stress a word, we automatically give it a high pitch; if this is superimposed on a Cantonese tone, it may turn a low tone into a high level or high falling one, for example:

haih (yes) + emphatic stress \rightarrow **hāi** or **hài** (this is a common error, often committed by the second author, and comes dangerously close to obscenity)

Similarly, questions in English and many other languages end with a rising intonation. If this is added to a Cantonese question it may change the identity of the last word or two. Consequently, the scope for stress and intonation is limited (largely to sentence particles).

Tone change

A 'changed tone' occurs in colloquial speech in certain combinations. The affected syllable is pronounced with a high rising tone instead of the usual low (level or falling) tone. There are several categories including the following:

14 Unit 3

(i) Nouns at the end of a compound or phrase:

yàhn person	but	léuih-yán woman
yuht month	but	chóh-yút spend a month
•		recovering after giving birth
màhn-hohk literature	but	Yīng-mán English (language)
yùh-dáan fish-cake	but	tìuh yú a/the fish
làuh-tāi staircase	but	déng-làu top floor, penthouse
yāt hahp syū a box of books	but	y āt go <i>háp</i> a box
yāt dihp choi a dish of vegetable	es but	yāt jek <i>díp</i> a dish

(ii) Names with the prefix a- or louh-:

Chàhn Sāang Mr. Chan	but A-Chán Chan (colloquial)
Làih Sāang Mr Lai	Lóuh-Lái old (Mr) Lai

(iii) Reduplicated adjectives, in which the second syllable changes to a high rising tone (see also Unit 9):

sòh foolish	but	sòh-só-déi silly
fèih fat	but	fèih-féi-déi chubby

The rules underlying this alternation are rather too complex to spell out here. Learners will develop a feel for this phenomenon on exposure to colloquial Cantonese.

Exercise 3.1

Practise distinguishing the six tones on the following syllables (meanings given in parentheses indicate that the syllable forms part of a word with that meaning):

1	sī	sí	si	sìh	síh	sih
	poem	history	try	time	market	matter
2	fān	fán	fan	fàhn	fáhn	fahn
	split	powder	lie	grave	(excited)	portion
3	sēui	séui	seui	sèuih	séuih	seuih
	need	water	tax	suspend	(clue)	(tunnel)
4	yāu	yáu	yau	yàuh	yáuh	yauh
	rest	petrol	slender	swim	have	again
5	fū	fú	fu	fùh	fúh	fuh
	(husband)	bitter	trousers	support	woman	father

Exercise 3.2

Read out the following sentences which illustrate the same sequence of six tones as in exercise 3.1:

- 1 **Dī gú-piu kòhng séuhng lohk** (The shares are going up and down (in value) like crazy)
- 2 Ūkkéi gam kùhng móuh yuhng (The household is so poor, it's no use)
- 3 **Gām lín gwai mh máaih jyuh** (This year it's expensive, (we) won't buy it yet)
- 4 **Sān láu taai làahn máaih maaih** (New flats are too difficult to buy and sell)
- 5 **Bīn gwái go tùhng kéuih jyuh?** (Who on earth is living with him?)
- 6 **Jīng hóu saai sèhng máahn sihk** (After steaming everything, spend the whole evening eating it)

Exercise 3.3

Pronounce the following pairs differing in tone (and occasionally other features such as vowel length):

1 fóchē	train	fochē	lorry
2 chīsin	crazy	chìhsihn	charity
3 lóuh yàhn	old person	louh yàhn	pedestrian
4 gāaisíh	market	gai sìh	count the time
5 sái sān	to wash one's body	sái sahn	clean the kidney (dialysis)
6 lāangsāam	sweater	laahn sāam	worn-out clothes
7 gúsíh	stock market	gusih	story
8 maaih láu	sell a flat	máaih lāu	buy a jacket
9 gáu dím	9 o'clock	gáau dihm	manage to do
			something
10 sēung mòhng	casualty	séuhng móhng	get on the Internet

[†] Exercise 3.4

Change the tone of the italicized syllable or word to the high-rising changed tone as used in colloquial speech, for example, $\mathbf{s}\mathbf{\bar{a}}\mathbf{n}$ new + $\mathbf{m}\mathbf{\hat{a}}\mathbf{h}\mathbf{n}$ information $\rightarrow \mathbf{s}\mathbf{\bar{a}}\mathbf{n}\mathbf{m}\mathbf{\acute{a}}\mathbf{n}$ news:

1 hauh behind + $m \hat{u} h n$ door \rightarrow	back door
2 yàuh oil + <i>tìuh</i> strip \rightarrow	Chinese fried doughnut
3 bun half + <i>yeh</i> late \rightarrow	midnight

16 Unit 3

4	sīu burn $+$ yeh late \rightarrow	late-night meal
5	Dāk German + <i>màhn</i> language →	German
6	tīn sky + <i>pàahng</i> scaffolding →	roof top
7	sāam jek three-classifier + <i>dihp</i> dish \rightarrow	three dishes
8	Ou bay $+ m \dot{u} h n$ door $\rightarrow $	Macau (place name)
9	yahp put in $+$ <i>yàuh</i> oil \rightarrow	fill up with petrol
10	fā flower + y ù h n garden \rightarrow	garden

UNIT FOUR

Pronouns

The personal pronouns make a good place to begin an initiation into Cantonese grammar, since they are rather straightforward: they do not vary according to gender, case or social status. Nor are there any possessive forms as such, since the pronouns combine with the possessive **ge** to indicate possession (see Unit 5). The plural forms are produced in regular fashion by adding the suffix **-deih** to the corresponding singular forms.

PersonSingularPluralfirst: I, wengóh (óh)ngóhdeih (óhdeih)second: younéih (léih)néihdeih (léihdeih)third: he/she, theykéuih (héuih)kéuihdeih (héuihdeih)

Notice that each of the pronoun forms has alternative pronunciations. The forms in brackets are the result of sound changes, and are the object of a certain amount of controversy: courses rarely teach them; teachers may treat them as incorrect, and television advertising campaigns have even sought to outlaw them. Nevertheless in the case of 'you' léih has become by far the most common form, with initial l- replacing n-, while óh and héuih are also commonly heard.

The suffix -deih

One of the few grammatical suffixes in the language, the suffix **-deih** cannot be used to form plural forms of nouns (e.g. we cannot use *sīnsāang-deih to mean 'teachers'). Apart from the personal pronouns as shown above, its only uses are:

(i) In the form **yàhn-deih** which serves as a kind of indefinite pronoun (people, one, etc.):

Yàhndeih tái-jyuh léihPeople are watching youMhóu chou yàhndeihDon't disturb (other) people

This form can also be used to refer indirectly to oneself:

A: **Léih dímgáai mh chēut sēng ga?** Why don't you say anything? B: **Yàhndeih mhóuyisi a** Maybe I'm embarrassed

(ii) In contracted forms with names, as in:

Paul kéuihdeih → Paul-deih
A-Chán kéuihdeih → A-Chán-deih
Paul and his family/friends
Chan and his family/company,
etc.

Using pronouns

Pronouns are used to refer to individuals, as in introductions:

Ngóh giu Stephen My name is Stephen

Ngóh haih go hohksāangI'm a studentKéuih haih MéihgwokyàhnHe's AmericanNgóhdeih haih yàuhhaakWe're tourists

As in many languages (such as Italian, Spanish and Japanese) pronouns can be omitted when they are understood from the context. Some typical examples of such contexts follow:

A: Heui bīndouh a?

(*lit.* go where?) Where are you going?

B. Fāan ūkkéi

(*lit.* return home) I'm going home

A: A-Yīng jouh mātyèh gūng ga?

(lit. Ying does what job?)

What does Ying do for a living?

B: Jouh wuhsih ge

(*lit.* does nurse)
She's a nurse

Note that this also applies to objects, as in the following cases:

A: Yám-mh-yám jáu a?

(*lit.* drink wine or not?) Would you like some wine?

B: Mh yám la, mgōi saai

(*lit.* not drink, thanks a lot) I won't, thanks

A: Nī go sung béi léih ge

(*lit.* this give to you) This is for you

B: Dōjeh! Ngóh hóu jūngyi a!

(*lit.* thank you! I very much like!) Thank you! I like it!

Again, when several statements are made about the same subject, it is usually understood after its first mention. If you are introducing yourself, for example, it is sufficient to use **ngóh** once:

Ngóh giu Mary, gām lín sahp-baat seui, làih Hēunggóng jouh gāauwuhn hohksāang

(*lit.* I called Mary, this year eighteen years old, come Hong Kong as exchange student)

My name is Mary, [I'm] eighteen this year, [I] came to Hong Kong as an exchange student

The third person: he, she and it

The third-person pronoun **kéuih** means 'he' or 'she', without distinction of gender. It is not normally used to refer to inanimate things, and hence there is typically nothing corresponding to the English pronoun **it**, whether as subject or object of the verb. For example, referring to a picture or piece of clothing:

Hóu leng a! Ngóh yiu a!

(*lit.* very nice! I want) It's beautiful! I want it!

Again, a sequence of statements can be made about the same topic:

Kéuih máaih-jó ga sān chē hóu gwai ge, hóu chói kéuih taaitáai dōu jūngyi jēk

(*lit.* he bought a new car, very expensive, fortunately his wife also likes) He's bought a new car, [it was] very expensive, fortunately his wife likes [it] too

Similarly, there is no counterpart to 'it' referring to the weather, or to nothing in particular:

Gāmyaht hóu yiht a

(*lit.* today very hot) It's hot today

Lohk yúh la!

(*lit.* falls rain) It's raining!

Hóu làahn góng

(*lit.* very hard to say) It's hard to say

Reflexive jihgéi

The reflexive form **jihgéi** is used for all persons: myself, yourself, herself, ourselves, etc. It is used:

(i) Alone, referring back to the subject of the sentence:

Léih yiu síusām jiugu jihgéi

(lit. you should carefully look after yourself) You should look after yourself carefully

Mhóu sèhngyaht gwaai jihgéi

(*lit.* don't always blame yourself) Don't blame yourself all the time

Kéuih deui jihgéi hóu yáuh-seunsām

(*lit.* he towards himself very confident)
He has confidence in himself

(ii) Reinforcing a pronoun:

Ngóh jihgéi mh wúih gám jouh

(*lit.* I myself not would so behave) I myself would not behave like that

Léih jihgéi sīn jī daap-on

(*lit.* you self only know answer) Only you yourself know the answer

A-Yān sèhngyaht jaan *kéuih jihgéi*

(*lit.* Yan always praise her self) Yan is always praising herself

(iii) As an adverb meaning 'by oneself':

Ngóh jihgéi máaih sung jyú faahn

(*lit.* I myself buy groceries cook rice) I'll buy the groceries and cook by myself

Léih yīnggōi jihgéi lám chīngchó

(*lit.* you should yourself think clearly) You should think things over by yourself

Kéuih séung jihgéi jouh haih-jyúyahm

(*lit.* he want self do department chairperson)
He wants to be the department chairperson himself

Exercise 4.1

Supply the missing pronouns:

1	jyuh hái Gáulùhng	<i>I</i> live in Kowloon
2	Hóu hōisām gin dóu	Glad to see you
3	sīk	We know them
4	haih go hóu yīsāng	You are a nice doctor
5	haih hohksāang	You are students
6	hóu jūngyi yāmngohk	He likes music
7	dá-jó-dihnwá béi lóuhbáan	<i>I</i> phoned the boss
8	heui-gwo Oumún	They've been to Macau
9	geidāk	She remembered me
0	hóu gwa-jyuh	They missed us very much

Exercise 4.2

Replace the italicized phrases with pronouns in the following sentences:

1 2 3	Síu Mìhng hóu lengjái Ngóh heui taam ngóh a-màh Máh yīsāng yī-hóu-jó géi go	Ming is very handsome I'm going to visit my grandmother Dr Ma has cured several patients
1	<i>behngyàhn</i> Susan ga-jó <i>John</i> go sailóu	Susan has married John's brother
5	<i>Dī hohksāang ge</i> gūngfo taai dōla	The students' homework is too much
6	Lóuhbáan tùhng go	The boss and the secretary got
	<i>beisyū</i> git-jó-fān	married
7	Ngóh hóu gwa-jyuh <i>go léui</i>	I'm missing my daughter very much
8	Kéuih tái-jó <i>dī tùhngsih</i> ge seun	She read her colleagues' letter(s)
9	Ngóh tùhng ngóh sailóu yātchàih	My brother and I collaborate
	hahpjok	together
10	<i>Léih tùhng go jái</i> hóu chíhyéung	You and your son look like each other

[†] Exercise 4.3

Answer the following questions, considering whether a pronoun is needed or not:

1	Léih jūng-mh-jūngyi Hēunggóng a?	Do you like Hong Kong?
2	Kàhmyaht tīnhei dím a?	How was the weather yesterday?
3	Bīngo hóyíh bōng ngóh a?	Who can help me?
4	Léih tóuh-mh-tóuh-ngoh a?	Are you hungry?
5	Kéuihdeih jáu-jó meih a?	Have they left?
6	Kéuih je-jó chín béi bīngo a?	Who did he lend money to?
	Léih maaih-jó ga chē meih a?	Have you sold the car?
8	Fūk wá leng-mh-leng a?	Is the picture beautiful?
9	Ga chē jíng hóu meih a?	Is the car mended?
10	Dī gúpiu yáuh-móuh sīng a?	Have the shares gone up?

UNIT FIVE

Possession: ge

ge is one of the most frequent words in Cantonese, used in several important grammatical patterns. One of its main uses is to indicate possession, as we can illustrate with the pronouns introduced in Unit 4:

ngóh ge	my, mine	ngóhdeih ge	our, ours
léih ge	your, yours	léihdeih ge	your, yours
kéuih ge	his/her, hers	kéuihdeih ge	their, theirs
jihgéi ge	one's own	bīngo ge	whose

As the two translations suggest, these are used in two ways:

1 Before a possessed noun:

Ngóh ge deihjí hái nīdouh
Léih ge Gwóngdūng-wá mìh cho
Kéuih ge gihnhōng mhaih géi hóu
Jihgéi ge gātìhng jeui gányiu
My address is here
Your Cantonese is not bad
Her health is not too good
One's own family is most
important

2 As predicates, usually following the verb **haih** 'be' (see Unit 7):

Nī go haih léih ge This is yours
Dī chín haih kéuih ge The money is his
Haih-mhaih ngóh ge? Is it mine?

The verb **haih** 'be' can also be understood, so that the resulting sentence lacks a verb:

Bá jē kéuih ge

Jek māau kéuihdeih ge

Nī tìuh sósìh bīngo ge?

This umbrella is hers
The cat is theirs
Whose key is this?

Some points to notice:

• The **ge** indicating possession is sometimes omitted, especially where there is a close intrinsic relationship between the possessor and possessed, as in the case of relatives and family members:

kéuih sailóu her younger brother my husband (colloquial)

léih gūjē your aunt (father's younger sister)

These phrases can themselves serve as the possessor of another noun:

Kéuih sailóu ge mahntàih hóu dō

Her (younger) brother's problems are many

Ngóh lóuhgūng ge ūkkéi-yàhn làih saai

My husband's family have all come

Léih gūjē ge mahtyihp hóu jihk-chín

Your aunt's property is worth a lot money

• Before nouns, the appropriate classifier (see Unit 8) is often used in place of **ge**, especially in colloquial language:

ngóh go léui my daughter kéuih ga chē his car léih gihn sāam your shirt

This has a similar meaning to the corresponding phrase with ge, but denotes a particular individual or object. To specify more than one, the plural classifier $d\bar{t}$ is used:

ngóh dī jáiléui my children kéuih dī sāam her clothes Peter dī hohksāang Peter's students

See Unit 8 for more on classifiers.

Exercise 5.1

Express the following by using the possessive marker provided (i.e. classifier, ge or $d\overline{\iota}$):

Example: my book (syū: bún) → ngóh bún syū

- 1 your nose (beih: go)
- 2 her friends (pàhngyáuh: ge/dī)
- 3 her eyes (ngáahn: deui)
- 4 his desk (tói: jēung)
- 5 my letters (seun: ge/dī)
- 6 her handbag (sáudói: go)
- 7 my foot (geuk: jek)
- 8 Hong Kong's weather (tīnhei: ge)
- 9 today's news (sānmán: ge/dī)
- 10 tomorrow's temperature (heiwān: ge)

Exercise 5.2

Express the following by using the appropriate possessive marker:

Example: Your computer is too slow → Ngóh go dihnlóuh taai maahn

Compliment someone on their shoes (deui hàaih)
hàaih hóu leng wo
Ask for the price of your friend's coat (gihn lāu)
lāu géi dō chín a?
Describe Hong Kong's airport (go gēichéuhng) to a friend
gēichèuhng hóu daaih ga
Your sports car (ga páauchē) has broken down
páauchē waaih-jó
More than one of your relatives (chānchīk) is coming to see you
chānchīk làih taam ngóh
Your wife (taaitáai) is waiting for you
taaitáai dáng-gán ngóh
Your son (jái) likes to sing
jái jūngyi cheung-gō
Your children (jáiléui) are in secondary school
jáiléui duhk-gán jūnghohk

Exercise 5.3

Translate into Cantonese:

- 1 This watch (jek sáubīu) is mine
- 2 The piano (go gongkàhm) is hers
- 3 That house (gāan ūk) is theirs

26 Unit 5

- 4 These books (dī syū) are yours
 5 Those pictures (dī wá) are Miss Chan's
 6 This place (go wái) is ours
- 7 This office (go baahn-gūng-sāt) is Mr Lam's 8 The money (dī chín) is my wife's

UNIT SIX

Possession and existence: yáuh

The verb **yáuh,** like 'have' in English, serves both as a main verb ('I have a question') and as an auxiliary ('Have you sent the letter?'). Like all verbs in Cantonese, it keeps the same form for different persons:

Ngóh yáuh yāt go jái yāt go léui I have a son and a daughter Léih juhng yáuh gēiwuih You still have a chance Kéuih yáuh géi gāan ūk She has several houses

Unusually, however, it has one irregular form: **móuh** is the negative form of **yáuh**. So, 'I don't have' is **ngóh móuh** (not ***ngóh mh yáuh**):

Léih móuh gīngyihmYou don't have experienceNgóhdeih móuh sailouhjáiWe don't have any childrenKéuihdeih móuh ūkkéiThey don't have a home

The question form is composed by putting yáuh 'have' and móuh 'not have' together as yáuh-móuh (not *yáuh-mh-yáuh):

Léih yáuh-móuh mahntàih a? Do you have any questions? Ngóhdeih yáuh-móuh sìhgaan a? Do we have time? Kéuihdeih yáuh-móuh chín a? Do they have money?

See Unit 23 for more on questions of this kind.

Existential yauh

yáuh can also mean 'there is' (like Spanish 'hay', French 'il y a', etc.). Similarly, móuh can mean 'There is not' and yáuh-móuh 'Is there . . .?':

Hēunggóng yáuh hóu dō dīksí

(*lit.* Hong Kong have very many taxis) There are lots of taxis in Hong Kong

Nīdouh móuh hùhngmāau

(*lit.* here not-have pandas) There are no pandas here

Tói seuhngmihn yáuh géi jek díp

(*lit.* table on-top have a few plates) There are a few plates on the table

Notice that no preposition is needed: the sentence simply begins with the place expression (see Unit 13).

yáuh in this sense also serves to introduce an indefinite noun phrase:

Yáuh (vāt) go vàhn wán léih (not *Yāt go vàhn wán léih)

(*lit.* have a person seeking you) A man is looking for you

Yáuh géi go hohksāang hóu lāu

(*lit.* have several students very angry) Several students are angry

Yáuh hóu dō haakyàhn làih-jó

(*lit.* have many guests came) Many guests came

A verb can be added to show what is to be done with the item introduced by **váuh/móuh**:

Ngóh gāmyaht yáuh gūngfo jouh

(*lit*. I today have homework to do) I have homework to do today

Nīdouh móuh sāam máaih

(*lit.* here have no clothes to buy) There are no clothes to buy here

Yahpbihn yáuh-móuh yéh sihk a?

(*lit.* inside have or have not anything to eat) Is there anything to eat inside?

Note that there is no need to distinguish infinitives from the regular form of the verb.

yáuh as auxiliary

yáuh also serves as an auxiliary verb, rather like 'have' in English 'They have left', but normally only in the negative form **móuh** and in questions as **yáuh-móuh**:

Kéuih gāmyaht móuh fāan-gūng He hasn't been to work today **Ngóh móuh jouh-gwo sīnsāang** I've never been a teacher

A: **Kéuihdeih yáuh-móuh būn ūk a?** Have they moved house?

B: Yáuh a (būn-jó la) Yes (they have)

A: **Léih yáuh-móuh hohk-gwo** Have you learnt Putonghua?

Póutūng-wá a?

B: **Móuh a (móuh hohk-gwo a)** No (I haven't)

Note the close relationship here between yáuh/móuh and the aspect markers jó and gwo (gwo can appear in sentences with móuh or yáuh-móuh but jó cannot: see Unit 18). The use of yáuh alone as an auxiliary is rare, but a useful idiom is yáuh lohk 'Someone's getting off (used on minibuses, and so on to express the wish to get off):

Yáuh lohk, mgōi (Someone's) getting off, please Chìhnmihn yáuh lohk (Someone's) getting off just ahead

Adjectives formed with yauh

yáuh and móuh can also be added to nouns to form adjectives:

 $y\acute{a}uh + ch\acute{n}$ money $\rightarrow y\acute{a}uh$ -chín rich

 $y\acute{a}uh + s\bar{a}m$ heart $\rightarrow y\acute{a}uh-s\bar{a}m$ thoughtful, kind

yáuh + yuhng use → yáuh-yuhng useful móuh + vuhng use → móuh-vuhng useless

 $y\acute{a}uh + l\acute{u}$ substance \rightarrow $y\acute{a}uh-l\acute{u}$ substantial, learned $m\acute{o}uh + l\acute{u}$ substance \rightarrow $m\acute{o}uh-l\acute{u}$ vacuous, ignorant

The adjectives thus formed can then be modified in the usual way (see Unit 9):

Dōjeh léihdeih gam yáuh-sām

Thank you for being so thoughtful

Kéuih lóuhgūng hóu yáuh-chín, bātgwo taai móuh-líu

Her husband is very rich but too vacuous

Exercise 6.1

Turn the following statements into questions, positive or negative statements as specified:

Example: **Ngóh yáuh mahntàih** I have a problem → negative: **Ngóh móuh mahntàih**

- 1 **Ngóh yáuh yigin** (I have an opinion) → negative
- 2 **Léih yáuh beimaht** (You have a secret) → question
- 3 Gāmyaht yáuh sīusīk (Today we have the latest information) → negative
- 4 **Faatgwok yáuh Jūnggwokyàhn** (There are Chinese people in France) → question
- 5 Chēutbihn móuh yàhn (There's nobody outside) → positive
- 6 **Kéuih yáuh behng** (She has a disease) → negative
- 7 **Léih váuh láihmaht** (You have a gift) → question
- 8 **Bún syū yáuh Jūngmàhnjih** (There are Chinese characters in the book) → negative
- 9 **Sātìhn yáuh fóchē-jaahm** (There's a railway station at Shatin) → question
- 10 **Kàhmyaht móuh taaiyèuhng** (There was no sunshine yesterday) → positive

Exercise 6.2

Answer the following questions about yourself using **yáuh or móuh** as appropriate:

- 1 Léih yáuh-móuh yāt baak mān a (\$100)?
- 2 Léih hái Hēunggóng yáuh-móuh pàhngyáuh a (friends)?
- 3 Léihdeih yáuh-móuh dihnlóuh a (computer)?
- 4 Léih gāan fóng yáuh-móuh hūngwái a (space in your room)?
- 5 **Léih yáuh-móuh sìhgaan hohk Gwóngdūng-wá a** (time to study Cantonese)?
- 6 Léihdeih yáuh-móuh heui-gwo Gwóngjāu a (been to Guangzhou)?
- 7 Léih gāmyaht yáuh-móuh tái sānmán a (watch the news today)?

8 **Léih yáuh-móuh hingcheui jyun gūng a** (interested in changing your job)?

Exercise 6.3

Translate these questions into Cantonese:

- 1 Do you have a car (chē)?
- 2 Do you have brothers or sisters (hīngdaih jímuih)?
- 3 Do you have a mobile phone (sáutàih dihnwá)?
- 4 Have you been to Beijing (Bākgīng)?
- 5 Has she visited (taam-gwo) you?
- 6 There are no birds (jeukjái) here.
- 7 There are many minibuses (síubā) in Hong Kong.
- 8 Is there anybody inside (yahpbihn)?
- 9 Are there students in the classroom (fosāt)?
- 10 Is there any good news (hóu sīusīk) today?

UNIT SEVEN

Being: haih

The verb **haih** 'to be' is straightforward in form, but used in ways which do not always match those of English and other European languages. It is used to introduce noun phrases, as in making introductions and identifying people:

Ngóh haih Chàhn Síu Mìhng
Léih haih bīngo a?
Kéuih haih yīsāng

I'm Chan Siu Ming
Who are you?
She's a doctor

As we saw in Unit 5, many such statements can also be made without **haih**, especially when a sentence particle such as the explanatory **lèihga** is added (see Unit 25):

Nī go haih ngóh làahm-pàhngyáuh
or Nī go ngóh làahm-pàhngyáuh (lèihga)
Ngóhdeih haih Chìuhjāuyàhn
or Ngóhdeih Chìuhjāuyàhn (lèihga)

We are Chiu Chow (people)

Note in particular that **haih** is not used with predicative adjectives, which are typically introduced by **hóu** (*lit*. 'very': see Unit 9):

Ngóh yìhgā hóu mòhng
(not *Ngóh yìhgā haih hóu mòhng)
Léih gājē hóu leng
(not *Léih gājē haih hóu leng)
Ngóh tùhng kéuih hóu suhk
(not *Ngóh tùhng kéuih haih hóu suhk)

I know him well (lit. I with him familiar)

haih showing agreement

haih also serves to indicate agreement and as an answer to certain types of question, haih meaning 'yes' and its negative form mhaih 'no':

A: **Hóu gwai wo** It's very expensive

B: **Haih a** Yes, it is

A: **Léih jānhaih seun mē?** Do you really believe it?

B: **Mhaih a** No, I don't

haih should not be taken simply as a counterpart to 'yes', however, since:

(i) haih can indicate agreement with a negative sentence:

A: **Léih mh seun àh?** Don't you believe it?

B: **Haih a** No (I don't)

A: **Kéuihdeih meih dou mē?** Haven't they arrived yet?

B: **Haih a** No (they haven't)

(ii) The most common types of question do not take **haih** for an answer. Instead, the verb of the original question is repeated (see Unit 23):

A: **Ngóhdeih heui-mh-heui** Are we going shopping?

máaih yéh a?

B: **Heui a** Yes (not *haih)

A: **Léih jūng-mh-jūngyi a?**B: **Jūngyi a**Do you like it?
Yes (not *haih)

haih versus hái

Notice the difference in tone between **haih** and **hái**, which can also be translated as 'be' but in the sense of being located:

haih	be	e.g.	Kéuih haih Yahtbúnyàhn	She's Japanese
			Kéuih haih haauhjéung	He's the principal
hái	be at/in	e.g.	Kéuih hái Seuhnghói	She's in Shanghai
			Ngóh hái syūfóng	I'm in the study

Emphatic haih and ge

haih can serve to emphasize the following word(s), especially in concert with the particle **ge** at the end of the sentence:

Haih léih bōng ngóh ge (emphasizing the subject **léih**)
It was you who helped me

Nī bún syū haih bīngo sung ga? (emphasizing the subject bīngo)

(lit. this book is who gave)

Who was it that gave (us) this book?

Füng seun haih gämyaht gei dou ge (emphasizing the adverb gāmyaht)

(*lit*. the letter is today arrived) It was today the letter arrived

This formula is especially useful because, Cantonese being a tone language, there is limited scope for emphasizing a word through stress as is commonly done in English as in 'The letter arrived *today*'. The particle **ge** is characteristic of assertions (see Unit 25).

Exercise 7.1

Answer the questions affirmatively or negatively as indicated. Add the particle **a** for politeness.

1 **Léih chìh dou àh?**2 **Léih héi-jó-sān làh?**3 **Léih behng-jó àh?**Are you late? (answer: no)
Have you woken up? (yes)
Are you sick? (no)

3 **Léih behng-jó àh?**4 **Kéuih jáu-jó mē?**Are you sick? (no)
Has he left? (yes)

5 Léih gin-gwo ngóh mē?
6 Kéuih sīk léih ge mē?
7 Kéuih fan-jó làh?
Have you seen me before? (no)
Does she know you? (no)
Has she fallen asleep? (yes)

8 Kéuih yāusīk-gán àh? Is he resting? (yes)
9 Kéuih hóu guih àh? Is he tired? (yes)

10 **Máh gaausauh hōi-gán wúi àh?** Is Professor Ma having a meeting?

(no)

11 **Léih mh sīk kéuih mē?**12 **Léih ms śi fāng gāng àh?**Don't you know him? (no)

12 **Léih msái fāan gũng àh?** Don't you need to go to work?

(no)

Exercise 7.2

Choose haih or hái as required:

1 Kéuihdeih	Méihgwokyàhn	They are American
2 Kéuih	ngóh sailóu	He's my brother
3 Kéuih	hohkhaauh	She's at school
4 Kéuihdeih m	h Hēunggóng	They are not in Hong Kong
5 Ngóh	Seuhnghóiyàhn	I'm Shanghainese
6 Go dói	_ kéuih ge	The bag is his
7 Léih Sāang	gūngsī	Mr Lee is at the office
8 Ngóhdeih	pàhngyáuh	We're friends
9 Ngóh go jái	ūkkéi	My son is home
10 Kéuih	ngóh tùhnghohk	He's my classmate

† Exercise 7.3

Use **haih** and **ge** to emphasize the italicized word(s):

Example: Ngóh gaau Yīngmán I teach English \rightarrow Ngóh haih gaau Yīngmán ge

1	Lóuhbáan góng béi ngóh tēng	The boss told me
2	<i>Ngóh</i> béi bún syū léih	I gave you the book
	Kéuih <i>gām jīu</i> jáu	He left this morning
4	Gihn sāam <i>géisìh</i> máaih	When was this shirt bought?
5	Go chēung <i>bīngo</i> hōi?	Who opened the window?
6	Ngóh <i>hái nīdouh</i> dáng léih	I'll wait for you <i>here</i>
7	<i>Kéuih taaitáai</i> wán dóu	His wife found it
8	Kéuih hái Taaigwok johng chē	He had a car crash in Thailand

UNIT FIGHT

Noun classifiers

To refer to a certain number of items, Cantonese (like other varieties of Chinese and many Asian languages) calls for a classifier (or measure) after the number. While in English relatively few nouns have such words associated with them, (for example 'a brace of pheasants', 'twenty head of cattle'), in Cantonese all nouns have such words and they must be used, for example:

yāt go yàhn one person léuhng tìuh yú two fish sei jek gáu four dogs sahp tou hei ten films

Classifiers pose two different problems:

- (i) which one to use with which noun;
- (ii) when and where to use them.

First, however, it is useful to distinguish some sub-types of classifier.

Measures

These are in the narrow sense words used in counting quantities as in 'two dozen eggs':

léuhng bohng ngàuhyuhk two pounds of beef

yāt gãn choi a catty of vegetables (1 catty = 22 ounces)

bun da gaidáan half a dozen eggs

Containers

These form an open-ended category since any container can serve as a measure:

sāam būi chàhthree cups of tealéuhng hahp tóngtwo boxes of sweetsyāt bāau máiha bag of (uncooked) ricevāt dihp choia dish of vegetables

These container words can also be used as nouns in their own right, in which case they generally take the classifier **go:**

yāt go wún a bowl léuhng go háp two boxes dō yāt go būi another glass/cup géi jek díp several plates

Collective classifiers

These refer to a grouping of items:

nī bāan hohksāangthis class of studentsgó dēui laahpsaapthat pile of rubbishyāt daahp syūa pile of booksyāt tou sān sāama set of new clothesgó deui hàaihthat pair of shoes

Unfortunately, not all things that are treated as pairs in English take **deui**: 'a pair of trousers' is **yāt tìuh fu**, 'a pair of scissors' **yāt bá gaaujín**. On the other hand, there are other uses of **deui** which are understandable:

ngóh deui sáu

(lit. my pair (of) hands) my (two) hands

vāt deui fūfúh

(*lit.* one pair couple) a (married) couple

nī deui māléui

(*lit.* this pair twin girls) these twin girls

Plurals and quantities with dī

The word **dī** can be seen as a special kind of measure, or more precisely as a collective classifier. It is used for both countable and uncountable nouns:

(a) referring to an unspecified number of countable items:

Dī cháang hóu tìhm Ngóh heui taam dī pàhngyáuh Kéuih dī tùhngsih taai mòhng The oranges are nice and sweet I'm going to visit some friends Her colleagues are too busy

(b) referring to quantities of uncountable substances:

Dī séui **m̀h** gau yiht Ngóh yiu máaih dī sīnnáaih Léih dī chàh hóu hēung The water is not hot enough I need to buy some fresh milk Your tea smells good

Which classifier?

There are dozens of different classifiers, from the ubiquitous **go** to very specific items like **bún** in **bún syū** 'the book'. As the term suggests, classifiers generally serve to sort nouns into semantic classes of objects:

Classifier	Semantic class	Examples	
bá	tools, instruments	bá dōu	knife
ga	machines, vehicles	ga chē	the car
gāan	buildings	gāan ūk	the house
gihn	most clothes	gihn sāam	shirt, dress
go	people	yāt go yīsāng	a doctor
	abstract things	nī go kyutdihng	this decision
		yāt go muhng	a dream
jek	most animals	jek gáu	a dog
	one of a pair	yāt jek sáu	one hand

A further important criterion is that many common classifiers categorize objects by their shape:

Classifier	Characteristics	Examples	
faai	vertical surface	yāt faai geng	a mirror
fūk	square/rectangular	yāt fūk wá	a picture
jēung	flat surface	yāt jēung tói	a table
jī	cylindrical	jī bāt	a pen/pencil

lāp	small and round	yāt lāp tóng	a sweet
tìuh	long and narrow	tìuh louh	the road

The shape criterion can override the semantic class criterion, so that animals and items of clothing distinguished by their elongated shape take **tìuh**, rather than **jek** or **gihn**:

tìuh yú	fish	tìuh kwàhn	skirt/dress
tìuh sèh	snake	tìuh fu	trousers

The appropriate classifier (or measure) can usually be checked in a dictionary, although it should be borne in mind that alternative classifiers may exist for the same noun. A computer, for example, is classified variously as a machine (yāt bouh dihnlóuh), or as a mere object (yāt go dihnlóuh).

Using classifiers

The main cases in which a classifier must be used are (illustrated with the commonest classifiers, such as **go**):

(i) Following a number:

yāt go yīsāng	one doctor	sāam go yàhn	three people
léuhng go dihnlóuh	two computers	sahp go háp	ten boxes

(ii) With the demonstratives **nī** or **lī** 'this' and **gó** 'that':

nī go sailouh	this child	gó go behngyàhn	that patient
nī go yínyùhn	this actor	gó go chēung	that window

While these usages may be familiar to readers who know Mandarin, two other important uses are more characteristically Cantonese:

(iii) In a possessive construction:

ngóh go jái	my son	kéuih gāan fóng	her room
léih gihn sāam	your dress	léihdeih chàhng láu	ı your fiat

This is a colloquial alternative to the possessive construction with **ge** (see Unit 5).

(iv) With a noun alone:

go hohksāang a/the student **go gaausauh** a/the professor **gihn sāam** a/the dress **jek gáujái** a/the puppy

This usage typically refers to a particular item. When the noun it goes with comes before the verb it is definite (generally corresponding to 'the'):

Gihn sāam hóu gwai
Ga chē jáu-jó
The dress is expensive
The car has gone
The stomach hurts

When the classifier and noun come after the verb it can be definite, but can also refer to an indefinite, but specific item ('a certain . . .'):

Kéuih máaih-jó gihn sāam Ngóh gāmyaht tái-jó bún syū Kéuihdeih hōi-jó go wuhháu She's bought a/the dress I read a/the book today They opened an/the account

Exercise 8.1

Fill the gap with a suitable measure:

1	yāt	_ baahkchoi (Chinese cabbage)
2	bun	mùihgwaifā (roses)
3	yāt	_ seun (letter)
4	yāt	_ jyūyuhk (pork)
5	yāt	_ sìhgaan (time)
6	léuhng_	bējáu (beer)
7	yāt	_ tō-háai (slippers)
8	géi	_ sāijōng (suit)

Exercise 8.2

Order the following items at a restaurant, adding **mgōi** for politeness at the beginning or end of the sentence (see Unit 27):

- 1 two glasses (būi) of red wine (hùhng jáu)
- 2 a dish (dihp) of fried noodles (cháau mihn)
- 3 three bowls (wún) of rice (faahn)
- 4 another pair (deui) of chopsticks (faaijí)
- 5 a bottle (jēun) of water (séui)
- 6 a menu (chāan-páai)
- 7 two wine glasses (jáu-būi)

- 8 a pot (wùh) of hot water (yiht séui)
- 9 a piece (gihn) of cake (daahn-gōu) 10 a cup (būi) of coffee (gafē)

Exercise 8.3

Match the following items with the appropriate classifier or measure:

A clothing

1	tāai tie	a	gihn
2	hàaih (one) shoe	b	tìuh
3	sāijōng suit	c	déng
4	móu hat	d	jek
5	láu coat	e	tou

B stationery

1	gaaujín scissors	a	fūk
2	bāt pen	b	bá
3	báan board	c	jēung
4	yàuh-wá oil painting	d	jī
5	kāatnín business card	e	faai

Exercise 8.4

Choose the appropriate classifier to replace ge in the following possessive expressions:

1	kéuih ge sáubīu her watch	a	jēung
2	lóuhbáan ge tói the boss's desk	b	tìuh
3	gó chànng láu ge mùnn the door of that flat	c	jek
4	ngóh ge sósìh my key	d	ga
5	léih ge séunggēi your camera	e	douh

UNIT NINE

Adjectives

Adjectives are words which denote properties or qualities. Typically they serve to modify or describe nouns, and can also appear in comparative forms (see Unit 12). Since the dividing line between adjectives and verbs is not always clear, the Chinese equivalents of adjectives are often termed stative verbs. While learners need not worry about whether there 'are' adjectives in Cantonese, it is useful to remember that the words in question generally behave like verbs: that is, what applies to verbs generally applies to adjectives too.

Attributive adjectives

These modify the noun. All such adjectives come before the noun they modify:

pèhng ge sāam gwāai ge sailouhjái cho ge kyutdihng cheap clothes good, obedient children a wrong decision

The particle **ge**, which we have already seen in possessive constructions (Unit 5), serves here to link the adjective and noun. The adjective can be modified by **hóu** 'very', **jeui** 'most', etc.:

hóu kàhnlihk ge hohksāang jeui lìhnhēng ge boksih gam daaih ge yínghéung hard-working students the youngest PhD such a big influence

Predicative adjectives

These are used to state that something has a certain property. The verb **haih** 'to be' is not used (see Unit 7), but instead the adverb **hóu** is usually included:

Ngóh hóu hōisām I'm happy

Dī tōng hóu hàahmThe soup is saltyKéuih gihn sāam hóu lengHer dress is beautifulGāmyaht hóu sāpIt's humid today

hóu by itself can mean 'good' or 'very', but when used in this way it does not really mean 'very' but is merely part of the syntax of predicative adjectives.

Modifying adjectives

Other modifiers such as **géi** 'quite' and **gam** 'so' can appear in place of **hóu**, for example:

Dī gēipiu géi pèhng Léih go sáutàih dihnlóuh gamThe air tickets are quite cheap
Your laptop computer is so

gwai Go daahn-gōu *taai* tìhm Ōnchyùhn *jeui* gányiu Tìuh síng *gau (saai)* chèuhng expensive

The cake is too sweet Safety is most important The string is (more than) long

enough

Reduplicated adjectives

Another strategy to modify the meaning of an adjective is reduplication together with the suffix **-déi**:

dīn crazy \rightarrow dīn-dīn-déirather crazyfú bitter \rightarrow fú-fú-déirather bittersau thin \rightarrow sau-sáu-déirather thintìhm sweet \rightarrow tìhm-tím-déirather sweetlyúhn warm \rightarrow lyúhn-lyún-déirather warm

muhn bored/boring → muhn-mún-déi rather bored (or boring)

Note the change to a high rising tone on the repeated syllable (see Unit 3): this happens in all cases except where the original tone is high level

44 Unit 9

(as in **dīn-dēi** 'rather crazy') or already high rising (as in **fú-fú-déi** 'rather bitter'). These forms are used to qualify the force of an adjective:

Dī Jūng-yeuhk fú-fú-déi Chinese medicine is rather bitter

Tìuh gāai sāp-sāp-déi
Tou hei muhn-mún-déi
The street is a bit wet
The film was fairly boring

Ngóh gokdāk muhn-mún-déi I feel rather bored

Note that these forms are not used together with **hóu** or other modifiers such as **géi** 'quite':

Nī go gaausauh dīn-dēi ge
(not * Nī go gaausauh hóu dīn-dīn-déi ge)
Go wuhsih fèih-féi-déi
(not * Go wuhsih géi fèih-féi-déi)

This professor is pretty crazy

Such reduplicated forms are also used as adverbs (Unit 10).

Exercise 9.1

Use appropriate predicative adjectives to describe the following:

Example: the film on an aeroplane: **Tou hei hóu chèuhng** The film was long

- 1 your girlfriend
- 2 your children or your friend's children
- 3 a teacher you like
- 4 a colleague at work
- 5 your good points (to your boss)
- 6 your favourite film star
- 7 a car you would like to own
- 8 the food at school or university
- 9 the weather in Hong Kong
- 10 a novel you have been reading

Exercise 9.2

Add an appropriate attributive adjective to modify the following:

Example: **Ngóh gòhgō hái yāt gāan** *hóu yáuh-méng ge* **gūngsī jouh-yéh** My (elder) brother works for a famous company

1 Kéuih ūkkéi yáuh go haak-tēng	At home there is a living room
2 Deuimihn yáuh gāan chāantēng	Across the street there is a restaurant
3 Ngóh jeui gahn tái-gwo bún svū	I have recently read a book
4 Ngóh séung yiu jek gáu-jái 5 Ngóh tái-gwo yāt tou hei 6 Ngóhdeih yáuh dī gūngfo 7 Kéuih ūkkéi yáuh go	I would like a puppy I have seen a film We have some homework There is a problem at his home
mahntàih 8 Ngóh yíhchìhn yáuh go lóuhsī	I used to have a teacher

Exercise 9.3

Substitute a modifier (e.g. géi, gam, taai, gau saai) for hóu:

1	Ngondein nou munnyi	we are satisfied
2	Kéuih hóu lēk	She's smart (capable)
3	Kéuihdeih hóu guih	They're tired
4	Dī sailouhjái hóu dākyi	The children are cute
5	Tou hei hóu lohngmaahn	The film is romantic
6	Kéuih dī tàuhfaat hóu dyún	Her hair is very short
7	Dī gāsī hóu pèhng	The furniture is cheap
	Go gaausauh hóu yáuh-méng	The professor is famous
9	Go hohksāang hóu láahn	The student is lazy
10	Dī séung hóu leng	The photos are pretty

Exercise 9.4

Form reduplicated adjectives to express the meaning based on the adjective provided, remembering the change of tone:

Example: The baby is chubby (fèih) Go bìhbī fèih-féi-déi

- 1 This dish (**dihp sung**) is a bit hot (**laaht**)
- 2 The soup (dī tōng) is rather sour (svūn)
- 3 Your clothes (dī sāam) are a bit wet (sāp)
- 4 The weather (tīnhei) is rather cold (dung)
- 5 Her face (faai mihn) is rather round (yùhn)
- 6 Her eyes (deui ngáahn) are a little red (hùhng)

46 Unit 9

- His office (go baahn-gūng-sāt) is rather messy (lyuhn)
 The button (lāp láu) is rather loose (sūng)
- 9 Your glasses (**fu ngáahn-géng**) are rather fuzzy (**mùhng**) 10 Your husband (**lóuhgūng**) is a bit drunk (**jeui**)

UNIT TEN

Adverbs of manner

Several types of adverb phrase can be used to modify a verb or verb phrase:

- with dāk
- with gám
- · with reduplication.

These types of adverb phrase are generally based on adjectives (see Unit 9).

1 Adverb phrases with dak

The most general form of adverbial phrase is formed with $\mathbf{d}\mathbf{\bar{a}}\mathbf{k}$ and an adjective after the verb. The order is thus: $\operatorname{verb} - \mathbf{d}\mathbf{\bar{a}}\mathbf{k} - \operatorname{adjective}$. As usual the adjective is normally preceded by a modifier such as $\mathbf{h}\mathbf{\acute{o}u}$ or $\mathbf{g\acute{e}i}$, and so on (see Unit 9):

Ga chē hàahng dāk hóu maahn

(*lit.* the car travel manner very slow) The car moves very slowly

Dī haakyàhn sihk dāk géi hōisām

(*lit.* the guests eat manner quite happy) The guests are eating quite happily

Go góngsī góng dāk taai faai

(*lit*. the lecturer speak manner too fast)
The lecturer talks too fast

When the verb is followed by an object, the verb is repeated so that **dāk** immediately follows the verb:

Ngóh cheung-gō cheung dāk hóu chā

(*lit.* I sing songs sing manner very bad) I sing very badly

Kéuih waahk-wá waahk dāk gél leng

(*lit.* she paints pictures paints manner quite nice) She draws quite nicely

Léih góng-yéh góng dāk taai daaih-sēng

(*lit.* you speak things speak manner too big voice) You speak too loud

2 Adverb phrases with gám

An adjective together with **gám** 'thus' forms an adverbial phrase which comes before the verb:

Dī gwūnjung hóu daaih-sēng gám paak-sáu

(*lit.* the audience very big voice thus clap hands) The audience applauded loudly

Go yàuh-haak hóu yáuh-láihmaauh gám mahn ngóh

(*lit.* the tourist very politely thus asked me) The tourist asked me very politely

Go sīgēi hóu daaih-lihk gám sāan mùhn

(*lit.* the driver very big-force thus closed door) The driver closed the door hard

Note here also the use of **gám** by itself or **gám yéuhng** to mean 'in this way':

Ngóh mìh wúih gám góng

I wouldn't put it like that

Kéuih mìh yīnggōi gám yéung sái chín

He shouldn't waste money in this way

3 Reduplicated adverbs

A limited number of adverbs of manner are formed by repeating an adjective and adding the suffix **-déi**:

 $\begin{array}{lll} \textbf{gw\bar{a}ai} & \text{obedient} & \rightarrow & \textbf{gw\bar{a}ai\text{-}gw\bar{a}ai\text{-}d\acute{e}i} & \text{obediently} \\ \textbf{h\bar{e}ng} & \text{light} & \rightarrow & \textbf{h\bar{e}ng\text{-}h\bar{e}ng\text{-}d\acute{e}i} & \text{lightly} \end{array}$

These are placed before the verb they modify:

Léih yiu gwāai-gwāai-déi jouh gūngfo (*lit.* you need obediently do homework) You have to obediently do your homework

Yáuh yàhn hēng-hēng-déi paak mùhn (*lit.* have person lightly knock door) Someone knocked lightly on the door

A few such forms are also used without -déi:

maahn slow \rightarrow maahn-máan hàahng to walk slowly hōi-sām happy \rightarrow hōi-hōi-sām-sām jouh yéh to work happily

Note that:

(i) The repeated adverb may take on a changed tone (with a low tone becoming a high rising one: see Units 3 and 9):

jihng quiet → jihng-jíng-déi quietly

(ii) In adjectives with two syllables, each syllable is repeated separately:

gáan-dāan simple→ **gáan-gáan-dāan** simply **hīng-sūng** relaxed → **hīng-hīng-sūng** in a relaxed manner

All these forms of adverb come before the verb they modify:

Léih jihng-jíng-déi yahp heui lā

Go in quietly

Kéuih tāu-tāu-déi jáu-jó

He left secretly

Kéuih gáan-gáan-dāan gám hingjūk sāangyaht She celebrated her birthday in a simple way

Ngóhdeih hīng-hīng-sūng-sūng, gáan-gáan-dāan gám douh-ga We spend our holiday in a laid-back, simple style

Reduplicated adverbs, especially those of more than one syllable, can combine with **gám** as described in (ii) above:

Kéuih sòh-só-déi gám siu

He smiles in a foolish way

Léih syū-syū-fuhk-fuhk gám fan háidouh lā

Lie down here comfortably

Kéuihdeih háidouh hīng-hīng-sūng-sūng gám tēng gō

They're relaxing listening to songs

Exercise 10.1

Add the adverbial phrase provided to the following sentences:

1 Kéuihdeih hàahng fāan ūkkéi

They walk home slowly (màahn-máan)

2 Kéuih gaaisiuh jihgéi

He introduces himself excitedly (hóu hīngfáhn gám)

3 Kéuih mahn-jó yāt go mahntàih

He asked a question boldly (hóu daaih-dáam gám)

4 Kéuih só-jó douh mùhn

She locked the door carefully (hóu síusám gám)

5 Ngóh go jái waak-jó géi fūk wá

My son drew several pictures quickly (hóu faai gám)

6 Kéuih hohk-gán Gwóngdūng-wá

He is studying Cantonese diligently (hóu lóuhlihk gám)

7 Dī hohksāang tēng-gán yín-góng

The students are listening to the lecture attentively (hóu làuhsām gám)

8 Dī Hēunggóng hohksāang yèhng-jó béichoi

The Hong Kong students won the competition comfortably (hóu hīngsūng gám)

9 Yi-ngoih faatsāng-jó

The accident happened suddenly (hóu dahtyìhn gám)

10 Ngóh jūngyi hingjūk sāangyaht

I like to celebrate birthdays happily (hōi-hōi-sām-sām gám)

Exercise 10.2

Use **dāk** to create adverbial phrases using the adjectives provided, repeating the verb where necessary (as in numbers 6–10):

Example: **Kéuih jáu** *dāk* **hóu faai** He runs quickly Kéuih jā-chē jā dāk hóu msíusām He drives carelessly 1 Léih sé hóu hóu You write well 2 Ga fēigēi fēi _____ hóu dāi The plane flies low We sleep comfortably 3 Ngóhdeih fan _____ hóu syūfuhk 4 Kéuihdeih wáan hóu hōisām 5 Kéuih tiu hóu yúhn They play happily She iumps a long way 6 Kéuih yíng-séung _____ hóu leng
7 Ngóh yàuh-séui _____ hóu maahn She takes pictures well I swim slowly 8 Kéuih cheung-gō hóu sai-sēng She sings softly
9 Ngóh jyú-faahn hóu faai I cook quickly 10 Ngóh tiu-móuh hóu chā I dance badly Exercise 10.3 Fill in the gaps with a suitable manner adverbial with **-gám**: Ngóh (I) sé nī fūng seun (write this letter)
 Ngóhdeih (We) tái boují (read the newspaper) 3 Kéuih (He) ____ fan hái chòhng seuhngmihn (sleep on the bed) 4 **Kéuihdeih** (They) **jáu-jó** (have left) 5 Léih Síujé (Miss Lee) ____ daap ngóh go mahntàih (answer my question) 6 **Lóuhbáan** (The boss) _____ sāan-jó douh mùhn (closed the door)
7 **Yihp gaausauh** (Professor Yip) _____ góng syū (give a lecture) 8 **Dī hohksāang** (The students) _____ tēng syū (listen to the lecture) 9 **Go bìhbī** (The baby) **wáan-gán** (playing) 10 **Kéuih** (She) haam-gán (crying)

UNIT ELEVEN

Adverbs of time, frequency and duration

While the adverbs introduced in the previous unit describe the manner of action, those included in this unit are concerned with the way events take place in time.

1 Adverbs of time

Given that verbs do not indicate tense in Cantonese, adverbs are especially important in specifying when events take place:

Kéuih *yíhg*ā juhng hái yīyún She's still in hospital (now)

Kéuih *gójahnsìh* juhng hái yīyún She was still in hospital (then)

Ngóh *jīkhdāak* **heui Yīnggwok taam léih** I'm going to visit you in England (right away)

Ngóh daih-yih-sìh heui Yīnggwok taam léih I'll visit you in England (in the future)

In English the tense of the verb indicates when things take place, and the adverb can easily be omitted, while in Cantonese only the adverb indicates the time. Common adverbs include:

Present:	yìhgā	Now	gāmyaht	today
Recent past:	tàuhsīn	just now	ngāam-ngāam	just
Past:	yíhchìhn	before	búnlòih	originally
	seuhng chi	last time	gójahnsìh	then
	kàhmyaht	yesterday	chìhnyaht	the day before
				yesterday

Future: jīkhāak right away daih vih sìh, in future daih-sìh dousìh when the time hah chi next time comes tīngyaht tomorrow hauhyaht the day after tomorrow

These adverbs may come:

(a) Before the verb:

Ngóhdeih yìhgā chēut heui We're going out now

Kéuih ngāam-ngāam jáu-jó He just left

(b) Before the subject:

Búnlòih ngóh séung duhk yīfō Originally I wanted to study

medicine

Tàuhsīn kéuih mgeidāk daai sósìh Just now he forgot his keys

2 Adverbs of frequency and duration

Useful adverbs to describe the frequency of an action include:

sèhngyaht	always	yāt chi	once
dōsou	mostly	léuhngchi	twice
yáuh(-jahn)-sìh	sometimes	sāam chi	three times
yāt sìh-sìh/yāt sí-sìh	occasionally	géi chi	several times
pìhngsìh	normally	tūngséuhng	usually

múih 'each' can be used to form adverbial phrases:

múih go yuht every month múih go sīngkèih every week

Note that several common time expressions of one syllable do not take a classifier, and can form reduplicated adverbs:

múih chi or chi-chi	every time	(not *múih go chi)
múih yaht or yaht-yaht	every day	(not *múih go yaht)
múih lìhn or lìhn-lìhn	every year	(not *múih go lìhn)
múih jīu or jīu-jīu	every morning	(not *múih go jīu)
múih máahn or máahn-máahn	every evening	(not *múih go máahn)

All these adverbs generally come before the verb:

Kéuih múih jīu luhk dím héi sān ge

(*lit.* he each morning six o'clock gets up) He gets up at six every morning

Kéuih yaht-yaht sái-tàuh

(*lit.* she daily washes hair) She washes her hair every day

Note the order in phrases such as the following describing the frequency of actions:

yāt lìhn yāt chi once a year (*lit.* one year one time) múih go yuht yāt chi once a month (*lit.* each month one time)

Such phrases are often split up with the more general term coming before the verb and the more specific frequency expression after:

Ngóhdeih yāt lìhn heui yāt chi douh-ga

(*lit.* we one year go one time spend holiday) We go on holiday once a year

Ngóhdeih lìhn-lìhn fāan heui yāt chi

(*lit.* we each year return go one time) We go back once a year

Adverbs of frequency may come after the verb and object:

Ngóh heui-gwo Daaihluhk yāt chi Ngóh gin-gwo yīsāng sāam chi I've been to mainland China once I've seen the doctor three times

Adverbs of both frequency and duration can be used in the following ways:

(i) Between the verb and the object:

Ngóh heui-gwo yāt chi Daaihluhk
Kéuih jyú-gwo géi chi faahn
Ngóh gāmyaht sái-gwo léuhng
chi tàuh
Ngóh gin-gwo sāam chi yīsāng

I've been to the mainland once
He's cooked dinner a few times
I've washed my hair twice today
I've seen the doctor three times

Kéuih duhk-jó sāam lìhn Jūngmán He has studied Chinese for three years

Ngóh diu-jó sèhng yaht yú Ngóh tái-jó vāt go jūngtàuh syū I've read for an hour Kéuih sihk-jó vāt go vuht yeuk

I've been fishing for a whole day She has been on medication for a month

(ii) After the verb and object, with repetition of the transitive verb as seen in Unit 10:

Kéuih háau-síh háau-gwo géi chi She's taken the exam several

times

Kéuih jyú-faahn jyú-gwo géi chi Ngóh duhk Jūngmán duhk-jó sāam lìhn

He's cooked dinner a few times I've been studying Chinese for three years

(or: I studied Chinese for three vears)

Kéuih jyuh vīyún jyuh-jó vāt go yuht

She's been in hospital for a month (or: She stayed in hospital for a month)

As the translations suggest, this construction can refer either to a period of time leading up to the present, or to a completed period in the past (see Unit 18 on the aspect marker -ió).

Exercise 11.1

Add a suitable adverb to the following, paying attention to the position of the adverb.

- 1 Ngóh hái Jīmsājéui
 - I was in Tsimshatsui (yesterday)
- Kéuih dou-jó gēichèuhng 2

She arrived at the airport (just now)

- 3 Ngóh gin-gwo kéuih I've met him (before)
- 4 Kéuihdeih jung-jó tàuh-jéung They won the first prize (last time)
- Ngóhdeih juhng sai 5 We were still small (then)
- Ngóh jouh wuhsih ge 6

I used to be a nurse (originally)

7 Ngóhdeih wan léih We'll contact you (next time)

- 8 Kéuih hóu lāu
 - He got angry (immediately)
- 9 **Ngóh chéng léih sihk-faahn** I'll treat you to a meal (in future)
- 10 **Ngóhdeih hái Méihgwok jyuh-gwo** We used to live in America (before)

Exercise 11.2

Say how often you engage in the following activities (fictitiously where necessary):

- 1 play tennis (dá móhngkàuh)
- 2 go swimming (heui yàuh-séui)
- 3 watch television (tái dihnsih)
- 4 read the newspaper (tái boují)
- 5 wash your hair (sái tàuh)
- 6 have a haircut (jín tàuhfaat)
- 7 buy groceries (máaih sung)
- 8 go to a concert (heui yām-ngohk-wúi)
- 9 eat ice cream (sihk syutgõu)
- 10 visit relatives (taam chānchīk)

Exercise 11.3

State how long you do the following every day:

- 1 play video games (dá gēi)
- 2 practise Cantonese (lihn Gwóngdūngwá)
- 3 talk on the phone (góng dihnwá)
- 4 cooking (jyú-faahn)
- 5 listen to music (teng yam-ngohk)
- 6 reading (tái-syū)
- 7 chat with friends (kīng-gái)
- 8 stay on the Internet (séuhng móhng)
- 9 take a shower (chūng lèuhng)
- 10 write in a diary (sé yahtgei)

Exercise 11.4

Add an adverb of duration in the space provided. Note that the following

sentences involve reduplication of the verb.

1	Kéuih hōi wúi hōi-jó	She has been in a meeting
2	Ngóhdeih sihk-faan sihk-jó	We have been having a meal
3	Kéuihdeih dá bō dá-jó	They have been playing a ball
		game
4	Ngóh sé seun sé-jó	I have been writing letters
5	Kéuih gói gyún gói-jó	She has been marking papers
6	Lohk yú lohk-jó	It's been raining
7	Kéuih cheung-gō cheung-jó	He's been singing
8	Dī hohksāang jouh gūngfo	The students have been doing
	jouh-jó	homework
9	Kéuihdeih aai-gāau aai-jó	They've been arguing
0	Kéuih jā-chē jā-jó	He's been driving

UNIT TWELVE

Comparison: gwo and dī

In this unit we look at ways of making simple comparisons. In colloquial Cantonese there are two basic kinds of comparison:

(i) Where two things are explicitly being compared, **gwo** is used to mean 'more (adjective) than (noun)'. The word order is similar to the English (and quite unlike that in Mandarin):

Jenny sai gwo ngóhJenny is younger than me

Baat láu hóu gwo vih láu

The eighth floor is better than the

second floor

Nī deui gwai gwo gó deui This pair is more expensive than

that one

Note that **gwo** is also a verb meaning 'cross' or 'pass', so it is natural that it comes to mean 'surpass' in comparisons.

(ii) If the object of comparison is not expressed (i.e. there is no 'than . . .'),dī is used instead:

Jenny sai dī Jenny is younger

Baat láu hóu dī

Gó deui gwai dī

The eighth floor is better
That pair is more expensive

dī literally means 'a little' but here serves largely to indicate a difference between the two items with respect to some property.

Modifying comparisons

Both kinds of comparison can be modified by adverbs of degree such as **hóu dō** 'much' and **síu-síu** 'a little', as follows:

(i) In comparisons with **gwo**, the adverb of degree is simply added at the end of the construction:

Léih lēk gwo kéuih hóu dōYou're much smarter than himKéuih gõu gwo léih síu-síuShe's a little taller than youNgóh daaih gwo kéuih yāt lìhnI'm a year older than her

(ii) In comparisons where **dī** would normally be used, a degree word such as **hóu dō** 'a lot' replaces **dī**:

 $N\bar{i}$ go leng d \bar{i} \rightarrow $N\bar{i}$ go leng hóu d \bar{o} This one is much nicer This one is a little more expensive $N\bar{i}$ go chúhng d \bar{i} \rightarrow $N\bar{i}$ go chúhng géi púih This one is several times heavier

The reason for this is that $d\bar{\imath}$ literally means 'a bit', so that to combine it with an adverb like $h\acute{o}u$ $d\bar{o}$ 'a lot' would be a contradiction in terms. This shows that $d\bar{\imath}$ as in leng $d\bar{\imath}$ is not really equivalent to the suffix -er in English 'prettier', tempting though the equivalence may be.

juhng 'even' can be applied to both the **gwo** and **dī** constructions, but comes *before* the adjective:

Gām chi juhng hóu gwo seuhng chi This time is even better than last time

Gám yéung juhng hóu (dī) This way is even better

(**dī** can be omitted here since the presence of **juhng** implies that a comparison is being made.)

Alternative forms of comparison

An alternative to the **gwo** form of comparison uses **béi** 'compare'. The word order is quite different since **béi** and the object of comparison come *before* the adjective:

Hahtīn béi dūngtīn chèuhng

(*lit.* summer compare winter long) Summer is longer than winter

Hēunggóng ge jáudim béi Bākgīng dō

(*lit.* Hong Kong's hotels compare Beijing more) There are more hotels in Hong Kong than Beijing A modifying phrase comes after the adjective, as with gwo:

Kéuih béi ngóh sai yāt lìhn

(*lit.* she compare me young(er) one year) She's a year younger than me

Ngóh béi ngóh lóuhpòh daaih sāam seui

(*lit.* I compare my wife big three years) I'm three years older than my wife

Being basically a feature of Mandarin and written Chinese, the comparison with **béi** is more formal than the **gwo** construction. Learners who know some Mandarin will be able to use the **béi** construction readily in Cantonese, while other beginners would do best to stick with the colloquial **gwo**. The **béi** form does allow some comparisons which would not be possible with **gwo**, such as those expressing a change of state:

Kéuih béi gauh-lín sau-jó

(*lit.* she compare last year got thinner) She's got thinner since last year

Léih béi seuhng chi jeunbouh-jó

(*lit.* you compared last time improved) You've improved since last time

Yet another alternative is to omit **gwo** but add a phrase showing the degree of difference:

Kéuih gōu yàhndeih yāt go tàuh

(*lit.* he tall people one head) He's a head taller than everyone else

Ngóhdeih faai kéuih yāt bouh

(*lit.* we fast him one step) We're a step ahead of him

This construction is commonly found with dimensional adjectives such as **daaih** and **sai**, which are often used in this way to mean 'older' and 'younger' respectively:

Léih gòhgō daaih léih géi dō a?

(*lit.* your brother big you how much?) How much older is your brother than you?

Kéuih sai ngóh yāt lìhn

(*lit.* she small me one year) She's a year younger than me

Comparison of adverbs

This involves combining the syntax of adverbs (Unit 10) with that of comparison; it thus comes for free in the sense that nothing new has to be learnt. Comparisons using **gwo**, $d\bar{\imath}$ or **béi** are added to adverbial constructions with $d\bar{\imath}$ k:

Kéuih tái dāk faai gwo ngóh

(*lit.* he read manner quick than me) He reads faster than I do

Léih sé dāk leng dī

(*lit.* you write manner nicer) You write better

Kéuihdeih béi ngóhdeih jouh dāk hóu

(*lit.* they compare us do manner well) They do it better then we do

The main difficulty arises where the verb has an object and both are repeated (Unit 10):

Kéuih tái Jūngmán tái dāk faai gwo ngóh

(*lit.* he reads Chinese reads manner quick than me) He reads Chinese more quickly than I do

Léih sé jih sé dāk leng dī

(*lit.* you write characters write manner nicer) You write characters better

Kéuihdeih jouh sāangyi béi ngóhdeih jouh dāk hóu

(*lit.* they do business compare us do manner well) They do business better then we do

Superlatives

Superlatives are expressed straightforwardly by **jeui**, or as a colloquial alternative by **ji**:

jeui leng	most beautiful	ji lēk	the smartest
jeui fōngbihn	most convenient	ji pèhng	the cheapest
jeui hīngfáhn	most excited	ji jeng	the best, coolest (slang)

These forms are typically used as follows:

(i) Attributively, with ge:

jeui fōngbihn ge jouhfaat	the most convenient method
jeui gányiu ge sīusīk	the most important news
ji pèhng ge gēipiu	the cheapest air tickets

(ii) Predicatively, with haih:

Gám yéuhng jeui fōngbihn	This way is the most convenient
Nī júng ji dái máaih	This kind is the best value

The order is often reversed beginning with the superlative expression as the subject:

Jeui fōngbihn haih nī go deihdím

(*lit.* most convenient is this location) This location is most convenient

Ji pèhng haih nī jek pàaihjí

(*lit.* most cheap is this brand) This brand is the cheapest

A point to note here is that the range in which the comparison is to be made is specified *before* the superlative form:

Hēunggóng jeui chēutméng ge gōsáu

(lit. Hong Kong most famous singer)
The most famous singer in Hong Kong

Chyùhn gwok jeui daaih ge ngàhnhòhng

(*lit.* whole country most big bank)
The biggest bank in the whole country

Gam dō jáulàuh jeui hóu-sihk haih nī gāan

(*lit.* so many restaurants most good-to-eat is this one) This is the best of all the restaurants to eat at

This ordering illustrates a general tendency in Cantonese to put the more general, inclusive term before the more specific one.

Exercise 12.1

Decide whether the following comparisons would use **gwo** or **dī**, and translate as much of the sentence as you can into Cantonese:

- 1 It's warmer today
- 2 She's happier now
- 3 My friend is older than me
- 4 She's much taller than before
- 5 It's slower this time
- 6 This restaurant is cheaper than that one
- 7 I like dancing more than singing
- 8 Your idea is better

Exercise 12.2

Make any meaningful comparison between the following:

- 1 Today (gāmyaht) and yesterday (kàhmyaht)
- 2 Girls (léuihjái) and boys (làahmjái)
- 3 Shirts (sēutsāam) and ties (léngtāai)
- 4 Toronto (**Dōlèuhndō**) and London (**Lèuhndēun**)
- 5 Chinese (Jüngmán) and English (Yīngmán)
- 6 Swimming (yàuh-séui) and jogging (páau-bouh)
- 7 Cantonese food (**Gwóngdūng choi**) and Chiu Chow food (**Chìuhjāu choi**)
- 8 Doing business (jouh sāangyi) and teaching (gaau-syū)

Exercise 12.3

Make the following comparisons more explicit using the adverb given in brackets:

- 1 **Gām-lín dung gwo gauh-lín**This year is (much) colder than last year
- 2 **Gāmyaht lyúhn dī** It's (much) warmer today

3 Léih dī tàuhfaat yìhgā dyún dī

Your hair is (a little) shorter now

4 Hēunggóng gwai gwo nīdouh

Hong Kong is (several times) more expensive than here

5 Ngóh guih gwo kéuih

I'm (even) more tired than she is

6 Sihk faahn pèhng gwo sihk mihn

Eating rice is (even) cheaper than eating noodles

7 Gām chi hohkfai béi seuhng chi gwai

This time the tuition is (a hundred dollars) more expensive than last time

8 Kéuih gōu gwo ngóh

She is (three inches) taller than me

† Exercise 12.4

A Express the following comparisons colloquially with gwo:

The train is faster than the bus

1 Hói-yú béi yéuhng-yú gwai

Wild fish are more expensive than farmed fish

2 Hēungpín béi hùhng chàh hēung

Jasmine tea is more fragrant than black tea

3 Làahnfā béi gūkfā leng

Orchids are prettier than chrysanthemums

4 Go léui béi go jái daaih léuhng seui

The daughter is two years older than the son

5 Nī bāan hohksāang béi go bāan kàhnlihk

This class is more hard-working than that one

B Express the following comparisons with béi:

1 Gauh hàaih syūfuhk gwo sān hàaih

Old shoes are more comfortable than new ones

2 Yìhgā heui Oujāu yùhngyih gwo yíhchìhn

Going to Australia now is easier than before

3 Güngsī gām-lín jaahn dāk dō gwo gauh-lín

The company has earned more this year than last year

4 **Nī bún síusyut hóu-tái gwo daih yāt bún** This novel is better than the first one

5 Léih gām chi jouh dāk hóu gwo seuhng chi

This time you're doing better than last time

UNIT THIRTEEN

Prepositions: space and time

Three important classes of words are involved in the expression of location. We shall introduce these before showing how they are used in combination.

1 Prepositions

hái	at/in/on (also héung)	yàuh	(starting) from
heung	towards	lèih	(away) from
tùhng	with	gīng	(passing) via

Some of these items are also known as coverbs, since they have certain characteristics of verbs (see *Intermediate Cantonese*).

2 Demonstrative terms, based on nī 'this' and gó 'that'

nīdouh here (also nīsyu)	gódouh	there (also gósyu)
nībihn over here, this way	góbihn	over there, that way
nītàuh around here (in this area)	gótàuh a	around there (in that area)

3 Localizers or postpositions indicating spatial relationships

seuhngbihn	on top of	hahbihn	below
chìhnbihn	in front of	hauhbihn	behind
yahpbihn	inside	chēutbihn	outside
léuihmihn	inside, within	ngoihbihn	outside
deuimihn	opposite	jākbīn	beside
jūnggāan	in the middle of	jīgāan	between

Note how these characteristically end in **bihn or mihn** meaning 'side' (the two forms being interchangeable in most cases).

Location

Using the words introduced above, several characteristic patterns are used to indicate location in space:

(i) **hái** followed by names of places:

Dī sailouhjái hái gódouh Kéuihdeih lēi màaih hái nīsvu **Ngóh gāmyaht sèhng yaht hái ūkkéi** I was at home all day today Kéuih hái Méihgwok duhk-svū Ngóhdeih hái hohkhaauh hōi-wúi

Kéuih yìhgā mh hái gūngsī

The children are over there They are hiding here She studies in America We're having a meeting at school

She is not at the office at the moment

Note that the word **háidouh** 'to be here' is generally used instead of **hái nīdouh** when presence or absence is at issue. For example, on the telephone:

Léih sāang mh háidouh (not * Léih sāang mìh hái nīdouh) Mr Lee is not here

háidouh is also used to express action in progress (progressive aspect: Unit 19).

(ii) **hái** together with a localizer:

Yīsāng hái seuhngbihn

The doctor is upstairs

Heiyún hái deuimihn

The cinema is just opposite (across

the street)

Gíngchaat hái yahpbihn

The police are inside

A noun phrase can come between **hái** and the localizer, in the pattern hái (...) X-mihn/bihn:

Bún syū hái jēung tói seuhngbihn

(*lit.* the book on the table top) The book is on the table

Kéuih kéih hái pō syuh hauhmihn

(*lit.* she stood at the tree behind) She stood behind the tree

Ngóh jyuh hái kéuih ūkkéi deuimihn

(*lit.* I live at her home opposite) I live opposite her (home)

douh 'there' serves colloquially as a localizer in this pattern:

A-Mā hái tēng douh Mum's in the living room

Dī séung hái ngóh douh The pictures are with me/at my place

While this pattern with two separate expressions of location may appear redundant, note that **douh** (or another localizer in its place) is required here:

Kéuihdeih hái ga chē douh They're in the car (not * Kéuihdeih hái ga che)

Dī jīlíu hái dihnlóuh douh The data are in the computer (not * **Dī jīlíu hái dihnlóuh**)

With jīgāan 'between', tùhng is used to join the two noun phrases concerned, in the pattern X tùhng Y jīgāan:

Ngóh tùhng kéuih jīgāan móuh saai gámchìhng

(*lit.* I and him between haven't all feeling) There's no feeling left between us

Chìhnggám tùhng léihji jīgāan hóu làahn syúnjaahk

(*lit.* emotion and rationality between very hard to choose) It's difficult to choose between emotion and rationality

(iii) A demonstrative form or localizer followed by the existential **yáuh** (or its negative counterpart **móuh**: Unit 6) or another verb:

Nīdouh yáuh hóu dō sailouhjái There're many children here Gódouh móuh yàuh-wihng-chìh Yahpbihn yáuh hóu dō yéh Hahbihn móuh chā antēng Chēutbihn lohk-gán yúh There're many children here There's no swimming pool there There are lots of things inside Downstairs there's no restaurant It's raining outside

Again a noun phrase can be added before the localizer:

Daaihhohk léuihmihn yáuh sāam go tòuh-syū-gwún

There are three libraries in the university

Gāan fóng jūnggāan yáuh go gongkàhm

There's a piano in the middle of the room

Movement and direction

Movement towards a point in space may be expressed by heung:

Léih yīnggōi heung nībihn hàahng You should walk this way (or Léih yīnggōi hàahng nībihn)

Mhóu heung góbihn mohng Don't look in that direction (or Mhóu mohng góbihn)

To express a starting point in time or space, yàuh is used as follows:

Ngóh gāmyaht yàuh baat dím hōichí séuhng-tóhng

(*lit.* I today from eight o'clock beginning attended lessons) Today I had classes from eight o'clock onwards

Yàuh Tòihwāan làih Hēunggóng yiu yāt go jūngtàuh fēigēi (*lit* from Taiwan coming to Hong Kong needs one hour's plane) It's an hour's flight from Taiwan to Hong Kong

Yàuh nīdouh heui Syutlèih géi yúhn a?

(*lit*. from here go to Sydney how far) How far is it from here to Sydney?

Note that the prepositional phrase comes before the verb.

yàuh is also used together with **dou** indicating the end point of a journey in time or space:

Ngóhdeih yàuh gām jīu dáng dou yìhgā

We've been waiting from this morning till now

Yàuh daaihhohk dou ūkkéi yiu bun go jūng

It takes half an hour to get from the university to home

Kéuih yàuh sai dou daaih dōu haih gám ge

He's always been like this (lit. from small to big)

gīng 'via' introduces an intermediate step between the starting point and end point:

Ngóhdeih gīng Dūnggīng heui Sāam Fàahn Síh

(lit. we pass Tokyo go to San Francisco) We're going to San Francisco via Tokyo

Léih hóyíh yàuh Hēunggóng dóu gīng seuihdouh dou ūkkéi

(lit. you can from Hong Kong island pass the tunnel arrive home) You can go home from Hong Kong island via the tunnel

Reflecting the intermediate step in a journey, the phrase with **gīng** 'via' typically comes in the middle of the sentence, before the destination.

lèih is used to indicate distance from a location:

Yīyún lèih nīdouh géi yúhn a?

(lit. hospital from here how far) How far is the hospital from here?

Ngóh ūkkéi lèih gēichèuhng yihsahp fānjūng

(lit. my home from the airport twenty minutes) My home is twenty minutes from the airport

Note that a verb is not needed here

Exercise 13.1

Express the location for each of the following using hái and a localizer in the spaces:

Example: Dī fā hái fājēun yahpbihn The flowers are inside the vase

1	Hohksāang	fóng	The students are inside the room
2	Jek māau	tói	The cat is on the table
3	Go jámtàuh	chòhng	The pillow is on the bed
4	Jī bāt háp)	The pen is inside the box
5	Bún syū c	lang	The book is under the chair
6	Go jūng c	hèuhng	The clock is on the wall
7	Bá jē mùl	nn	The umbrella is behind the door
8	Dī séung	séungbóu	The photos are inside the photo
			album
9	Pō syuh	gāan ūk	The tree is in front of the house
0	DihnsihgeI	_ syūgwaih	The television is beside the book-
			case

Exercise 13.2

Express the following in Cantonese:

- 1 behind the wall (chèuhng)
- 2 on top of the bookcase (syūgwaih)
- 3 opposite the bank (ngàhnhòhng)
- 4 in the middle of the road (máhlouh)
- 5 between the park (gūngyún) and the petrol station (vàuh jaahm)
- 6 sitting (chóh) beside you
- 7 inside the box (háp)
- 8 outside the classroom (bāanfóng)
- 9 in front of the mirror (geng)
- 10 below the table (tói)
- 11 towards this direction (fongheung)
- 12 from morning (iīu) to evening (máahn)

Exercise 13.3

Say what there is at the following locations in your home:

I	On the table: toi seuhngmihn
2	On the wall: chèuhng seuhngmihn
3	In the kitchen: chyùhfóng yahpbihn
4	Inside the living room: haak-tēng léuihmihn
5	In the closet: yīgwaih yahpbihn
6	Under the bed: chòhng hahmihn
7	Under the chair: dang hahbihn
8	On the bookcase: syūgwaih seuhngmihn
9	In the bathroom: sáisáu-gāan yahpbihn
0	In the study: syūfóng yahpbihn

Exercise 13.4

1

Describe the following journeys:

Example: from home to school: yàuh ūkkéi heui hohkhaauh

- 1 from here to the hospital (yīyún)
- 2 from the library (tòuh-syū-gwún) to the canteen (faahn-tòhng)
- 3 from the ground floor (deih-há) to the eighth floor (baat láu)
- 4 towards Kowloon (Gáulùhng)

- 5 to Tokyo (**Dūnggīng**) via Taipei (**Tòihbāk**)
- 6 from Hong Kong to London (**Lèuhndēun**) via Bangkok (**Maahn-gūk**)
- 7 from the study (syūfóng) to the kitchen (chyùhfóng)
- 8 from the first time (daih yāt chi) until now (yìhgā)
- 9 from the airport (gēichèuhng) to home (ūkkéi)
- 10 from the beginning (tàuh) to the end (méih)

UNIT FOURTEEN

Negation

To express negation, Cantonese uses negative words that all begin with the nasal consonant **m** and have low-register tones:

used with: negative word

mìh not adjectives, verbs referring to the present nouns, verbs referring to the past móuh have not

meih verbs not vet mhaih is not sentences

antonyms of adjectives and verbs mıın-

mh is used to negate:

(i) Most adjectives:

Nī gihn sāam mh pèhng ga This shirt is not cheap Dī iih mh chīngchó The writing is not clear Ngóh gīngyihm mh gau My experience is not sufficient

(lit. enough)

(ii) Verbs referring to the present:

Ngóh gāmyaht mh fāan-hohk I'm not going to school today Kéuihdeih mh sāu yihn-gām They do not accept cash Güngsī jaahmsìh mh chéng yahn The company is not hiring

anyone right now

móuh is the negative form of **yáuh** (Unit 6), used in two main ways:

(i) As a main verb:

Kéuih móuh làahm-pàhngyáuh ge She doesn't have a boyfriend

Ngóhdeih yìhgā móuh gūngyàhn We don't have a (domestic)

helper now

Ngóh móuh leng sāam jeuk

I have no nice clothes to wear

(ii) As an auxiliary verb:

Ngóh gāmyaht móuh gin dóu I haven't seen her today

kéuih a

Kéuih móuh làin hōi-wúiHe didn't come to the meeting

Kéuihdeih móuh tūngiī ngóhdeih They didn't inform us

móuh used in this way serves as the negative counterpart to **jó** (Unit 18), as can be seen in pairs like the following:

a **Ngóh kàhmyaht máaih-jó choi**b **Ngóh kàhmyaht móuh máaih**I bought vegetables yesterday
I didn't buy (any) vegetables

choi yesterday

a **Gūngsī chéng-jó kéuih**b **Gūngsī móuh chéng kéuih**The company has hired him
The company has not hired him

meih as an auxiliary has the specific meaning 'not yet':

Ngóhdeih juhng meih būn ūkWe haven't moved house yetLóuhbáan meih fāan làihThe boss hasn't come in yetJaahmsìh meih yáuh sīusīkSo far there hasn't been any news

Attached to the end of a statement, **meih** makes a special form of question, typically with **jó** or **gwo** (see Unit 18):

Léih jouh-jó güngfo meih a?

Have you done your homework (yet)?

Léih heui-gwo Hóiyèuhng Gūngyún meih a?

Have you ever been to Ocean Park?

mhaih 'it's not' is the negative form of the verb **haih** 'to be'. It is used in negating adjectives modified by an adverb (see Unit 9):

mhaih hóu leng not very pretty mhaih géi gūngpìhng not quite fair

Ngóhdeih mhaih gam suhk We're not that familiar (with each other)

Antonyms formed with negation

Antonyms of many adjectives (and some verbs) can be formed by adding a prefix **m**-:

hōisām	happy	\rightarrow	mhōisām	unhappy
chīngchó	clear	\rightarrow	mchīngchó	unclear
gūngpìhng	fair	\rightarrow	mgūngpìhng	unfair
tùhngyi	agree	\rightarrow	mtùhngyi	disagree

Some of these negative forms carry a meaning related to that of the underlying verb or adjective, but not simply its opposite:

gin	see	\rightarrow	mgin	lose
geidāk	remember	\rightarrow	mgeidāk	forget
tùhng	same	\rightarrow	mtùhng	different
dākhàahn	at leisure	\rightarrow	mdākhàahn	busy
syūfuhk	comfortable	\rightarrow	msyūfuhk	unwell, sick

All such antonyms can be modified by **hóu** or other adverbs:

Kéuih hóu mjūngyi léih ge tàihyíh

She really dislikes your proposal

Gám yéung deui ngóh taai mgūngpìhng

(lit. this way towards me too unfair)

This is too unfair to me

A few such words exist in the negative form, i.e. they are inherently negative; without the prefix \mathbf{m} -, they do not occur in an affirmative statement:

mhóuyisi embarrassed
mfahnhei discontented

Kéuih gokdāk hóu mhóuyisi She feels very embarrassed
(but not *Kéuih gokdāk hóu hóuyisi)

Ngóh gokdāk hóu mfahnhei I feel very discontented
(but not *Ngóh gokdāk hóu fahnhei)

Double negatives

Combinations of two negative forms are widely used to give a qualified or indirect positive meaning. A typical case is to use **mhaih** to deny a negative statement:

Ngóh mhaih mh seun léih Mhaih mhólàhng ge

It's not that I don't believe you It's not impossible Ngóhdeih mhaih móuh hēimohng We're not without hope (i.e. we still have a chance)

Another case involves negating both the main verb and an auxiliary (see Unit 20):

Kéuih mh wúih mh fāan làih Gám yéung mh wúih mgūngpìhng That would not be unfair Léih mh hóyíh mh béi chín

He won't fail to come back You cannot choose not to pay (i.e. you have to pay)

Exercise 14.1

Put these statements in the negative by using **mouh or mhaih:**

- 1 Kéuih ūkkéi yáuh mahntàih His family has problems
- 2 Ngóhdeih hóu guih We're very tired
- 3 Ngóh sīng-jó-jīk I got promoted
- 4 Kéuih gihn sāam hóu gwai Her dress is very expensive
- 5 Ngóh tàuhsīn sihk-jó yeuhk I have taken the medicine just now
- 6 Yīsāng heui-jó douh-ga The doctor has gone on holiday
- 7 Lóuhbáan hóu lāu The boss is very angry
- 8 Dī hohksāang yáuh séuhng-móhng The students have got on the Internet
- 9 Dī hohksāang hóu kàhnlihk The students are very diligent
- 10 Gó tou hei taai chèuhng That film is too long

Exercise 14.2

Show your disagreement with the following negative statements by providing the affirmative counterparts:

Example: Léih móuh sìhgaan You have no time → Ngóh yáuh sìhgaan (a) I do have time (the particle a serves to soften the force of the disagreement, see Unit 25)

1 Sihk hóisīn mh gwai

Eating seafood is not expensive

- 2 **Wòhng Sāang mh chéng kéuih** Mr Wong is not hiring her
- 3 **Léih móuh duhk-gwo Faatmán** You haven't studied French
- 4 **Kéuihdeih meih git-fān** They're not married
- 5 **Léih móuh bou-méng** You haven't applied
- 6 **Dī háausìh tàihmuhk mhaih hóu làahn** The exam questions are not very hard
- 7 **Gāan fóng mh gōnjehng** The room is not tidy
- 8 **Kéuih yìhgā mdākhàahn** He's busy now
- 9 **Gāmyaht móuh tòhng**There are no lessons today
- 10 **Ngóhdeih meih sihk-gwo sèh-gāng** We've never eaten snake soup

Exercise 14.3

Create antonyms based on the following adjectives and verbs, translate and pronounce them:

1	sānsīn	fresh	6 jūngyi	like
2	síusām	careful	7 mìhngbaahk	understand
3	hóuchói	lucky	8 tùhngyi	agree
4	gōuhing	glad	9 yānséung	appreciate
5	gihnhōng	healthy	10 làuhsām	attentive

† Exercise 14.4

A Create a double negative based on the sentence provided:

Example: Ngóh mh séung heui I don't want to go → Ngóh mhaih mh séung heui

1 Kéuih móuh seunsām
 2 Kéuih góng ge yéh móuh douhléih
 3 Léih gājē mh wúih bōng léih
 4 Ngóhdeih mh gau chín
 5 She lacks confidence
 6 What he says is unreasonable
 7 Your sister won't help you
 8 We don't have enough money

5 Léih gāmyaht mdākhàahn You're busy today

B Use a double negative to express the following indirectly:

Example: **Léih yātdihng yiu seun kéuih** You must believe him → **Léih mh hóyíh mh seun kéuih**

1 Ngóhdeih tùhngyi2 Ngóhdeih yiu jáuWe agreeWe must leave

3 Gungsī háng gā yàhn-gung The company is willing to raise salaries

4 Ngóh wúih geidāk I'll remember 5 Léih máaih dāk héi You can afford it

UNIT FIFTEEN

Verbs of motion: heui and làih

The verbs heui 'go' and làih (or lèih) 'come' are used as follows:

(i) By themselves as main verbs:

Ngóhdeih yātchàih heui lā Let's go together

Kéuih tīngyaht mh làih la She's not coming tomorrow

Both can be followed directly by a place name or other expression of the destination, without a preposition as in English:

Ngóh yāt-yuht heui Méihgwok I'm going to America in January **Ngóhdeih yìhgā heui fóchējaahm** We're going to the railway station now

Kéuihdeih mh làih Yīnggwok They're not coming to England **Léih géisìh làih ngóh ūkkéi a?** When are you coming to my place?

They can also take a verb phrase to show the purpose of the journey:

heui (gwóng-chèuhng) yám-chàh Go (to the shopping centre) for dim sum (*lit.* to drink tea) làih (nīdouh) tái hei Come (here) to see a film

(ii) Together with directional verbs:

yahp heui	go in	yahp làih	come in
chēut heui	go out	chēut làih	come out
séuhng heui	go up	séuhng làih	come up
lohk heui	go down	lohk làih	come down
gwo heui	go over	gwo làih	come over
fāan heui	go back	fāan làih	come back

These combinations are used in the same way as the simple verbs, for example:

Ngóh séuhng heui Bākgīng hōi-wúi

(*lit.* I ascend go Beijing hold meeting) I'm going up to Beijing for a meeting

Ngóhdeih lohk heui sihk-faahn lā

(*lit.* we descend go eat rice) Let's go down and eat

Léih géisìh gwo làih taam ngóh a?

(*lit.* you when over come visit me) When are you coming over to visit me?

A third verb may be added before the directional verb to express the manner of movement, resulting in a sequence of three verbs: (manner – direction – come/go):

fēi yahp làih	fly in	fēi chēut heui	fly out
dit lohk làih	come falling down	dit lohk heui	go falling down
tiu séuhng làih	jump up (here)	tiu séuhng heui	jump up (there)
hàahng fāan làih	walk back (here)	hàahng gwo heui	walk over
			(there)

When used with a transitive verb, the directional verb and **heui/làih** follow the object:

Ngóhdeih séung daai dī sān tùhngsih yahp làih

(*lit.* we wish to bring some new colleagues in come) We'd like to bring in some new colleagues

Ngóh līng dī hàhngléih séuhng làih sīn

(*lit*. I carry the luggage up come first) I'll bring the luggage up first

Mgōi léih daih dī sung gwo làih

(*lit.* please you pass the food over come) Could you pass the dishes over, please

Aspect markers like **jó** and **gán** (Units 18–19) appear after the first verb of the sequence:

Kéuihdeih chēut-jó heui hóu loih la They've been out for a long time

Lóuhbáan fāan-gán làih ge la The boss is on his way (*lit.*

coming) back

Jek jeukjái fei-jó yahp làih The bird has flown into the

chyùhfóng kitchen

Dī séui làuh-gán lohk heui hahmihn The water is flowing downwards

These sequences of verbs are known as serial verb constructions. One such pattern, using both **làih** and **heui**, uses four verbs in a row:

hàahng làih hàahng heuiwalk to and frofei làih fei heuifly back and forthlám làih lám heuithink it over and oversi làih si heuitry and try again

Directional verbs are also used as verbs in their own right, with a place expression as their object. This pattern includes a number of useful set phrases:

séuhng/Iohk chē get on/off a car, bus, etc.

séuhng/Iohk sāan go up/down a hill

yahp/chēut gíng enter/leave a country (at the border)

yahp/chēut yún enter/leave hospital gwo máhlouh cross the road

gwo hói cross the sea, harbour, etc.

fāan ūkkéi return home

fāan gūng go (*lit.* return) to work

Exercise 15.1

Expand the sentence given by adding a directional verb:

Example: **heui Hēunggóng** go to Hong Kong → **gwo heui Hēunggóng** go over to Hong Kong/**fāan heui Hēunggóng** go back to Hong Kong

1 Làih ngóh ūkkéi come to my place 2 Heui hohkhaauh go to school 3 Heui làuhseuhng go upstairs 4 Làih Yīnggwok come to England

5 **Heui séjihlàuh** go to the office

6 Làih tái-háh come and take a look 7 Làih taam ngóhdeih come to visit us

8 **Heui hōi-wúi** go to a meeting

9 **Làih sihk-faahn** come and eat 10 **Heui jouh-yéh** go to work

Exercise 15.2

Add a suitable object to the verb sequences given to show the destination:

1	Ngóh tīngyaht heui	I'm going tomorrow
2	Léih làih sihk-faahn	Come to eat
3	Ngóh gwo heui wán yàhn	I'm going over to look for someone
4	Léih dākhàahn séuhng làih	Come up for a visit (lit. to sit)
	chóh	when you're free
5	Ngóhdeih yiu fēi fāan heui	We have to fly back
6	Go léuihjái jáu chēut heui	The girl ran out
7	Ngóh dī chānchīk fāan làih	My relatives are coming back for a
	douh-ga	holiday
8	Léih hóyīh lohk heui	You can go down to do some
	máaih yéh	shopping
9	Ngóh jīkhāak yahp heui	I'm going in to change right away
	wuhn sāam	
10	Ngóh tùhngsih gwo làih	My colleague is coming over to
	kīng-gái	chat

Exercise 15.3

Fill in the blanks according to the translation:

1		Gáulùhng	Go over to Kowloon
2		ngóh gāan fóng	Come into my room
3		Hēunggóng	Come down to Hong Kong (e.g
			from mainland China)
4		Bākgīng	Go up to Beijing
5		haak-tēng	Go out to the living room
6		ūkkéi	Come back home
7	Yàuh sahp	láu dit	Fall down from the tenth floor
8	Tiu	ga fóchē	Jump onto the train
9	Hàahng	syūfóng	Walk into the study
10	Fēi	Oujāu	Fly back to Australia

[†] Exercise 15.4

Add an aspect marker (**jó** or **gán**: see Units 18–19) in the appropriate place according to the English translation:

1	Ga fochē fāan làih	The lorry is coming back
2	Dī seun gei heui Méihgwok	The letters have been sent to the United States
3	Dī gúpiu sīng séuhng heui gōu wái	The shares have risen to a high
4	Kéuih hái fóng hàahng chēut làih	He's coming out of his room
5	Kéuihdeih pàh séuhng làih sāandéng	They're climbing up the top of the mountain
6	Bún syū dit lohk heui deihhá	The book has fallen down onto the floor
7	Go kàhm būn gwo heui deuimihn	The piano has been moved to the opposite side
8	Ga chē hōi yahp làih tìhng-chē- chèuhng	The car is driving into the car park
9	Kéuih hàahng chēut heui gāai douh	She's walking out onto the street
10	Kéuihdeih būn lohk heui yih láu	They're moving down to the second floor

UNIT SIXTEEN

Verbs of giving: béi

béi is an important verb used both on its own as a verb meaning 'give' and together with other verbs of giving. The verb **béi** takes two objects, the direct object (representing what is given) followed by the indirect object (representing the person to whom something is given):

Kéuih béi-jó yāt baak mān ngóh

(*lit.* she gave one hundred dollars me) She gave me a hundred dollars

Ngóh béi-jó tìuh sósìh ngóh taaitáai

(lit. I gave the key my wife) I gave my wife the key

Béi gān choi ngóh ā

(*lit.* give catty vegetables me) Give me a catty of vegetables, please

Léih béi dī mín kéuih lā!

(*lit.* you give some face (to) her) Show her some respect!

Note that the order of the two objects here is the reverse of that in English as well as that in Mandarin

With other verbs of giving such as **gei** 'send' and **wàahn** 'return', **béi** 'to' is used to introduce the indirect object:

Ngóh pàhngyáuh gei-jó jēung kāat béi ngóh

My friend sent me a card

Ngóh yíhgīng wàahn-jó chín béi léih

I've already returned the money to you

Kéuih lóuhgūng làuh-jó gāan ūk béi kéuih

Her husband left her the house

Yáuh go yáuh-chín-lóu gyūn-jó hóu dō chín béi daaih-hohk

A rich man donated a lot of money to the university

Note here the verb **sung** which is used in this pattern to mean 'give' in the sense of giving presents:

Dī tùhngsih sung-jó dī fā béi kéuih

Her colleagues sent her some flowers

Kéuih lìhn-lìhn sung sāangyaht láihmaht béi ngóh go jái

She gives my son a birthday present every year

Nī jek gaaijí sung béi léih ge!

This ring is (a present) for you

A third verb may be added to the construction to indicate the purpose for which the object will be used:

Kéuih wúih gei dī màhn-gín béi léih chīm-méng

She will send the documents for you to sign

Go hohksāang chyùhnjān-jó pīn màhnjēung béi ngóh tái

The student faxed an article for me to read

Kéuih yiu jyú-faahn béi ūkkéi-yàhn sihk

She has to cook for her family (to eat)

béi and permission

béi can also indicate permission (allowing, letting someone do something):

Lóuhsī béi ngóhdeih jóu dī jáu Ngóh béi léih yuhng ngóh go dihnlóuh I'll let you use my computer Mhóu béi vàhn jī a

The teacher let us leave early Don't let anyone know

Other verbs with two objects

A number of other verbs can take two objects, such as gaau (teach), mahn (ask). Here the word order is different, with the indirect object coming first:

Kéuih gaau-gwo hóu dō yàhn gongkàhm

She has taught a lot of people the piano

Ngóh jūngyi mahn hohksāang mahntàih

I like to ask students questions

A similar pattern appears with verbs of deprivation such as **faht** (fine) and tāu (steal) or chéung (rob):

Güngsī faht ngóhdeih géi baak mān

The company fined us a few hundred dollars

Ngóh yèhng-jó kéuih hóu dō chín

I won a lot of money from him

Yáuh go cháak tāu-jó ngóh sāam bún syū

A thief has stolen three books from me

Kàhm máahn yáuh yàhn chéung kéuih yéh

Last night someone robbed things from him

The verb je when used in this pattern can be ambiguous, meaning either 'lend' or 'borrow' according to the context:

Ngóh je-jó kéuih yāt baak mān

I borrowed \$100 from him

or I lent him \$100

Ngóh gājē je-jó ngóh géi tìuh kwàhn

My sister has borrowed a few dresses from me

or My sister has lent me a few dresses

To make the meaning clear, the preposition **tùhng** or **heung** can be used to mean 'borrow from':

Ngóh tùhng kéuih jē-jó yāt baak mān I borrowed \$100 from him or Ngóh heung kéuih jē-jó yāt baak mān

By contrast, using **béi** to introduce the indirect object gives the meaning 'lend'.

Ngóh je-jó vāt baak mān béi kéuih Ngóh gājē je-jó géi tìuh kwàhn béi ngóh My sister has lent me a

I lent him \$100 few dresses

Exercise 16.1

Add an indirect object to show who the object is given to:

1	Ngóh yiu béi chín	I have to pay (money)
2	Léih yiu wàahn syū	You need to return some books
3	Ngóh séung sung láihmaht	I want to give a present
4	Ngóh heui gei seun	I'm going to send a letter
5	Faai dī dá-dihnwá	Hurry up and call (telephone)
6	Léih tīngyaht gāau gūngfo	Hand in your homework tomorrow
7	Mgōi léih làuh sung	Please leave some food (for someone to eat)
8	Ngóh sèhngyaht máaih sāam	I'm always buying clothes (for some- one to wear)
9	Ngóh hóyíh gáan tou hei	I can pick a film (for someone to watch)
10	Ngóh séung dím gō	I'd like to request a song (for someone to listen to)

Exercise 16.2

Translate the following sentences using appropriate verbs of giving:

- 1 He gave me some perfume (dī hēungséui)
- 2 The doctor (yīsāng) gave me some medicine (dī yeuhk)
- 3 I'm going to return the documents (dī màhn-gín) to you
- 4 The boss (lóuhbáan) donated a lot of money to the church (gaauwúi)
- 5 He sent his family (ūkkéi-yàhn) a letter (fūng seun)
- 6 I lent him a pencil (jī yùhnbāt)
- 7 Please give him face (respect: **mín**)
- 8 You must give me back the key (tìuh sósìh)
- 9 He wants to borrow two books (léuhng bún syū) from me
- 10 The lecturer (go góngsī) gave us some homework (gūngfo) to do

Exercise 16.3

Add an indirect object to show the recipient of the action:

Example: Ngóh sīk gaau gongkàhm I know how to teach the piano → Ngóh sīk gaau daaih-yàhn gongkàhm I know how to teach adults the piano

1 Ngóhdeih juhng yiu béi chín We still have to pay (money) 2 Ngóh gājē je-jó hóu dō sāam My sister lent a lot of clothes 3 Gó go yàhn sèhngyaht tāu yéh That person is always stealing things 4 Yáuh yàhn chéung-jó hóu dō chín Somebody has stolen a lot of money 5 Ngóh heui je géi bún syū I'm going to borrow a few books 6 Kéuih séung mahn géi yeuhng yéh She wants to ask a few things 7 Ngóh go pàhngyáuh gaau Yīngmán My friend teaches English 8 Jingfú wúih faht chín ge The government will impose a fine

UNIT SEVENTEEN

Verbs and particles

The Cantonese verb combines with a rich, versatile set of particles (also known as verbal complements). The resulting combinations often resemble those known as verb-particle constructions (or phrasal verbs) in English, as in the following cases:

tiu héi	jump up	tiu gwo	jump over
báai dāi	put down	báai fāan	put back

The particles may indicate the state of an object as the result of an action, or different phases of an action (beginning, continuing or ending). According to the functions they serve, they can be divided into the following categories:

1 Directional particles, indicating the direction of movement or action:

yahp	in	máaih	buy	+ yahp	→ máaih yahp	buy in,
chēut	out	gei	send	+ chēut	→ gei chēut	acquire send out
héi	up	gwa	hang	+ héi	→ gwa héi	hang up
						(clothes, etc.)
dāi	down	fong	put	+ dāi	→ fong dāi	put down
fāan	back	ló	bring	+ fāan	→ ló fāan	bring back
gwo	over, past	gīng	pass	$+gw_0$	\rightarrow gīng gwo	pass by
hōi	away	hàahng	walk	+ hōi	→ hàahng hōi	walk away,
						step out
màaih	closer	hàahng	walk	+ màaih	ightarrow hàahng màail	come closer

Note that some of these items (yahp, chēut, fāan and gwo) are the same as the directional verbs introduced in Unit 15. The meaning of the combinations is often predictable, as in the above examples, but it can also be figurative or quite idiomatic as in the following cases:

héi	up	Lóuhbáan hóu tái héi kéuih The boss has a high opinion of him Ngóh juhng meih jouh héi gūngfo I haven't finished my homework
fāan	back	Kéuih yìhgā jouh fāan gíngchaat He's gone back to being a policeman Ngóh séung máaih fāan dī leng sāam I want to buy myself some nice clothes
gwo	over	Léih jeui hóu sé gwo pīn mán You'd better rewrite (write over) the essay Ngóh hah chi sīn tùhng léih wáan gwo I'll play with you again next time

2 Resultative particles, describing the extent or consequences of an action:

báau	full up	sihk	eat + báau
		\rightarrow sihk báau	eat one's full share
cho	wrongly	gáan	choose + cho
		\rightarrow gáan cho	make the wrong choice
dihm	conclusively	gáau	manage + dihm
		→ gáau dihm	deal with
dihng	ready	lám	think + dihng
~	•	\rightarrow lám dihng	think in advance
dóu	accomplish	sāu	collect + dóu
	•	→ sāu dóu	receive
dou	arrive	heui	go + dou
		\rightarrow heui dou	arrive
hóu	complete	jouh	do + hóu
	_	→ jouh hóu	finish up (doing)
jihng	remain	sihk	eat + jihng
•		\rightarrow sihk jihng	leave behind (after eating)
mìhng	clear	sé	write + mìhng
-		→ sé mìhng	put in writing
séi	to death	muhn	bored + séi
		\rightarrow muhn séi	(be) bore(d) to death
sèhng	succeed	jouh	do + sèhng
		\rightarrow jouh sèhng	complete (a deal, etc.)
waaih	bad, broken	gaau	teach + waaih
		ightarrow gaau waaih	lead astray
yùhn	to the end	tái	read + yùhn
		→ tái yùhn	finish reading

Verbs of perception

An important sub-type of verb + particle construction involves verbs of perception. In these combinations, a verb denoting some mode of perception combines with the particle **dóu** to indicate successful perception of an object:

tēng	listen	\rightarrow	tēng dóu	hear
tái	look, watch, read	\rightarrow	tái dóu	see
gin	see, meet	\rightarrow	gin dóu	see, notice
wán	seek, look for	\rightarrow	wán dóu	find
màhn	smell	\rightarrow	màhn dóu	smell (something)
lám	think (about)	\rightarrow	lám dóu	think of (a problem,
				solution, etc.)
gám gok	feeling	\rightarrow	gok dóu, gám	feel (something)
	-		gok dóu	

The simple verbs on the left describe activities, the combinations with ${\bf d}{\bf \acute{o}u}$ successful perception:

tēng gō	listen to songs	tēng dóu sēng	hear a noise
tái sānmán	watch the news	tái dóu bougou	see a report
lám baahnfaat (try to) think of a way			
lám dóu go baa	hnfaat think of a	a way	

Potential constructions

Verb-particle combinations can be separated by $\hat{\mathbf{mh}}$ and $d\bar{\mathbf{a}}\mathbf{k}$ in constructions which express inability and potential respectively:

heui m̀h dóu	cannot get there
heui dāk dóu	can get there
tái ṁh dóu	cannot see
tái (dāk) dóu	can see
tēng m̀h chēut	cannot tell
tēng dāk chēut	can tell (by listening)
tēng m̀h mìhng	cannot understand
tēng dāk mìhng	can understand (what one hears)

Some examples:

Ngóhdeih tái $\hat{\mathbf{m}}\mathbf{h}$ dóu go dihnyíng mìhngs $\bar{\mathbf{n}}$ ng

We could not see the film star

Ngóh tēng dāk mìhng léih ge Gwóngdūng-wá

I can understand your Cantonese

Ngóh tēng dāk chēut léih haih Méihgwokyàhn

I can tell (by listening) that you're American

Ngóh lám mìh héi kéuih go Yīngmàhn méng

I cannot think of his English name

Such combinations often have idiomatic meanings:

seun m̀h gwo	cannot trust	seun dāk gwo	can trust
máaih m̀h héi	cannot afford	máaih dāk héi	can afford
díng mh seuhn	cannot stand	díng dāk seuhn	can stand
gón mìh chit	cannot make it	gón dāk chit	can make it
	(in time)		(in time)

Exercise 17.1

Add a particle after the verb from the list provided:

(cho, dāi, dou, dóu, fāan, gwo, hōi, yùhn)

1	tái ga chē	see the car
2	báai gihn sāam	put the dress down
3	ю́dī seun	bring back the mail (letters)
4	gīng yīyún	pass by the hospital
5	lám baahnfaat	think of a solution
6	tái boují	finish reading the newspaper
7	yihng yàhn	misrecognize someone
8	jáu	go away
9	sāuchín	receive money
10	heui gūngsī	arrive at the office

Exercise 17.2

Translate the following using verbs of perception:

- 1 He often listens to stories (gújái)
- 2 I hear rumours (yìuhyìhn)
- 3 He's already thought of the answer (go daahp-on)
- 4 I saw an advertisement (go gwónggou)

- 5 You can feel the pressure (**ngaatlihk**)
- 6 I smell smoke (**vīnmeih**)
- 7 She likes to read novels (síusyut)
- 8 She doesn't like watching films (hei)

Exercise 17.3

Express the following situations using **mh** and the particle **dóu**:

Example: You cannot see (your name) \rightarrow Ngóh tái mh dóu (ngóh go méng)

- 1 You did not receive her letter (kéuih fūng seun)
- 2 You cannot buy the cinema ticket (hei fēi)
- 3 You could not see the sign (go páai)
- 4 You cannot smell the food (dī sung)
- 5 You cannot hear the aeroplanes (feige seng)
- 6 You cannot think of how to answer (dím daap)
- 7 You cannot remember (gei) so many names (gam dō méng)
- 8 You cannot eat so much ice cream (gam dō syutgōu)
- 9 You cannot find (wán) a letter (fūng seun)
- 10 Your friend cannot get (heui) to Shatin

Exercise 17.4

Use the potential dak to contradict the following statements:

Example: **Ngóhdeih heui mh dóu Bālàih** We cannot get to Paris → **heui dāk dóu** Yes we can (Note that this response is sufficient: there is no need to repeat the subject or object.)

1	Kéuih béi mh dou ōnchyúhn-gám	He can't give me a sense of
	ngóh	security
2	Ngóh gáau mh dihm léuhng go sailouh	I can't deal with two kids
3	Gām máahn tái m̀h dóu sīng-sīng	We can't see the stars tonight
4	Nī dāan sāangyi jouh m̀h sèhng	We cannot complete the deal
5	Kéuihdeih seun mh gwo ga	They can't be trusted
6	Léih saht máaih m̀h héi	I bet you can't afford it
7	Gām chi ngóhdeih jouh mh chit	This time we won't manage it in time
8	Léih tēng m̀h mìhng ngóh ge	Can't you understand my
	Jūngmán àh?	Chinese?

UNIT EIGHTEEN

Actions and events: jó and gwo

Cantonese is said to lack tense, in the sense that the form taken by the verb does not consistently indicate the location of events in time. We have already seen how adverbs can serve to indicate when events take place (Unit 11); in this unit we introduce the aspect markers **jó** and **gwo** which also play an important role here. Although it may be tempting to equate **jó** and/or **gwo** with past tense, the fact of referring to the past is neither a necessary nor a sufficient condition for their use. They are termed aspect markers because they are concerned with the way an action is viewed – as complete, or as ongoing as discussed in Unit 19 – rather than directly with time.

Perfective jó

A sentence can refer to the past merely by including an adverb such as **yíhchìhn** 'before' (Unit 11):

Ngóhdeih yíhchìhn hái Gānàhdaaih jyuh ge

We lived in Canada before

By adding the perfective suffix $j\acute{o}$ to the verb it is possible to refer to the same situation as a complete whole:

Ngóhdeih hái Gānàhdaaih jyuh-jó sāam lìhn

We lived in Canada for three years

In this case specifying the period of three years, now completed, calls for the suffix **jó**. Adverbs such as **yíhgīng** 'already', **ngāam-ngāam** 'just' and **tàuhsīn** 'just now' also favour **jó**:

Kéuih yíhgīng kyutdihng-jó chìhjīk

He has already decided to resign

Kéuihdeih ngāam-ngāam lèih-jó-fān

They've just had a divorce

Ngóh tàuhsīn daap-jó léih ge mahntàih

I answered your question just now

Naturally this tends to place the action in the past. It also extends to a period of time up to and including the present:

Ngóh taaitáai gaau-jó sāam lìhn Yīngmán

My wife has taught/has been teaching English for three years

Ngóh tái-jó bun yaht syū

I have been reading for half a day

Ngóh sailóu jouh-jó gíngchaat hóu loih

My brother has been a policeman for a long time

Experiential gwo

The 'experiential' meaning of **gwo** corresponds to one of the meanings of the present perfect in English – that something has happened at least once. Given a human subject, this is essentially the concept of experience, hence the grammatical term 'experiential' to describe this function. Typical cases are:

Léih yáuh-móuh sihk-gwo Góngsīk sāi chāan a?

Have you eaten Hong Kong-style western food?

Léih heui-gwo Taai-hūng Gwún meih a?

Have you been to the Space Museum?

Adverbs which call for gwo include chahngging 'once' and meih 'not yet':

Kéuih chàhnggīng oi-gwo ngóh She once loved me Ngóh meih yám-gwo nī jek jáu I've not drunk this wine before (not * Ngóh meih yám-jó nī jek jáu)

jó versus gwo

jó and **gwo** may appear similar in meaning, both corresponding to the present perfect forms of the verb in English. Indeed there will be cases when either makes sense:

Ngóh tái-jó sāam go yīsāng
Ngóh tái-gwo sāam go yīsāng
Kéuih sé-jó yāt pīn mán
Kéuih sé-gwo yāt pīn mán
Kéuih jyuh-jó sāam go yuht yīyún

I've (just) seen three doctors (before)
He's (just) written an article
He's written an article (before)
He's been in hospital for three

months (recently)

Kéuih jyuh-gwo sāam go yuht yīyún He's been in hospital for three months (once before)

Ngóh wán-jó léih géi chi I've looked for you several times

(recently)

Ngóh wán-gwo léih géi chi I've looked for you several times

(before)

In such cases, **jó** puts a focus on the result or current relevance of the action, while **gwo** makes it of less immediate relevance:

Ngóh máaih-jó nī jek pàaihjí

I've bought this brand (and still have it)

Ngóh máaih-gwo nī jek pàaihjí

I've bought this brand (before, in the past)

Kéuih heui-jó gēichèuhng

He's gone to the airport (and is still there or on his way)

Kéuih heui-gwo gēichèuhng

He's been to the airport (but is no longer there)

Questions with meih

Statements with either **jó** or **gwo** can be turned into yes/no questions by adding **meih** (see also Unit 23).

Léih sīk-jó dāng meih a Léih si-gwo nī júng hēungséui meih a?

Have you turned the light(s) off? Have you tried this perfume before?

Such questions are answered by the verb $+ j\acute{o}$ or **gwo**:

A: Léih chūng-jó-lèuhng meih a? Have you taken a bath yet?

B: Chūng-jó la/meih a Yes/no

A: Léih si-gwo nī dī meih a? Have you ever tried these?

B: **Si-gwo la/meih (si-gwo) a** Yes/no

Negating jó and gwo

Because it suggests completion of an action, $j\acute{o}$ is not compatible with negation. The negative counterpart of $j\acute{o}$ is $m\acute{o}uh$ (have not) or meih (not yet):

Kéuih yīngsìhng-jó ngóh Kéuih móuh yīngsìhng ngóhHe (has) promised me
He didn't promise me

(not * Kéuih móuh yīngsìhng-jó ngóh)

Kéuih meih yīngsìhng ngóh He hasn't promised me yet

(not * Kéuih meih yīngsìhng-jó ngóh)

Ngóhdeih sihk-jó-faahn We've had our dinner Ngóhdeih meih sihk-faahn We haven't had dinner vet

(not * Ngóhdeih meih sihk-jó-faahn)

Unlike jó, gwo can be negated either with móuh or meih:

Ngóh móuh sāu-gwo léih ge chín I have not received your money **Kéuih meih jouh-gwo sáuseuht** She has not yet had an operation

Exercise 18.1

Choose jó or gwo to fill in the gaps:

1	Ngóh gin	kéuih ūkkéi yàhn	I've met his family before
2	Ngóh tàuhsīn sái	i tàuh	I've just washed my hair
3	Kéuih gāmjīu sil	hk jóuchāan la	He had breakfast this morning
4	Ngóh tēng	_ nī sáu gō	I've heard this song before
5	Ngóh heui	yāt chi Bākgīng	I've been to Beijing once
6	Ngóh bou	_méng hohk yàuhséui	I've applied for swimming
			lessons
7	Kéuih yèhng	tàuh jéung	She's won the first prize!
8	Kéuih meih háa mìhng	u daih yāt	She hasn't got first place in an exam before
9	Kéuih meih máa	nih sān chē	He hasn't bought a new car

10 **Ngóh ngāam-ngāam maaih** I just sold the car **ga chē**

Exercise 18.2

Add jó or gwo to the following questions in accordance with the translation:

1	Léih lám yìhmàhn ı	neih a?	Have you ever considered emigrating?
2	Go bìhbī fan meih	a?	Has the baby gone to sleep yet?
	Léih si nī jek yeuhk ı		Have you tried this medicine before?
4	Léih yeuk kéuih m	eih a?	Have you made an appointment with him yet?
5	Léih sānchíng gó fal meih a?	ın gūng	Have you applied for that job yet?
6	Ga chē johng meih	a?	Has the car ever had an accident?
7	Bún syū chēutbáan	meih a?	Has the book been published yet?
8	Léih cheung nī sáu gō	meih a?	Have you sung this song before?
9	Léih gāmjīu tái boují	meih a?	Have you read the newspaper this morning?
10	Lóuhbáan fāan ūkkéi	meih a?	Has the boss gone home yet?

Exercise 18.3

Negate the following sentences (refer to Unit 14 if necessary):

Example: **Kéuihdeih git-jó-fān** They've got married: **Kéuihdeih móuh git-fān** (They have not got married) or **Kéuihdeih meih git fān** (They're not married yet)

1	Dī hohksāang jáu-jó	The students have gone
2	Ngóh go jái heui-gwo Yīnggwok	My son has been to England
	Kéuih ló-jó chēpàaih	She's got her driving licence
4	Ngóhdeih jouh-gwo jingfú gūng	We've worked for the government
		before
5	Ngóh dehng-jó fóng	I've reserved a room
6	Go beisyū fong-jó ga	The secretary has taken a day off
7	Ngóh yám-gwo Chīngdóu bējáu	I've drunk Tsingtao beer before
8	Ngóh tùhng kéuih paak-gwo-tō	I've been on a date with him

98 Unit 18

9	Dihnfai gā-jó ga	Electricity costs have gone up
10	Lóuhbáan laauh-gwo kéuih	The boss has scolded him before

Exercise 18.4

Choose an appropriate adverb to add to each sentence from the list (a-f):

1	Kéuih meih si-gwo chìh dou	a	yíhgīng	already
	She's never been late			
2	Ngóhdeih heui-gwo léih ūkkéi	b	ngāam-ngāam	just
	We've been to your house			
3	Ngóh sīnsāang fāan-jó séjihlàuh	c	chàhnggīng	once
	My husband has gone to the office	•		
4	Kéuih sāang-jó go jái	d	yíhchìhn	before
	She's had a child		-	
5	Ngóh háauleuih-gwo chìhjīk	e	jeuigahn	recently
	I've considered resigning		•	-
6	Gāan jáulàuh sāan-jó mùhn	f	chùhnglòih	never
	The restaurant has closed		2	

UNIT NINETEEN

Activities: gán and jyuh

The aspect markers **gán** and **jyuh** attached to verbs express ongoing actions.

1 Progressive gán and háidouh

The progressive suffix **-gán**, like the English progressive '-ing', is used for ongoing activities:

Kéuih yìhgā hōi-gán-wúi She's having a meeting **Kéuihdeih léuhng go kīng-gán-gái** The two of them are chatting

Unlike the English '-ing' in such cases, **gán** does not have to be present. Thus the same sentences shown above are also possible without **gán** (although a sentence particle may be needed in its place: see Unit 25):

Kéuih yìhgā hōi-wúi wo She's having a meeting **Kéuihdeih léuhng go kīng-gái la** The two of them are chatting

Although referring most often to the present, verbs with **gán** may apply to an activity in the past. In such cases there is typically a past time adverb present to make this clear (see Unit 11; note also the adverb **juhng** 'still'):

Gauh lín kéuih juhng duhk-gán jūnghohk

Last year she was still studying in secondary school

Kéuihdeih seuhng go yuht juhng paak-gán-tō, yìhgā yíhgīng fān-jósáu la

Last month they were still dating, now they're already separated

Similarly, gán may be used in subordinate clauses referring to the past:

Ngóh duhk-gán síuhohk gójahnsìh, kéuih yíhgīng sīk ngóh (*lit.* I studying primary school that time, he already knew me) When I was in primary school, she already knew me

Léih fan-gán-gaau gójahnsìh, yáuh yàhn dá-dihnwá làih (*lit.* you sleeping that time, somebody telephoned come) Somebody called while you were sleeping

An alternative means of describing an ongoing action is by using **háidouh**, which literally means 'to be here/there':

Ngóh háidouh jouh gūngfo
Léih háidouh dáng bīngo a?
Kéuihdeih háidouh aai-gāau

I'm (here) doing homework
Who are you waiting for?
They're having an argument

Because of the literal meaning 'here', it is suitable where the activity is going on in a location close to the speaker, **háidouh** and **gán** can also be used together in expressing progressive meaning:

Kéuih háidouh jyú-gán-faahn She's cooking **Lóuhbáan háidouh sé-gán-seun** The boss is writing letters

2 Continuous jyuh

jyuh added to a verb describes a continuous activity or state without change. It is associated with particular verbs, such as those denoting stationary situations:

Ga dihndāanchē jó-jyuh go chēutháu

The motorbike is blocking the exit

Kéuih sèhngyaht jā-jyuh fahn boují

She's always holding a newspaper

Ngóh yaht-yaht deui-jyuh tùhng-yéung yāt bāan yàhn

I face the same bunch of people every day

Certain transitive verbs with **jyuh** indicate putting something in a state, as with **kám-jyuh** 'cover' and **bóng-jyuh** 'tie up':

Léih yiu yuhng go goi kám-jyuh go wok

You need to use the top to cover the wok

Kéuih yuhng dī hóu leng ge jí bāau-jyuh fahn láihmaht

She used some nice paper to wrap up the gift

Kéuih móuh baahnfaat bóng-jyuh kéuih lóuhgūng

There's no way she can tie up her husband (physically or metaphorically)

Note that verb + jyuh can mean something different from the simple verb by itself, such as lám-jyuh 'intend' vs. lám 'think', tái-jyuh 'watch over' vs, tái 'look, see':

Ngóh lám-jyuh chéng kéuihdeih sihk-faahn

I intend to invite them to dinner

Léih tái-jyuh nī léuhng go sailouhjái, mhóu béi kéuihdeih dá-gāau Keep an eye on these two kids, (and) don't let them fight

A verb with **jyuh** can also be used to describe an action carried out simultaneously with another:

Kéuih mohng-jyuh ngóh siu

(*lit*. he watching me smiled) He smiled (while looking) at me

Kéuih deui-jyuh ngóh haam

(*lit.* she facing me cried) She cried at (while facing) me

Léih gān-jyuh ngóh hàahng

(*lit.* you following me walk) Walk after (following) me

Note that there is no conjunction linking the two verbs (this is a characteristic of the sequences of verb phrases known as serial verb constructions).

gán versus jyuh

Since both may be translated with progressive '-ing' foms in English, it can be difficult to choose between **gán** and **jyuh**. As a general rule, **gán** is appropriate for activities involving change or movement and **jyuh** for static ones. In some cases either is possible, sometimes with a marked difference of meaning:

a Kéuih ló-gán dī wuhn-geuih
b Kéuih ló-jyuh dī wuhn-geuih
a Kéuih jeuk-gán sāam
b Kéuih jeuk-jyuh tìuh dyún kwàhn
a Kéuih daai-gán tìuh jyunsehk
génglín
b Kéuih daai-jyuh tìuh jyunsehk
génglín
b Kéuih daai-jyuh tìuh jyunsehk
génglín

He's fetching the toys
He's holding the toys
She's getting dressed
She was wearing a short skirt
She's putting on a diamond
necklace
She's wearing a diamond
necklace

In each case **gán** indicates a dynamic, changing situation and **jyuh** a static one.

Exercise 19.1

Add **gán** and/or **háidouh** to express progressive aspect in the following sentences:

Example: Kéuih tái syū She's reading (a book) — Kéuih tái-gán syū

I'm changing (my clothes) now 1 Ngóh yìhgā wuhn sāam They were playing mahjong last night 2 Kéuihdeih kàhm-máahn dá màhjéuk 3 Kéuih góng dihnwá4 Yihgā lohk yúh5 Dī sailouhjái wáan séui She's (talking) on the phone It's raining now The children are playing water games 6 Ngóhdeih hàahng làih We're coming (walking) over 7 Kéuih yìhgā chūng-lèuhng She's taking a shower 8 Ngóh go jái waahk-wá My son is drawing 9 Louhbáan hōi-wúi The boss is having a meeting 10 Kéuih juhng lāu ngóhdeih She's still angry with us

Exercise 19.2

Add gán or jyuh as appropriate to complete the following sentences:

Example: Ngóh sái sāam I'm washing clothes → Ngóh sái-gán sāam

1 Ngóh jā tìuh sósìh
2 Kéuih máaih sung
3 Ngóhdeih hóu gwa léih
4 Léih jyú mātyéh a?
5 Kéuih yám gafē

I'm holding a key
She is buying groceries
We miss you very much
What are you cooking?
He's drinking coffee

6 Dímgáai léih mohng ngóh a?

- 7 Dī sailouhjái chūng-lèuhng
- 8 Hóu dō yàhn wán gũng
- 9 Ngóh yìhgā daap mahntàih
- 10 Kéuih sèhngyaht jeuk dī gauh sāam

Why are you staring at me? The children are taking a bath Many people are looking for a job I'm answering questions right now He's always wearing old clothes

Exercise 19.3

Add **jyuh** and the verb provided to expand the following sentences:

Example: **Léih gān ngóh** Follow me, (**cheung** 'sing') → **Léih gān-jyuh ngóh cheung** Sing along with me

1 Kéuih jeuk sāam

He wears clothes (yàuh-séui 'swim')

2 Kéuih līng dī hàhngléih

He carried the baggage (jáu 'leave')

3 Kéuih tái dihnsih

She's watching television (jouh gungfo 'do homework')

4 Dímgáai léih mh mohng ngóh?

Why aren't you looking at me (góng 'speak')?

5 Ngóh jūngyi tēng yāmngohk

I like to listen to music (yāusīk 'relax')

6 Kéuih sèhngyaht chī léih go léui

He's always hanging around your daughter (heui gāai 'go out')

7 Go māmìh póuh go jái

The mother is carrying her son (chēut gāai 'go out')

8 Dímgáai léih daai ngáahn-gēng?

Why do you wear your glasses? (fan-gaau 'sleep')

9 Ngóh lóuhgūng jā ga sān chē

My husband is driving his new car (làih jip ngóh 'to meet me')

10 Ngóh mh wúih jó léih

I won't get in your way (faat daaht 'make money')

UNIT TWENTY

Auxiliary verbs

Auxiliary verbs are used together with a main verb. The most important auxiliary verbs are:

wúih	will, would	yīnggōi	should, ought to
hóyíh	can, may	yiu, sēuiyiu	want, need
sīk	know (how to)	séung	want to

They express mainly 'modal' meanings having to do with possibility and necessity. The auxiliary verbs come before the main verb:

Ngóh wúih sé seun béi léih	I'll write to you
Léih yīnggōi douh-hip	You should apologise
Kéuih sīk góng Faatmán	He can speak French

An adverb may intervene between auxiliary and verb, as in the following examples:

Léih hóyíh <i>sīn</i> heui Jūngwàahn	You can go to Central <i>first</i>
Ngóh yīnggōi <i>dō dī</i> wanduhng	I should exercise <i>more</i>
Ngóhdeih séung faai dī bātyihp	We want to graduate quickly

Note that some of the auxiliary verbs double as main verbs:

 $\begin{array}{cccc} \text{Main verb} & & \text{Auxiliary} \\ \textbf{s}\overline{\textbf{i}}\textbf{k} & \text{to know (someone)} & \textbf{s}\overline{\textbf{i}}\textbf{k} & \text{to know (how to do} \\ & & \text{something)} \\ \textbf{yiu} & \text{to want (something, someone)} & \textbf{yiu} & \text{to need (to do)} \end{array}$

Compare the meanings in the following:

Ngóh sīk kéuih I know her

Ngóh sīk yàuh-séui I know how to swim Kéuih yiu gafē She wants coffee Kéuih viu sihk-yéh She wants/needs to eat

A rare irregularity should be noted here. The form **mh** yiu means 'don't want', usually as a main verb:

Ngóh mh yiu tìhmbán, mgōi
Kéuih mh yiu daap fēigēi

I don't want any dessert, thanks
He doesn't want to take the plane

However, the negative form of **yiu** used as an auxiliary meaning 'need' is not **mh yiu** but **msái**:

but Ngóh gāmyaht yiu fāan gūng
but Ngóh gāmyaht msái fāan gūng
Kéuih yiu tái yīsāng
but Kéuih msái tái yīsāng
He needs to see the doctor
He doesn't need to see the doctor

sēuiyiu is a more explicit form of **yiu**:

Ngóhdeih sēuiyiu dō dī yāusīk We need to rest more Léih mh sēuiyiu gam sām-gāp You needn't be so impatient

háng 'to be willing' is used mainly (though not exclusively) in the negative form **mh háng**:

Ngóh go jái mh háng fāan hohk
Kéuih mh háng tēng ngóh dihnwá
Ngóh gājē háng bōng sáu

My son won't go to school
She won't answer my calls
My (elder) sister is willing to help

Modal meanings

Since Cantonese does not have a grammatical category of tense, **wúih** should not be thought of simply as a future tense. Rather, **wúih** has a range of meanings including future ('will') and conditional ('would'):

Ngóh tīngyaht wúih làih

Ngóh mh wúih bōng kéuih

I'll come tomorrow
I wouldn't help him

The basic modal meanings can be modified by modal adverbs such as waahkjé and hólàhng 'perhaps', hángdihng and yātdihng 'certainly':

Kéuihdeih waahkjé wúih yìhmàhn Kéuihdeih hángdihng wúih yìhmàhn Ngóh hólàhng wúih jouh

Ngóh vātdihng wúih jouh

They may (perhaps) emigrate They will definitely emigrate I may do it

I will certainly do it

Note here the distinction between yātdihng yiu meaning 'must' in the sense of obligation and **yātdihng haih** in the sense of logical necessity or inference:

Léih yātdihng yiu làih Léih vātdihng haih jyūn-gā Kéuih yātdihng yiu jouh ge Yātdihng haih kéuih jouh ge You really must come You must be an expert He must (has to) do it

It must have been him (who did it)

Since **haih** is not used with adjectives (Unit 9), **vātdihng** alone indicates inference with an adjective:

Léih yātdihng hóu guih

You must be tired

Léih go léui yātdihng hóu lēk ge Your daughter must be pretty smart

yīnggōi can mean 'should' in the sense of either obligation or probability:

Léih vīnggōi jéunsìh fāan gūng

You should get to work on time

Léih fahn láihmaht yīnggōi jéunsìh dou

Your present should arrive on time (I expect)

Kéuih gāmyaht yīnggōi fāan làih ge

He should be back today (I predict, and/or he is obliged to do so)

Finally, note that the meanings of possibility and ability are often more naturally expressed by dak following the verb, rather than by hóyíh 'can':

Léihdeih jáu dāk la

(or Léihdeih hóyíh jáu la)

(lit. you leave can already) You can leave now

Tìuh yú sihk dāk la

(or Tìuh yú hóyíh sihk la)

(lit. the fish eat can already)

The fish can be eaten

Similarly, verb + particle combinations with **mh** (see Unit 17) are often used to express the negative counterparts meaning 'cannot' in preference to mh hóyíh:

Chín bōng mh dóu léih

(*lit.* money help not succeed you) Money can't help you

Ngóh wán mh dóu kéuih

(lit. I find not succeed her)
I can't find her

or Chín mh hóyíh bōng léih

(*lit.* money not can help you) Money can't help you

(not *Ngóh mh hóyíh wán dóu kéuih)

There is a subtle difference between ... **mh** dóu, meaning inability to do something, and **mh** ... dāk, meaning that something is not allowed or not possible due to external circumstances:

Ngóh bōng mh dóu léih I can't help you (because I lack the

ability)

Ngóh mh bōng dāk léih I can't help you (because I'm not

allowed to, I have no time, etc.)

Consequently, inability to perceive something is expressed with ... mh dóu:

Ngóh gāmyaht sēung-fūng, màhn mh dóu yéh

I have a cold today, (so I) can't smell anything

Ngóh lám mh dóu baahnfaat

I can't think of a solution

See also Unit 17 on verbs of perception.

Exercise 20.1

Translate the following using a modal auxiliary:

- 1 I need to go home (fāan ūkkéi)
- 2 She knows how to drive (jā chē)
- 3 I'm going to apologize (douh-hip)
- 4 My friend will take you there (daai léih heui)
- 5 You can take the train (daap fóchē heui)
- 6 We should arrive on time (jéunsìh dou)
- 7 You may leave early (jóu jáu)
- 8 I will return the books (wàahn syū)
- 9 He knows how to answer the question (daap mahntàih)
- 10 She should get married (git-fān)
- 11 She's willing to reduce the price (gáam ga)
- 12 We're willing to compromise (tóhhip)

- 13 They're not willing to wait any longer (dáng loih dī)
- 14 My wife doesn't need to attend the meeting (hōi-wúi)
- 15 We don't need to worry (dāamsām)

Exercise 20.2

Make the following statements negative:

1	Ngóh sīk kéuih	I know him
2	Ngóh sīk heui gódouh	I know how to go there
3	Ngóh yiu fan-gaau	I need to sleep
4	Kéuih yiu faahn	She wants rice
5	Kéuih wúih fāan ūkkéi	She will go home
6	Léih hóvíh làuh dāi	You can stay behind

7 **Léih hóyíh wuhn sāam** You may change your clothes

8 **Ngóhdeih yīnggōi yāusīk** We should rest

9 **Kéuih yīnggōi máaih láu** She should buy a flat

10 **Kéuih sīk tàahn kàhm** He knows how to play the piano

Exercise 20.3

Express the following situations using a modal verb:

- 1 You want to date (yeuk) someone
- 2 Undertake to inform (tūngjī) someone on a future occasion
- 3 Regret that you cannot help (bong) someone this time
- 4 You don't need anything to eat (sihk)
- 5 Someone should drive more carefully (síusām dī)
- 6 Give someone permission to give in their homework late (chìh dī gāau gūngfo)
- 7 Tell your students they should not be so rude (gam chōulóuh)
- 8 You are not willing to pay so much (béi gam dō chín)
- 9 You do not know how to get to the post office (heui yàuh-gúk)
- 10 Your friend would not agree (tùhngyi)

Exercise 20.4

Add a modal adverb to the sentences provided to give the meaning indicated:

Example: Léih yiu jóu dī sānchíng → Léih yātdihng yiu jóu dī sānchíng You must apply early

1 Ngóh gām-lín wúih git-fān

- 2 Ngóh gām-lín wúih git-fān
- 3 Kéuihdeih hái ūkkéi
- 4 Kéuihdeih hái ūkkéi
- 5 Ngóh wúih sahpyih dím jīchìhn fāan dou ūkkéi
- 6 Ngóh yiu sahpyih dím jīchìhn fāan dou ūkkéi
- 7 Füng seun yiu tīngyaht dou ge
- 8 Fūng seun haih kàhmyaht dou ge
- 9 Go leuhtsī yiu hóu lēk

10 Go leuhtsī hóu lēk

I may get married this year I will definitely get married this year

They must be at home They may be at home

I will definitely be home before twelve

I must be home before twelve

The letter must arrive tomorrow

It must have arrived yesterday The lawyer must be (needs to be) good

The lawyer must be good (it

seems)

Exercise 20.5

Give alternatives to the following sentences using **dāk** (see Unit 17) or **mh dóu**:

Example: Léih hóyíh tái You can take a look → Léih tái dāk

1 Ngóh gām-máahn hóyíh pùih léih

- 2 Ngóhdeih mh hóyíh yahp heui
- 3 Léih yìhgā hóyíh jáu
- 4 Hohksāang **mh** hóyíh góng daaih wah
- 5 Hóyíh sihk la
- 6 Ngóh gāmyaht mh hóyíh heui
- 7 Ngóh mh hóyíh sihk tìhmbán
- 8 Ngóh mh hóyíh daap léih
- 9 Jēung gēipiu mh hóyíh gói
- 10 Nīdouh mh hóyíh tēng Daaihluhk dihntòih

I can keep you company tonight

We can't go in

You can leave now

Students may not tell lies

We can eat (now)

I can't go today
I can't eat dessert

I can't eat dessert

I can't answer you

The air ticket cannot be changed

Here we cannot hear mainland radio programmes

UNIT TWENTY-ONE

Passives

Cantonese passives are signalled by a **béi** phrase similar to the English by phrase. The **béi** phrase (**béi** + a noun phrase indicating the agent of the action) occurs before the verb:

Dī syutgōu béi dī sailouhjái sihk-jó

(*lit.* the ice cream by the children eaten) The ice cream was eaten by the children

Bún syū béi go hohksāang je-jó

(*lit.* the book by a student borrowed) The book was borrowed by a student

Ngóh go jái béi sīnsāang faht-gwo

(*lit.* my son by teacher punished)
My son has been punished by the teacher

The noun phrase denoting the agent of the action is obligatory in spoken Cantonese, in contrast to English and Mandarin which allow agentless passives. When the identity of the agent is unknown or left unspecified, the word yàhn 'person' or yéh 'thing' is used generically:

Ngóh go ngàhnbāau béi yàhn tāu-jó

(*lit.* my wallet by person stolen) My wallet was stolen

Kéuih sèhngyaht béi yàhn ngāak

(*lit.* he often by person cheated) He often gets cheated

Ngóh yauh béi yéh ngáauh chān

(*lit.* I again by something bitten) I've been bitten again

Note the contrast with the English translations in which the agent is not mentioned at all.

A peculiarity of Cantonese passives is that a passive verb can still take a direct object. This applies especially to those verbs introduced in Unit 16 which take two objects, such as **tāu** 'steal', **faht** 'fine' and **mahn** 'ask':

Kéuih béi yàhn tāu-jó go ngàhnbāau She had her purse stolen

Ngóh béi yàhn faht-jó hóu dō chín I was fined a lot of money

Ngóh mh séung béi yàhn mahn gam dō yéh

I don't want to be asked so much

This possibility gives rise to alternative passive forms for the same idea:

- a **Ngóh go chēpàaih béi yàhn ló-jó** My licence has been taken away
- b Ngóh béi yàhn ló -jó go chēpàaih I've had my licence taken away
- a Kéuih ga chē béi yàhn johng-gwo Her car has been dented
- b Kéuih béi yàhn johng-gwo ga chē She's had her car dented

The first version provides an objective statement of events, while the second focuses on the effect on the person suffering the misfortune.

Passive meaning without béi

There are a number of ways in which Cantonese effectively avoids passives, involving constructions which appear to be passive in meaning but lack the **béi** phrase:

Gāan fóng yàuh-jó la

(*lit.* the room painted)
The room has been painted

Nī gihn sāam jeuk-gwo yāt chi

(*lit.* this blouse worn once)
This blouse has been worn once

Ga gēi juhng jíng-gán

(*lit.* the machine still mending)
The machine is still being mended

These cases may be seen as instances of topicalization – making the object the topic of the sentence by placing it first, as described in the next unit. Typically the verb has an aspect marker as in the above examples, or a verbal particle indicating the result of the action (see Unit 17):

Jek gáu wán fāan la

(*lit.* the dog found back)
The dog has been found again

Yàuhhei wáan yùhn la

(*lit.* game played finish) The game is finished

Tìuh yú jīng hóu la

(*lit.* the fish steamed complete)
The fish is done (having been steamed)

This pattern also commonly occurs with an auxiliary (see Unit 20):

Dī cháaugā yīnggōi faht ge

(*lit.* those speculators should punish) Those speculators should be punished

Ngóh go léui sèhngyaht viu póuh

(*lit*. my daughter always wants carrying) My daughter always wants to be carried

Tìuh fu sái-msái gói a?

(*lit.* the trousers need to alter or not)

Do the trousers need to be altered?

In such sentences a subject could be inserted:

Tìuh fu (ngóh) sái-msái gói a?

(*lit.* the trousers (I) need to alter or not) Do (I) need to alter the trousers?

Nī gāan ūk (ngóhdeih) yīnggōi jōngsāu

(*lit.* this house (we) should redecorate) (We) should redecorate this house

Nī dī yùhnjāk (yàhn-yàhn) yiu gei-jyuh

(*lit.* these principles (everyone) need remember) (Everyone) needs to remember these principles

For the most part, however, the subject remains implicit and is understood as 'one' or 'people' in general.

Exercise 21.1

Turn the following active sentences into their passive counterparts using **héi**:

1	Ga	chē	iń-i	ivnh	ησή	hdeih
1	U a	CIIC	ו-טו	y un	1120	muciii

- 2 Gíngchaat jūk-jó kéuihdeih
- 3 Dī sailouhjái gáau lyuhn-jó gāan fóng
- 4 Nī go hohksāang yèhng-jó gó go daaih jéung
- 5 Kéuih je-jó ngóh go sáudói
- 6 Dī chē sēng chòuh séng-jó ngóh
- 7 Kéuih go làahm-pàhngyáuh máaih-jó gāan ūk
- 8 Kéuihdeih jíng waaih-jó go dihnlóuh
- 9 Ngóh yuhng-jó dī chín
- 10 Kéuihdeih sihk-jó dī jyūgwūlīk
- 11 Kéuih dá laahn-jó jek būi
- 12 Ngóh tái-gwo fūng seun
- 13 Kéuih hōi-gwo go seunsēung
- 14 Kéuih jíng-gán ga chē
- 15 Kéuihdeih maaih-jó fūk wá

The car is blocking us

The police have caught them

The children have made a mess of the room

The student has won that grand prize

She has borrowed my handbag

The noise of the cars has awakened me

Her boyfriend has bought the house

They have broken the computer

I have used the money

They have eaten the chocolate

He has broken the glass

I have read the letter

He has opened the mailbox

He is mending the car

They have sold the picture

Exercise 21.2

Turn the following sentences into passive ones by either a $b\acute{e}i + y\grave{a}hn$ phrase or a $b\acute{e}i + y\acute{e}h$ phrase (note $y\acute{a}uh$ $y\grave{a}hn$ meaning 'somebody': see Unit 6). In some cases there may be two alternative versions:

Example: Yáuh yàhn chéung-jó ngóh go léuih-pàhngyáuh Someone stole my girlfriend from me → Ngóh go léuih-pàhngyáuh béi yàhn chéung-jó or Ngóh béi yàhn chéung-jó go léuih-pàhngyáuh

- 1 Yáuh yàhn ló-jó ngóh go sáubīu
- 2 Yáuh yàhn hōi-jó douh mùhn

Someone took my watch Someone opened the door 3 Yáuh yàhn sīk-jó láahngheigēi

4 Yáuh yàhn ngāak-jó kéuih dī chín

5 Yáuh yàhn máaih-jó dī syū

6 Yáuh yéh ngáauh dóu ngóh jek sáu

7 Yáuh dī yéh fàahn dốu kéuih

8 Yáuh dī yéh yínghéung dóu kéuih ge sāmchìhng Someone turned off the air conditioning

Someone cheated him out of his money

Someone bought the books

Something has bitten my hand

Something has troubled him Something has affected her mood

† Exercise 21.3

Render the passive sentences below with non-passive (topicalized) alternatives, adding an aspect marker or auxiliary where appropriate:

- 1 This room (gāan fóng) has been booked (dehng)
- 2 The house (gāan ūk) is being built (héi)
- The film (tou hei) should be seen (tái)
- 4 The book (bún syū) has been published (chēutbáan)
- 5 The shirt (gihn sāam) doesn't need to be ironed (tong)
- 6 Your plan (go gaiwaahk) is being considered (háauleuih)
- 7 The car (ga chē) has been checked (yihm) before
- 8 The picture (fūk séung) has been taken (yíng) already
- 9 The light (jáan dāng) has been turned off (sīk)
- 10 The child (go sailouhjái) always wants to be carried (póuh)

UNIT TWENTY-TWO

Word order and topicalization

For the most part, word order in Cantonese may be said to follow the pattern subject – verb – object, much as in English:

Subject Verb Object

Ngóh jūngyi kéuih I like him/her

Ngóh sailóu máaih-jó gāan ūk My brother has bought a house

It would be more accurate, however, to say that while Cantonese can be treated in this way – this order normally works – departures from it play an important role in the language. In particular, the sentence need not begin with the subject. Indeed, the object of the verb often comes first if it represents what the sentence is felt to be about:

Nī go yàhn ngóh gin-gwo

(*lit.* this person I have seen) I've seen this person before

Póutūng-wá ngóh sīk síu-síu

(*lit.* Putonghua I know a little) I know a little Putonghua

Fahn boujī léih báai hái bīndouh a?

(*lit.* the newspaper you put where) Where did you put the newspaper?

This pattern is known as topicalization – making something other than the subject the 'topic' of the sentence – and while also possible in English, its use is much more widespread in Cantonese. In English it is used mostly for contrasting two things, explicitly or implicitly, and this also occurs in Cantonese:

Pìhnggwó ngóh jūngyi sihk

Apples I like to eat (but not bananas)

Chín ngóh hóyíh béi léih, sìhgaan jauh mh hóyíh laak

Money I can give you, but not time

Deihtit ngóh chóh-gwo, dihnchē jauh meih (chóh-gwo)

(*lit.* underground I've taken, tram then not yet) I've been on the underground, but not the tram

Bākgīng choi ngóhdeih sihk-gwo, Chìuhjāu choi jauh meih (sihk-gwo)

(*lit.* Beijing food we have eaten before, Chiu Chow food then not yet) We've eaten Peking food but not Chiu Chow

Note some characteristic features of sentences of this kind:

- (i) the adverb **jauh** is often added after the second topic to make the contrast more explicit;
- (ii) the predicate can be omitted in the second clause:
- (iii) in many cases the most natural English translation does not put the object first; this illustrates how the Cantonese syntax 'prefers' the topicalized version.

Topic without subject

Making the object the topic usually results in the word order: object – subject – verb, as in the above examples. Remembering that the subject can be omitted, however (see Unit 4), we are often left with merely object – verb:

Sāangvaht daahn-gōu sihk-jó la

(*lit.* birthday cake eaten already) We've eaten the birthday cake

Dī hēungbān yám saai la

(*lit.* the champagne drunk all) The champagne is all gone

Gihn sāam tong-jó meih a?

(*lit.* the shirt ironed or not yet) Has the shirt been ironed?

Such a pattern often appears like a passive sentence, and may be so translated (see Unit 21):

Sān gēichèuhng juhng héi-gán

(*lit.* new airport still building)
They're still building the new airport
(or: The new airport is still being built)

Ga chē hái chóng douh jíng-gán

(*lit.* the car at the garage there repairing)
They're repairing the car at the garage
(or: The car is being repaired at the garage)

Hanging topics

A less familiar, but characteristically Chinese form of topicalization occurs when the topic is neither the subject nor the object of the verb, but something more loosely related to the content of the sentence. We may distinguish several types of 'hanging topics' of this kind:

(i) The topic sets a location in time or space:

Hēunggóng jeui gwai haih jōu ūk

(*lit.* Hong Kong most expensive is rent house) In Hong Kong the biggest expense is rent

Hahtīn ngóh jūngyi yàuh-séui

(In) summer, I like swimming

Seuhnghói ngóh yáuh pàhngyáuh, Bākgīng jauh móuh

I have some friends in Shanghai, but not in Beijing

(ii) The topic sets up a whole, of which an element later in the sentence represents a part:

Gam dō geijé jeui lēk haih kéuih

(*lit.* so many reporters most smart is him) Of all the reporters he's the brightest

Nī go daahn-gōu kéuih sihk-jó yāt bun

(*lit.* this cake he's eaten one half) He's eaten half of this cake

Sahp go hohksāang yáuh géu go hóyíh yahp daaihhohk

(*lit*. ten students have nine can enter university) Nine out of ten students can enter university

118 Unit 22

(iii) The topic states a general category of which the subject or object represents a particular type:

Síusyut ngóh tái Jūngmán faai dī

(As for) novels, I read Chinese ones faster

Bējáu léih hóyíh yám Chīngdóu

(For) beer, you can drink Tsingtao

Gwóngdūng gō, ngóh jūngyi tēng Wòhng Fēi

As far as Cantonese songs are concerned, I like to listen to Faye Wong

Exercise 22.1

1 Ngóh mógih jó gó hún syū

Change the word order to make the object the topic of the sentence:

Example: **Ngóh meih sihk-gwo yùh-chi**Yùh-chi ngóh meih sihk-gwo

I've never eaten shark's fin

I bought that book

1	11gon maam-jo go bun syu	1 bought that book
2	Kéuih hóu jūngyi sihk syutgōu	She likes to eat ice cream
3	Ngóh mh sīk heui Wohnggok	I don't know the way to Mongkok
4	Ngóhdeih tái-gwo nī tou hei	We've seen this film
5	Kéuih sīk góng Chìuhjāuwá	She knows how to speak Chiuchow
		dialect
6	Léih tēng-gwo nī sáu gō meih a?	Have you heard this song before?
7	Léih yáuh-móuh sāam baak mān a?	Have you got 300 dollars?
8	Kéuih heui-gwo Hóiyèuhng	She has been to the Ocean Park
	Gūngyún	
9	Ngóh jeui jūngyi Sīubōng ge	I like Chopin's music best
	yāmngohk	
10	Ngóh hóu tùhngyi léih ge táifaat	I quite agree with your view

Exercise 22.2

Add a clause using **jauh** to contrast with the first (for negation in the second clause, see Unit 14):

Example: **Fūng seun sé yùhn la, bùn syū jauh meih** The letter's finished, the book is not

1	A-Ann ngóh gin-gwo, A-May
	Ann I've met, May I haven't
2	Nī gihn sāam sái-jó, gó gihn
	This dress has been washed, that one
3	Wohnggok hóu föngbihn, Sāigung
	Mongkok is convenient, Sai Kung
4	Nī tou hei hóu chèuhng, gó tou
	This film is pretty long, that one
5	Dihnsih ngóh yahtyaht dōu tái, dihnyíng
	Television I watch every day, films
6	Kéuih mùihmúi ngóh sīk, kéuih sailóu
	Her sister I know, her brother
7	Oujāu ngóh heui-gwo, Méihgwok
	Australia I've been to, America
8	Léih ge tàihyíh ngóh jipsauh, kéuih ge
	Your suggestion I accept, his
9	Yàuh-séui ngóh hohk-gwo, móhngkàuh
	Swimming I've learnt, tennis
10	Làuhhàhng yāmngohk ngóh jūngyi, gúdín yāmngohk
	Pop music I like, classical music
	ravaina 20.2
	cercise 22.3
Fv	press your opinion or experience of the following topics, beginning the
	ntence with the phrase provided:
SCI	nence with the phrase provided.
	Example: Hēunggóng Dóu (Hong Kong Island): Hēunggóng Dó
	ngóh mìh sīk louh I don't know my way around Hong Kong Island
	angon maan san roun r work may was write rrong round
1	Faai chāan (fast food)
	Syúga (in the summer holidays)
	Sailouhjái (children)
	Gam do yeuhng dímsam (of all the kinds of dim sum)
	Sáutàih dihnwá (mobile phones)
	Sāam tìuh tāai (of the three ties)
	Yahtmán (Japanese)
	Páauchē (sports cars)
	Jünggwok yāmngohk (Chinese music)
	Git-fān (marriage, getting married)

UNIT TWENTY-THREE

Yes/no questions

To ask a question to which the answer is 'yes' or 'no', Cantonese in effect asks 'verb-not-verb?' This is rather like asking 'Is X the case or not?' without the 'or' being expressed:

Kéuihdeih làih-mh-laih a?

(*lit.* they coming (or) not coming) Are they coming?

Léih seun-mh-seun a?

Do you believe it?

Léih dáng-mh-dáng kéuih a?

Will you wait for her?

The same pattern applies to adjectives:

Ga chē gwai-mh-gwai a? Dī hàhngléih chúhng-mh-chúhng a? Léih gāan fóng daaih-mh-daaih a?

Is the car expensive? Is the luggage heavy? Is your room big?

With auxiliaries (see Unit 20), the auxiliary is repeated before the verb:

Gāmyaht wúih-mh-wúih lohk yúh a?

(*lit.* today will (or) will not fall rain) Will it rain today?

Léih sīk-mh-sīk góng Yahtmán a?

Can you speak Japanese?

Léih yiu-mh-yiu heui sái-sáu-gāan a?

Do you want to go the bathroom?

Applying this pattern to the verb **haih** 'to be' we have **haih-mhaih** 'is it the case', a form which is especially useful in checking information:

Léih haih-mhaih sing Tàahm ga? Is your surname Tam? **Ngóhdeih haih-mhaih gāmyaht heui a?** Is it today we are going?

Some points to notice:

- (i) The particle **a** is usually added: this is felt to make the question more polite, less of an imposition on the listener (see Unit 25).
- (ii) If the verb, adjective or auxiliary being questioned has more than one syllable, only the first syllable is repeated:

jūngyi	like	Léihdeih jūng-mh-jūngyi Hēunggóng a?
		Do you like Hong Kong?
sānchíng	apply	Léih sān-mh-sānchíng nī fahn gūng a?
		Will you apply for this job?
hōisām	happy	Léih gāmyaht hōi-m̀h-hōisām a?
		Are you happy today?
chūngmìhng	smart	Kéuih chūng-mh-chūngmìhng a?
		Is he smart?
hóyíh	can	Ngóh hó- m̀h -hóyīh chóh a?
-		Can I sit down?
yīnggōi	should	Ngóh yīng-mh-yīnggōi douhhip a? Should I apologize?

Exceptional verbs

Two common verbs have special negative forms, which also need to be used in questions. Since the negative form of yáuh is móuh (Unit 6) the question form is not *yáuh-mh-yáuh but yáuh-móuh:

Léih yáuh-móuh sailouhjái a? Ngóhdeih yáuh-móuh sìhgāan a?Do you have children?
Do we have time?

We also use yáuh-móuh to ask a question about a past event:

Léih yáuh-móuh heui máaih yéh a? Did you go shopping? **Kàhmyaht yáuh-móuh lohk yúh a?** Did it rain yesterday?

Similarly, given that the negative counterpart of **yiu** meaning 'need' is **msái** (Unit 20), the corresponding question form is **sái-msái**:

A: **Léih sái-msái tái yīsāng a?** Do you need to see a doctor?

B: Yiu a (not *sái a) Yes

A: Ngóh sái-msái bōng-sáu a? Do I need to, help?

B: **Msái la, mgōi** No, thank you

Replying to questions

The standard reply to questions of this kind is to repeat the whole verb or adjective used in the question, adding the negative word **mh** for a negative answer:

A: **Léih jūng-mh -jūngyi nīdouh a?** (*lit.* you like (or) not like here)

Do you like it here?

B: **Jūngyi a** (*lit.* like)

Yes (not *haih, see Unit 7)

A: Léih heui-mh -heui Lèuhndeun a? Are you going to London?

B: **Mh heui la** No

Questions with meih

Another important question form uses **meih** 'not yet' which when added to a statement makes a question:

Léih sihk báau meih a? Have you eaten enough? Ngóhdeih wáan yùhn meih a? Have we finished playing yet?

This form is used to ask whether an action has taken place or not, with completion signalled by verbal particles like **báau** and **yùhn** above (see Unit 17) or by the aspect markers **jó** and **gwo** (Unit 18):

Kéuih git-jó-fān meih a? Is he married?

Kéuih git-gwo-fān meih a? Has he ever been married? Léih gāau-jó séui meih a? Have you paid your taxes yet? Lèih gāau-gwo séui meih a? Have you ever paid taxes?

The standard responses pick up the relevant part of the question as follows: Yes – repeat the verb and aspect marker, often adding the particle **la**:

A: **Léih sīk-jó dāng meih a?** Have you turned off the lights?

B: Sīk-jó la Yes

A: **Léih heui-gwo Maahn-gūk meih a?** Have you ever been to Bangkok?
B: **Heui-gwo la** Yes, I have

No – repeat **meih**, typically adding the particle **a** to make the negative response less abrupt:

A: **Kéuih sīng-jó-jīk meih a?** Has she got promoted?

B: **Meih a** No, not yet

A: **Léih si-gwo waaht-syut meih a?** Have you ever tried skiing?

B: **Meih a** No, I haven't

Exercise 23.1

Form yes/no questions based on the following statements:

1 Ngóhdeih tīngyaht heui We're going hiking tomorrow hàahng-sāan 2 Hēunggóng yìhgā hóu yiht3 Kéuih gūngsī yáuh mahntàih It's hot in Hong Kong now His company has problems 4 A-John yíhgīng fāan-jó làih John is back (has returned) already 5 Léih yiu làuh háidouh a You need to stay here 6 Kéuihdeih būn-jó ūk They've moved house 7 Taaigwok léihdeih heui-gwo You've been to Thailand before 8 Gāmyaht haih gakèih lèihge Today is a holiday 9 Kéuih haih gáu vuht chēutsai ge She was born in September 10 Léih ūkkéi hóu yúhn ge Your home is a long way away

Exercise 23.2

Add an auxiliary to form a question using **wúih**, **yīnggōi**, **hóyíh**, **yiu/msái**, **sīk**:

1 Léihdeih yìhmàhn a?	Are you going to emigrate?
2 Tingyaht fāan-gūng a?	Do we need to go to work
	tomorrow?
3 Léih jā-chē a?	Do you know how to drive?
4 Ngóhdeih chìh dī jáu a	? Could we leave a bit later?
5 Léih <u> </u>	? Would you help us?
6 Leihpùih léih ūkkéi-yàhn a'	? Will you stay with your family?

124 Unit 23

7	Kéuih	_je chín gāau jōu a?	Does she need to borrow money
			to pay her rent?
8	Kéuihdeih _	jóu dī git-fān lē?	Maybe they should get married
			sooner?
9	Léih	hingjūk sāangyaht a?	Will you have a birthday
			celebration?
10	Ngóh	gam yéung jouh a?	Should I act this way?

Exercise 23.3

Answer the following questions, alternating positive and negative answers:

1 Léih ūkkéi yáuh-móuh dihnlóuh a? Do you have a computer at home? 2 Kéuih yáuh-móuh bóuhím a? Does he have insurance? 3 Nī go haih-mhaih lóuhbáan a? Is this the boss? 4 Haih-mhaih léih sé ge? Did you write this? 5 Léihdeih wúih-mh-wúih git-fan a? Will you get married? 6 Léih háau-jó síh meih a? Have you had your exams yet? 7 Léih heui-gwo Seuhnghói meih a? Have you been to Shanghai? 8 Kéuih fan-jó meih a? Has she gone to sleep yet? 9 Léih gaau yùhn syū meih a? Have you finished teaching? Has the car been in an accident? 10 Ga chē johng-gwo meih a?

UNIT TWENTY-FOUR

Wh-questions

Wh-questions involve the 'wh-words' *who, what, where,* and so on. Their Cantonese equivalents are mostly based on the interrogative forms **bīn, géi** and **dím**:

bīn	which?	géi	how?
dím (yéung)	how?	mātyéh	what?
bīngo	who?	géisìh	when?
dímgáai	why?	jouh mātyéh	why?
bīndouh	where?	géi dō	how many?

Syntax of questions

Instead of coming at the beginning of the question as in English, the Cantonese question words come wherever the corresponding word or phrase would come in a plain statement:

Statement	Question
<i>Ngóh</i> tàahn kàhm	<i>Bīngo</i> tàahn kàhm a?
I play the piano	Who plays the piano?
Ngóh gin dóu Peter	Léih gin dóu <i>bīngo</i> a?
(lit. I see Peter)	(lit. you see who)
I saw Peter	Who did you see?
Ngóh sihk <i>mihn</i>	Léih sihk <i>mātyéh</i> a?
(lit. I eat noodles)	(lit. you eat what)
I'm eating noodles	What are you eating?
Ngóh heui <i>Yīnggwok</i>	Léih heui <i>bīndouh</i> a?
(lit. I go England)	(lit. you go where)
I'm going to England	Where are you going?

Ngóh tīngyaht jáu (lit. I tomorrow leave) I'm leaving tomorrow Nīdouh yáuh yú sihk (lit. here have fish eat)

There are fish to eat here

Léih géisìh jáu a?

(lit. you when leave) When are you leaving? Bīndouh yáuh yú sihk a?

(lit. where have fish eat) Where are there fish to eat?

Similarly, 'how' and 'why' usually come between the subject of the sentence and the verb, like the corresponding phrase in a statement:

Ngóhdeih *daap bāsí* heui gēichèuhng

(lit. we take bus go airport) We go to the airport by bus

Ngóhdeih dím yéung heui gēichèuhng a?

(lit. we how go airport) How do we get to the airport?

Ngóh yānwaih kéuih gam sēungsām Léih dímgáai gam sēungsām a? (lit. I because (of) him so sad)

I'm so sad because of him

(lit. you how come so sad) Why are you so sad?

Kéuih *waih-jó ngóh mìh* yiu fahn gūng

(lit. he on account of me not take

He turned down the job for my sake

Kéuih dímgáai mh yiu fahn gūng a? (lit. he how come not take the

Why did he turn down the job?

Alternatively, dímgáai 'why' can also begin the question:

Dímgáai léih gam sēungsām a?

Why are you so sad? **Dímgáai kéuih mìh làih hōi mùhn gé?** Why doesn't he open the door?

Jouh mātyéh (lit. 'do what?') is an alternative expression for 'why' questions:

Kéuih jouh mātyéh gam lāu a?

(lit. she do what so angry) Why is she so angry?

Léih jouh mātyéh kéih háidouh a?

(lit. you do what stand here) What are you standing there for?

Jouh mātyéh usually asks the purpose behind someone's doing something, while **dímgáai** (lit. 'how to explain?') asks the reason for it.

Questions and politeness

Note that the sentence particle **a** is usually added at the end, as in other types of question (Unit 23). Without it, the question would sound abrupt and even impolite: for example, if you are asking why someone is doing something, which already represents something of an intrusion. A way to make such a question more polite is to add **Chéng mahn** 'May I ask' as well as **a**:

Chéng mahn yìhgā géi dím a? May I ask what time it is? Chéng mahn léih gwai sing a? May I ask what your surname is?

This formula is especially appropriate for asking questions of strangers.

Interrogative phrases

bīn 'which' combines with the classifier appropriate to the noun concerned (see Unit 8); the noun itself can either be included or be understood:

Léih jūngyi bīn fūk (wá) a? Which (p Ngóhdeih máaih bīn tìuh (yú) a? Which (f Léih go léui duhk bīn gāan (hohkhaauh) a? Which (s go to?

Which (picture) do you like? Which (fish) shall we buy? Which (school) does your daughter go to?

géi 'how (many)' combines with adverbs and adjectives to form question phrases such as **géi loih** 'how long' and **géi dō** 'how many/how much':

Léih làih-jó Hēunggóng géi loih a?

Léih tìuh fu géi chèuhng a?

Ngóh tùhng léih góng-gwo géi
dō chi a?

How long have you been in Hong
Kong?

How long are your trousers?
How many times have I told you?

How much does it cost to take the

Note also the phrases **géi dō seui** to ask a person's age and **géi dím (jūng)**

bus?

Léih go jái géi dō seui a? (*lit.* your son how many years) How old is your son?

to ask the time:

Ngóhdeih géi dím chēut mùhnháu a?

(*lit.* we what time go out door) What time do we leave?

Exercise 24.1

Form questions by substituting a question word for the phrase in bold italic type:

Example: Peter dá dihnwá làih $\rightarrow B\bar{\imath}ngo$ dá dihnwá làih a?

- 1a *Ngóh pàhngyáuh* hái heiyún dáng ngóhdeih *My friend* is waiting for us at the cinema
- b **Ngóh pàhngyáuh** *hái heiyún* dáng ngóhdeih My friend is waiting for us *at the cinema*
- 2a **Kéuihdeih tīngyaht heui** *Dōlèuhndō* They are going *to Toronto* tomorrow
- b **Kéuihdeih** *tīngyaht* heui **Dōlèuhndō** They are going to Toronto *tomorrow*
- 3a **Gām máahn yáuh yú sihk** There's *fish* for dinner tonight
- b *Gām máahn* yáuh yú sihk
 There's fish for dinner *tonight*
- 4a **Ngóh daap bāsí heui** *hohkhaauh* I go *to school* by bus
- b **Ngóh daap bāsí heui hohkhaauh** I go to school by bus
- 5a **Kéuih waih-jó** *dī jáiléui* **yìhmàhn** She emigrated for *the children's* sake
- b **Kéuih** *waih-jó dī jáiléui* **yìhmàhn** She emigrated *for the children's sake*
- 6a **Léih jyuh-jó (hái)** *Méihgwok* **sahp lìhn la**You have been living *in America* for ten years
- b **Léih jyuh-jó (hái) Méihgwok sahp lìhn la** You have been living in America for ten years

Exercise 24.2

Form questions to elicit information as follows:

- 1 Ask what your friend is eating (sihk)
- 2 Ask a friend when he will come back (fāan làih)

- 3 Ask what time the plane (fēigēi) departs (héifēi)
- 4 Ask where someone lives (**ivuh**)
- 5 Ask why there is nobody here (**móuh yàhn**)
- 6 Ask a child her age (seui)
- 7 Ask why your friend is late (chìh-dou)
- 8 Ask what time the library (tóuhsyū-gwún) closes (sāan mùhn)
- 9 Ask where you can buy a train ticket (**fóchē fēi**)
- 10 Ask why the door is closed (sāan-jó)

Exercise 24.3

Ask for directions in a polite way by starting with **Chéng mahn** 'May I ask':

- 1 How to get to Kowloon Tong MTR station (**Gáulùhngtóhng deihtit jaahm**)
- 2 How to get to the Chek Lap Kok Airport (Chek Lahp Gok Gēichèuhng)
- 3 Where is the restroom (sáisáugāan)/toilet (chisó)?
- 4 How to get to the top floor (déng láu)?
- 5 How to get to the post office (yàuh-gúk)?
- 6 Where are the restaurants (chāantēng) in this hotel (jáudim)?
- 7 Which bus goes to the Star Ferry (Tīnsīng Máhtàuh)?
- 8 Which ferry (syùhn) goes to the Discovery Bay (Yùhgíng-wāan)?
- 9 Where is the nearest supermarket? (jeui káhn ge chīukāp-síhchèuhng)?
- 10 Where is the minibus station (síubā jaahm)?

UNIT TWENTY-FIVE

Sentence particles

Sentence particles are one of the most challenging features of Cantonese for learners of the language. Without them, many Cantonese sentences sound incomplete, abrupt, or even impolite. Cantonese has a rich repertoire of particles which serve a variety of communicative functions in different speech contexts, and are probably best learnt from direct experience. Below we introduce some of the most basic and frequently used particles, bearing in mind that there are altogether some thirty particles in use.

Perhaps the most basic particle is **a**, because of its importance for politeness and in asking questions. It is the most common, and most neutral, of the sentence particles, serving to soften the force of a statement or question.

a is regularly used in questions, as we have seen in Units 23–24:

Léih heui-mh-heui kéuih ūkkéi a? Are you going to his house? **Kéuih haih-mhaih jyuh hái Sātìhn a?** Does she live in Shatin? **Ngóhdeih heui bīndouh sihk-faahn a?** Where shall we go to eat?

a can also be used in affirmative sentences, for example, to soften the force of a negative response (see Unit 24):

A: **Léih haih-mhaih msyūfuhk a?** Are you sick?

B: **Mhaih a** No

mē is used in a particular kind of question, expressing surprise or the unexpected:

Léih mh jī mē? Don't you know?

Ngóhdeih mh gau mē? Don't we have enough?

(**mē** should not be confused with the Mandarin question particle **ma**, which has no real counterpart in Cantonese.)

Another important particle is **ge**, which appears in assertions, especially together with **haih** (see Unit 7):

Kéuih jouh wuhsih ge She's a nurse

or: Kéuih haih jouh wuhsih ge

Ngóh séung bōng kéuih ge I want to help her

or: Ngóh haih séung bōng kéuih ge

jē serves to play down the extent or significance of something:

Géi baak mān jē It's just a few hundred dollars

Hóu yùhngyih jē It's really pretty easy

Ngóhdeih heui wáan háh jē We're just going to have some fun

la adds a sense of current relevance to the statement. It is comparable to Mandarin le, although rather less widely used. It occurs especially with the perfective aspect -jó and other particles expressing completion such as hóu and yùhn:

Kéuihdeih lèih-jó-fān hóu loih la They have been divorced for some

time

Kéuih bún jihjyún sé hóu la Ngóh tái yùhn go bougou laHer autobiography is written up I've finished (reading) the report

 $l\bar{a}$ and \bar{a} are used primarily in imperatives and requests (see Units 26–27):

Léih síusām dī lā Do be careful

Mgōi béi būi séui ngóh ā (Give me) a glass of water, please

Of the two, $l\bar{a}$ is rather more insistent while \bar{a} is more neutral.

Particle combinations

The expressive range of particles is greatly increased by combinations, **ge**, for example, can be followed by almost any particle:

Gó tou dihnsih-kehk jouh yùhn That soap opera has finished now

ge la

Kéuih góng-siu *ge jē* He's only joking

Léih yíhwàih ngóh sòh ge mē? Do you think I'm stupid?

In this way three or more particles can readily occur together:

Léih sīk louh ge la mē?

Do you (really) know the way?

Kéuih haih síuhohk-sāang lèihge je wo!

She's only a primary school student, you know!

Normally the particles have their usual contributions, so that rather than learning how to use, say, the combination **ge la**, the learner should concentrate on individual particles and the combinations will tend to look after themselves

Contractions: ge + a = ga

This contraction of two particles already introduced illustrates another way in which particles combine. Take a typical statement ending with **ge:**

Nī go bougou haih kéuih sé ge

(*lit.* this report is he wrote)
It was him who wrote this report

Kéuih haih sing Làhm ge

(*lit.* he is surnamed Lam) His surname is Lam

Putting these sentences into question form, which requires the particle **a**, we end up with **ga**:

Nī go bougou haih-mhaih kéuih sé ga? Was it him who wrote this report?

(not * Nī go bougou haih-mhaih kéuih sé ge a?)

Kéuih haih-mhaih sing Làhm ga?

Is his surname Lam?

(not * Kéuih haih-mhaih sing Làhm ge a?)

Similarly **lèihge**, itself a combinaton of **lèih** and **ge**, becomes **lèihga** in questions through fusion with **a**:

Nī go ngóh pàhngyáuh lèihge This is my friend **Haih-mhaih léih pàhngyáuh lèihga?** Is he your friend?

Exercise 25.1

Add an appropriate particle at the end of each sentence (choose from $j\bar{e}$, $l\bar{a}$, la, ge, ga, $l\dot{e}ihga$):

Dī mihn sihk dāk	The noodles are ready to eat
Dī mihn m̀h sihk dāk	The noodles cannot be eaten
	(are inedible)
Ngóh jihnghaih tái-háh	I'm just looking
Ngóh sailóu jouh wuihgaisī	My younger brother is an
	accountant
Làahmyán haih gám ge	Men are like that
	Please write it for me
Ngóhdeih yíhgīng fān-jó-sáu	We've already split up
Nī go haih tīnchòih yìhtùhng	This is a child prodigy, you see
Léih hōisām dī	(Try to) be happier!
Kéuih jāang ngóh hóu síu chín	He owes me very little money
	Ngóh jihnghaih tái-háh

Exercise 25.2

Add an appropriate particle to complete the following questions (choose from **a**, me, ga, lèihga):

1 Léih giu mātyéh méng?	What is your r	ıame?
2 Nī go mātyéh?	What is this?	
3 Dím wúih gam gwai?	How come it's	so expensive?
4 Gāmyaht haih Sīngkèih Yaht	? Is it really Sun	day today?
5 Léih yám- mh -yám yéh?	Will you have	a drink?
6 Géidím gin gaausauh?	What time do professor?	we see the
7 Léih mìh sīk jā-chē ge?	Don't you kno	w how to drive?
8 Haih-mhaih léih sé?	Was it you wh	no wrote it?

Exercise 25.3

Match the sentence with the translation based on the particle:

1 Kéuih séung bōng léih ge
2 Kéuih séung bōng léih mē
3 Kéuih séung bōng léih jē
4 Léih góng béi kéuih tēng lā
5 Léih wúih góng béi kéuih tēng mē

a He only wants to help you
c Does he really want to help you?
d Are you going to tell her?
e Would you really tell her?

134 Unit 25

- 6 Léih wúih-mh-wúih góng béi kéuih f Why don't you tell her? tēng a
- 7 Kéuihdeih git-jó-fān ge la mē 8 Kéuihdeih git-jó-fān ge la 9 Kéuihdeih git-jó-fān meih a

- g Are they married?h What, they're married?i They're already married

UNIT TWENTY-SIX

Imperatives

Imperatives are a type of sentence telling someone to act, as in commands and requests. While English drops the subject pronoun in imperatives, Cantonese typically retains it:

Léih bōng-sáu lā (*lit.* you help hand) Help me

Léih joi góng yāt chi ā (lit. you again say one time) Repeat (that) once more

Léihdeih gān ngóh làih lā (*lit.* you follow me come)
Come with me

Note that a particle such as $\mathbf{l}\bar{\mathbf{a}}$ or $\bar{\mathbf{a}}$ is needed to distinguish an imperative from a statement; of the two, $\mathbf{l}\bar{\mathbf{a}}$ is more insistent and $\bar{\mathbf{a}}$ more neutral. The pronoun $\mathbf{l}\hat{\mathbf{e}}\mathbf{i}\mathbf{h}$ can be dropped, especially in emergencies, but this is less usual than in English and tends to be less polite:

Dá dihnwá bougíng lā! Call the police!

Faai dī hōi mùhn lā! Hurry up and open the door!

Gau mehng a! Help!

To make a request more polite, **mgōi** 'please' can be added at the beginning or end of the sentence (see Unit 27):

Mgōi léih góng daaih sēng dī ā? Could you speak louder?
Léih làih jip ngóh ā, mgōi? Could you come and pick me up, please?

Note the use of **bong** (*lit*. 'help') meaning to do something for another's benefit, which is often used in imperatives:

Léih bōng ngóh sé lā

(lit. you help me write)

Write it for me, will you? (not: *Help me write it)

Mgōi léih bōng ngóh hōi dāng ā?

(*lit.* please you help me open light) Would you turn on the light for me?

Although **bong** on its own can mean 'help', in this construction it means that the addressee is expected to perform the action himself/herself.

Adjectives too can be used in imperatives, but call for the use of **dī** (*lit*. 'a little'):

Léih síusām dī lā! Be careful!

Mgōi léih síngmuhk dī lā! Please try to be smart! Léihdeih láahngjihng dī lā! Calm down a bit!

Compare the use of **dī** in comparatives (see Unit 12) and similarly with adverbial constructions (see Unit 10):

Léih hah chi jyú dāk hóu-sihk (*lit.* you next time cook good-to-eat

dī lā! more)

Can you cook a bit better next time?

Léih jāp dāk jeng dī lā! Try to dress better!

(colloquial)

Mgōi léih góng dāk maahn dī lā! Please speak a bit more slowly! Léih faai dī jāp yéh jáu! Hurry up and pack to leave!

Prohibitions: mhóu

Negative imperatives are marked by **mhóu** 'don't' (*lit.* 'no good') between the subject and the verb. Here the pronoun can be freely omitted:

Mhóu heui lā Don't go
(Léih) mhóu jáu jyuh Don't leave yet
(Léihdeih) mhóu aai-gāau lā Don't argue

Again the pattern is applicable to adjectives too, often with gam 'so':

Mhóu gam bēigwūn lā! Don't be so pessimistic!

(Léih) mhóu gam sēungsām lā! Don't be so sad! (Léihdeih) mhóu chòuh lā! Don't be (so) noisy!

Similarly with adverbial constructions:

(Léih) mhóu jā dāk gam faai lā! Don't drive so fast (Léih) mhóu tō gam loih lā! Don't delay too long

An alternative marker for negative imperatives is **máih**, usually used without the pronoun:

Máih chòuh lā! Don't be (so) noisy! (Léih) máih jáu jvuh! Don't go yet!

Máih chēut sēng lā! (lit. don't produce (a) sound)

Shut up!

As these examples suggest, commands with **máih** tend to be more abrupt or impatient than those with **mhóu**, and used when there is a close relationship between the speaker and addressee.

First person imperatives: let's . . .

A different kind of imperative is the first person plural ('let's . . .'). Here the pronoun **ngóhdeih** ('we') may be retained or dropped:

Ngóhdeih fāan heui sīn Let's go back Jáu lā! Let's go!

Yātchàih sihk lā Let's eat together

The adverb **bātyùh** 'rather' is often added here, before or after **ngóhdeih**:

Bātyùh ngóhdeih heui wáan lā! Why don't we go and have some fun!

Ngóhdeih bātyùh jóu dī jáu ā Let's leave early

Negative counterparts can be formed by adding **mhóu** before the verb, just as for second-person imperatives:

Ngóhdeih mhóu gam sām-gāp lā Let's not be so impatient Ngóhdeih bātyùh mhóu góng Let's not talk about him

kéuih lā

Exercise 26.1

Add a particle to the following statements to form imperatives:

1	Léih sé-seun béi ngóh	Write to me
_		~ .

2 Léih faai dī fāan ūkkéi Come home quickly

3 Maahn-máan hàahng Walk slowly

4 **Síusām gwo máhlouh** Cross the street carefully

5 **Jīkhāak béi chín** Pay immediately 6 **Yám dō dī séui** Prink more water

7 **Jóu dī fong gūng** Get off work as early as you can

8 Tàuh ngóh yāt piu Vote for me

9 **Dáng ngóh yāt jahn**Wait for me a while
10 **Lám chīngchó dī**Think more clearly

Exercise 26.2

Make negative counterparts of the imperatives given:

Example: **Léih sāan mùhn lā** Close the door, will you? → **Léih** mhóu sāan mùhn lā

1	Léih hōi chēung lā	Open the window, will you?
2	Léih góng lohk heui lā	Carry on speaking, will you?
3	Léih maaih-jó gāan ūk lā	Sell the house, will you?
4	Léih sihk yeuhk lā	Take the medicine, will you?
5	Léih gói tàihmuhk lā	Change the topic, will you?

6 **Léihdeih gaijuhk góng lā**7 **Ngóhdeih heui lā**Do carry on talking Let's go

8 Léihdeih faai dī kyutdihng lā Hurry up and decide

9 **Léih bātyùh jyun gūng lā** Why don't you change your job?

10 **Ngóhdeih bātyùh būn ūk lā** Let's move house

Exercise 26.3

Use **bong** to make requests out of the following statements:

Example: só mùhn lock the door (for me) → léih bōng ngóh só mùhn ā

1 **máaih sung**2 **gei seun**buy groceries (for me)
send the mail (for me)

3 yíng séung
4 gahm jūng
5 gāau hohkfai
6 jíng chē
7 jouh daahn-gōu
8 jyú-faahn
9 dehng gēipiu

take a picture (for us)
ring the bell (for him)
pay tuition (for them)
fix the car (for us)
make a cake (for her)
cook a meal (for us)
book an air ticket (for me)

10 wán gũng find a job (for him)

Exercise 26.4

Form imperatives with the adjectives provided:

Example: tell someone to be happy (hoisam): Léih hoisam dī la!

- 1 ask a friend to be more optimistic (lohk-gwūn)
- 2 tell a guest not to be so polite (haakhei)
- 3 encourage a student to be diligent (kàhnlihk)
- 4 tell a child not to be so greedy (tāam-sām)
- 5 ask someone to be more civilized (sīmàhn)
- 6 tell someone not to be so proud (gīu-ngouh)
- 7 ask someone to speak louder (daaih sēng)
- 8 ask your friend not to walk (hàahng) so fast (faai)
- 9 tell a friend not to dress (jeuk) so casually (chèuihbín)
- 10 ask your spouse not to be so stubborn (ngaahng-géng)

UNIT TWENTY-SEVEN

Requests and thanks

Polite requests

Requests typically use imperative sentences as introduced in Unit 26. To make a request in a polite way, $\mathbf{mg\bar{o}i}$ 'please' is used either at the beginning or at the end of the utterance. Note that the particle $\mathbf{\bar{a}}$ or $\mathbf{l\bar{a}}$ is necessary so that the request does not sound abrupt (see Units 25–26):

Mgōi béi būi yiht chàh ngóh ā? May I have a cup of hot tea, please? **Béi yāt go seunfūng ngóh ā, mgōi?** May I have an envelope, please?

Alternatively, **mgōi** léih is used with the pronoun léih present:

Mgōi léih béi fahn boují ngóh ā? May I have a newspaper, please? Hàahng faai dī lā, mgōi léih Walk faster, will you

Invitations which are a form of request are initiated by **chéng** which means 'invite':

Chéng yahp làih chóh ā Come in and have a seat, please Chéng chóh dāi maahn-máan góng ā Sit down and talk slowly, please

Compare also the polite formulation **Chéng mahn** 'May I ask' (Unit 24).

Thanks

Two different expressions mean 'thank you': **mgōi** and **dōjeh**. These cause some difficulty for the English speaker since the precise distinction between the two is not easily drawn, while **mgōi** also means 'please'. **mgōi** is used as a response to small favours such as opening the window, picking up a book from the floor, serving drinks or food:

A: **Ngóh bōng léih ló lā** Let me carry it for you (*lit.* help

you to carry it)

B: **Mgōi** Thanks

Note here a common source of misunderstanding: while **bong** literally means 'help', in a sequence of verbs like the above it generally means to do something *for* someone.

mgōi saai 'thank you very much' is stronger, with the particle saai 'all' added for emphatic effect:

A: **Yám dō dī tōng ā?**B: **Hóu ā, mgōi saai**Have more soup, please?
Sure, thanks very much

A: Ngóh bōng léih hōi mùhn lā Let me open the door for you

B: **Léih lèih dāk hóu hahp sìh**, You came at the right time. Thanks **mgōi saai** very much

dōjeh is used to thank people for gifts and unexpected favours. Examples include presents and invitations:

A: **Sung béi léih ge**This is for you (giving someone a

present)

B: **Dōjeh** Thank you

A: Gāmyaht ngóh chéng sihk- Lunch is on me today

faahn

B: **Dōjeh saai!** Thanks very much!

(alternatively B can insist on paying: Ngóh chéng lā! Let me pay!)

It also includes what might be considered metaphorical gifts, such as compliments and congratulations:

A: **Gūnghéi léih wo!** Congratulations! B: **Dōjeh!** Oh, thank you

Alternatively, the compliment can be played down in accordance with traditional Chinese modesty:

A: Léih gāmyaht jeuk dāk gam leng gé!

(lit. you today dress manner so beautiful)

You're looking great today!

B: Mhaih aak

Not really

Thanks of any kind can be replied to with msái (mgōi/dōjeh) or msái haakhei all of which mean 'no need' (see Unit 20):

A: Dōjeh léih béi ngóh ge jīchìh Thank you for your support

B: **Msái haakhei** Not at all

Apologies

deui-mjyuh 'sorry' is a general apology, appropriate for minor inconveniences such as accidentally running into somebody, but also for major offences.

Deui-mjyuh, ngóh tàuhsīn mh yīnggōi faat pèihhei ge

Sorry, I shouldn't have got angry just now

deui-mjyuh literally means 'cannot face' and can take an object representing the person wronged, which may come after **deui-mjyuh** or between **deui** 'face' and **mjyuh**:

Ngóh gokdāk hóu deui-mjyuh ūkkéi-yàhn

I feel I cannot face my family (after what I've done)

Ngóh jānhaih deui-mjyuh kéuih

I really feel bad about what I've done to him

(or Ngóh jānhaih deui kéuih mjyuh)

mhóuyisi (*lit.* '[I'm] embarrassed') is appropriate for matters such as misunderstandings and minor failures to meet expectations:

Mhóuyisi, seuihdouh sāk-chē, sóyíh ngóh chìh dou

I'm sorry, the tunnel was jammed, that's why I'm late

Mhóuyisi, ngóh làuh-jó fūng seun hái ūkkéi

Sorry, I left the letter at home

mgōi je-gwo is used to apologize for pushing through a crowd.

Exercise 27.1

Formulate the following requests using **mgōi**:

- 1 Give me a menu (jēung chāanpáai)
- 2 Speak slower (maahn dī)
- 3 Say it again (joi ... yāt chi)
- 4 Write faster (faai dī)
- 5 Don't turn on (hōi) the air conditioning (láahnghei)

- 6 Close (sāan màaih) the door (douh mùhn)
- 7 Ask the students to come
- 8 Call the police (gingchaat)
- 9 Don't waste money (sāai chín)
- 10 Give me the bill (dāan)

Exercise 27.2

Make the following requests more polite by inserting **chéng** 'invite' at the beginning of the sentence and adding an appropriate particle:

Làuh dāi háu seun	Leave a message (as on an answer-
	ing machine or voicemail)
Gaijuhk góng lohk heui	Continue talking again
Dáng ngóh yāt jahn	Wait for me a little while
Tūngjī ngóhdeih jeui sān sīusīk	Inform us of the latest news
Séuhng tòih líhng jéung	Go on the stage to get the award
Làuhsām tēng syū	Listen to the lecture attentively
Gān-jyuh ngōh hàahng	Follow me
Gwo làih nībihn chóh	Come and have a seat over here
Béi jēung gēipiu ngóh tái	Show me your (air) ticket
Sé dāi léih ge deihjí tùhng	Write down your address and
dihnwá houhmáh	telephone number
	Gaijuhk góng lohk heui Dáng ngóh yāt jahn Tūngjī ngóhdeih jeui sān sīusīk Séuhng tòih líhng jéung Làuhsām tēng syū Gān-jyuh ngōh hàahng Gwo làih nībihn chóh Béi jēung gēipiu ngóh tái Sé dāi léih ge deihjí tùhng

Exercise 27.3

Choose **mgōi** or **dōjeh** to thank someone for the following:

- 1 A friend opens the door for you
- 2 An acquaintance has treated you to dinner at a restaurant
- 3 A group of colleagues present you with a leaving present
- 4 A waiter hands you the menu
- 5 A colleague compliments you on your dress/suit
- 6 Someone calls you to the phone
- 7 Someone offers to give you a ride
- 8 When you're the seller having sold something to a client, customer
- 9 Someone you don't know has helped you with directions to your destination
- 10 Your boss congratulates you on your performance

Exercise 27.4

Express apologies as appropriate for the following situations:

- 1 You arrive very late for a formal business meeting
- 2 You inadvertently step on someone's toes
- 3 You forgot to return someone's call
- 4 You failed to do something very important as promised
- 5 You are pushing your way into the lift
- 6 You sincerely regret what you have done to someone
- 7 You're only a few minutes late. Your friends are waiting for you
- 8 You made a terrible mistake, causing your company to suffer a loss of profit
- 9 You have missed a deadline, causing some inconvenience
- 10 You have missed an important appointment

UNIT TWENTY-EIGHT

Numbers, dates and times

Lucky numbers

Our last unit, twenty-eight, falls appropriately enough on a lucky number: two (yih) sounds like 'easy' and eight (baat) rhymes with faat meaning 'make money, prosper' as in the Chinese New Year greeting Gūnghéi faat chòih, literally 'congratulations (and may you) prosper'. By contrast, four (sei) is an unlucky number as it rhymes with séi 'die' and is consequently subject to taboo: the Alfa Romeo 164 (yāt luhk sei) was perceived to be uncomfortably close to yāt louh séi ('one – road – die') so that it was renumbered for the Hong Kong market as the 168 (yāt luhk baat/yāt louh faat 'one – road – prosper').

Cardinal numbers

The number system is decimal and highly regular – so much so that it has been claimed to give the Chinese an advantage in mathematical tasks.

1 yāt	11 sahp-yāt	21 yih-sahp-yāt (yah/yeh-yāt)
2 yih	12 sahp-yih	22 yih-sahp-yih (yah/yeh-yih, etc.)
3 sāam	13 sahp-sāam	23 yih-sahp-sāam
4 sei	14 sahp-sei	24 yih-sahp-sei
5 n gh	15 sahp-ngh	25 yih-sahp-ngh
6 luhk	16 sahp-luhk	26 yih-sahp-luhk
7 chāt	17 sahp-chāt	27 yih-sahp-chāt
8 baat	18 sahp-baat	28 yih-sahp-bāat
9 gáu	19 sahp-gáu	29 yih-sahp-gáu
10 sahp	20 yih-sahp	30 sāam-sahp
100 yāt baal	k 1,000,000) yāt baak maahn
1,000 yāt ch	īn 10,000,00	00 yāt chīn maahn
10,000 yāt n	naahn 100,000,0	000 yāt yīk (as used in the Hong Kong
-	Stock Ex	

Note some abbreviations:

• In combinations, yih-sahp (20) may become yah- or yeh-:

Kéuih jauhlèih yah seui ge laShe's almost twenty (years old)Yah-sei síusìh yihtsinTwenty-four hour hotlineYeh-ngh mān, mgōiTwenty-five dollars, please

• In numbers from thirty onwards, the word **sahp** 'ten' is often reduced to **ah** as in **sà'ah-yāt** 'thirty-one', and so on.

Ngóh yáuh gáu'ah-baat go hohksāang

I have ninety-eight students

Kéuih sèhng sei'ah seui dōu mei git-fān

He's already forty but still not married

Numbers over a hundred precede the lower numbers as follows:

120 yāt baak yih-sahp (or simply: baak yih) 1,400 yāt chīn sei baahk (chīn sei) 15,000 yāt maahn nģh chīn (maahn nģh)

The difficulty comes above 10,000, **yāt maahn.** Above this figure Cantonese speakers count in terms of **maahn**, not **chīn** (1,000):

42,000 sei maahn yih chīn 360,000 sāamsahp-luhk maahn

Zero is **lìhng.** It is used in numbers with zero at the beginning or between digits:

0.8 **lìhng dím baat** (*lit.* nought point eight)
306 **sāam baak lìhng luhk** (*lit.* three hundred zero six)

Two: yih or léuhng?

There are two words meaning 'two':

• yih is used in counting and quoting numbers, days, etc.:

yih yuht yih houh the second of February the second time (*lit.* number two time) daih yih doih the second generation

 léuhng is used, together with the classifier, in referring to a number of items:

léuhng go yàhntwo peopleléuhng gihn sāamtwo shirts

In a few instances either **yih** or **léuhng** can be used, for example, when the numbers 200, 2,000 and 20,000 are used before a noun:

yih/léuhng baak mān two hundred dollars yih/léuhng chīn bohng two thousand pounds yih/léuhng maahn yàhn twenty thousand people

Ordinal Numbers

Ordinal numbers are formed, also in a highly regular way, by putting **daih** before the number:

daih yāt first

daih yih second (idiomatically also means 'another')

daih sāam saigaai the third world daih luhk lìhnggám the sixth sense

Dates

Dates are also based on a highly regular system:

- days of the week are numbered one to six from sīngkèih yāt (Monday) to sīngkèih luhk (Saturday) with the exception of sīngkèih yaht (Sunday);
- the months are numbered from **yāt yuht** (January) through to **sahpyih yuht** (December). Note the following pairs which are similar in form but very different in meaning:

sīngkèih yāt Monday vs. sīngkèih yaht Sunday sāam yuht March vs. sāam go yuht three months sahpyāt yuht November vs. sahpyāt go yuht eleven months

The order in dates is the reverse of the English, going from the general to the specific, beginning with the year and ending with the day, expressed by the number followed by **houh**. The formula is thus: **X lìhn Y yuht Z houh**:

e.g. September 3rd August 28 March 10, 1998 June 30, 2001 gáu yuht sāam houh baat yuht yihsahp-baat houh yāt gáu gáu baat lìhn sāam yuht sahp houh yih lìhng lìhng yāt lìhn luhk yuht sāamsahp houh

Times

The hours of day are expressed by **dím jūng** 'o'clock' or **dím** alone as follows:

X dím (jūng)	e.g.	baat dím (jūng)	eight o'clock
		sahp-yih dím (jūng)	twelve o'clock
X dím bun	e.g.	léuhng dím bun	half past two, 2.30
		sahp-yih dím bun	half past twelve, 12.30
X dím Y fān	e.g.	yāt dím sahp fān	1.10
		luhk dím seisahp- ⁿ gh fān	6.45

To indicate points between the hours, Cantonese speakers colloquially use **jih** (5-minute intervals, or divisions of the clock face):

3.05	sāam dím yāt go jih	(or simply: sāam dím yāt)
3.10	sāam dím léuhng go jih	(or: sāam dím yih)
3.15	sāam dím sāam go jih	(or: sāam dím sāam)

For units less than ten minutes, **lihng** 'zero' is usually inserted between **dím** and **fān** in the formula **X dím lìhng Y fān**:

7.04	chāt dím lìhng sei fān
9.08	gáu dím lìhng baat fān

Seconds are expressed by **míuh** in the form **dím Y fān Z míuh**:

1.03.09	yāt dím sāam fān gáu míuh
8.12.16	baat dím sahp-yih fān sahp-luhk míuh

To specify a.m. or p.m., the word for morning, and so on, precedes the time:

seuhngjau	morning	seuhngjau sahp dím bun	10.30 a.m.
hahjau	afternoon	hahjau sei dím jūng	4.00 p.m.
yehmáahn	evening	yehmáahn gáu dím	9.00 p.m.

Notice how the general term precedes the particular, as we saw in the case of dates above. This also applies to addresses, which thus follow the opposite order to English:

Hēunggóng Mōsīngléhng Douh nghsahp-luhk houh sāam láu B joh Flat B, Third floor, 56 Mt Davis Road, Hong Kong

Gáulùhng Jīmsājéui Gānàhfān Douh sahpbaat houh deihhá Ground floor, 18 Carnarvon Road, Tsimshatsui, Kowloon

Exercise 28.1

Read the following numbers in Cantonese:

1	34	6	1,200
2	79	7	12,000
3	106	8	24,302
4	234	9	43,545
5	818	10	315,000

Exercise 28.2

Read the following dates in Cantonese:

1	January 1	6	July 4, 1963
2	December 12	7	June 30, 1997
3	May 21	8	December 31, 1999
4	August 9	9	February 29, 2000
5	Friday 13	10	September 15, 2008

Exercise 28.3

Match the following times:

1	2.25	a	saphyāt dím sahp
2	1.10	b	sāam dím sāam
3	4.30	c	gáu dīm bun
4	5.40	d	chāt dím yihsahp-luhk fān
5	12.45	e	baat dím yāt
6	8.05	f	yāt dím yih
7	3.15	g	^{ngh} dím baat

150 Unit 28

8	11.50	h	léuhng dím ngh
9	7.26	I	sei dím bun
10	9.30	j	sahpyih dím gáu

Exercise 28.4

Practise giving the following information:

- 1 today's date (gāmyaht ge yahtkèih)
- 2 your birthday (sāangyaht)
- 3 your date of birth (chēut sāng yahtkèih)
 4 your telephone number at home (ūkkéi dihnwá) and at work (gūngsī dihnwá)
- 5 your address (deihjí)

Exercise 28.5

Choose an auspicious registration number for your car and explain why it is a good choice for you.

KEY TO EXERCISES

Unit 1 Consonants

Exercise 1.2 Aspiration: the second of each pair begins with an aspirated consonant

Exercise 1.3 1 Jēung 2 Jiuh 3 Gwāan 4 Dīng 5 Sám 6 Jūng 7 Daaih Ou 8 Laih Jī Gok 9 Jēung Gwān Ou 10 Sāaugēiwāan 11 Daaih Gok Jéui 12 Sām Séui Bóu

Unit 2 Vowels and diphthongs

Exercise 2.1 gān should sound like English 'gun', fān like 'fun', etc., while gāan, fāan, etc., should rhyme with 'barn' without the 'r' being sounded

Unit 3 Tone

Exercise 3.4 1 hauhmún 2 yàuhtíu 3 bunyé 4 sīuyé 5 Dākmán 6 tīnpáang 7 sāam jek díp 8 Oumún 9 yahp-yáu 10 fāyún

Unit 4 Pronouns

Exercise 4.1 1 Ngóh jyuh hái Gáulùhng 2 Hóu hōisām gin dóu léih 3 Ngóhdeih sīk kéuihdeih 4 Léih haih go hóu yīsāng 5 Léihdeih haih hohksāang 6 Kéuih hóu jūngyi yām-ngohk 7 Ngóh dá-jó-dihnwá béi lóuhbáan 8 Kéuihdeih heui-gwo Oumún 9 Kéuih geidāk ngóh 10 Kéuihdeih hóu gwa-jyuh ngóhdeih

Exercise 4.2 1 kéuih 2 kéuih 3 kéuihdeih 4 kéuih 5 kéuihdeih 6 kéuihdeih 7 kéuih 8 kéuihdeih 9 ngóhdeih 10 léihdeih

Exercise 4.3 1 Jūngyi a/mh jūngyi a/Mhaih géi jūngyi a (Ngóh 'I' is redundant) 2 (Kàhmyaht) hóu yiht a/lohk yúh a 3 Ngóh hóyíh 4 Tóuh-ngoh a/mh tóuh-ngoh a 5 Jáu-jó la/meih (jáu) a 6 Béi ngóh 7 Maaih-jó la/meih (maaih) a 8 Leng a/mh leng ge 9 Jíng hóu la/meih (jíng hóu) a 10 Yáuh a/móuh a

Unit 5 Possession: ge

Exercise 5.1 1 léih go beih 2 kéuih ge/dī pàhngyáuh 3 kéuih deui ngáahn 4 kéuih jēung tói 5 ngóh ge/dī seun 6 kéuih go sáudói 7 ngóh jek geuk 8 Hēunggóng ge tīnhei 9 gāmyaht ge/dī sānmán 10 tīngyaht ge heiwān

Exercise 5.2 1 Léih deui hàaih hóu leng wo 2 Léih gihn lāu géi dō chín a? 3 Hēunggóng go gēichèuhng hóu daaih ga 4 Ngóh ga páauchē waaih-jó 5 Ngóh dī chānchīk làih taam ngóh 6 Ngóh taaitáai dáng-gán ngóh 7 Ngóh go jái jūngyi cheung-gō 8 Ngóh dī jáiléui duhk-gán Jūng hohk

Exercise 5.3 1 Nī jek sáubīu (haih) ngóh ge 2 Go gongkàhm (haih) kéuih ge 3 Gó gāan ūk (haih) kéuihdeih ge 4 Nī dī syū (haih) léih (deih) ge 5 Gó di wá (haih) Chàhn Síujé ge 6 Nī go wái (haih) ngáhdeih ge 7 Nī go baahn-gūng-sāt (haih) Làhm Sīnsāang ge 8 Dī chín (haih) ngóh taaitáai ge

Unit 6 Possession and existence: yáuh

Exercise 6.1 1 Ngóh móuh yigin 2 Léih yáuh-móuh beimaht a? 3 Gāmyaht móuh sīusīk 4 Faatgwok yáuh-móuh Jūnggwokyàhn a? 5 Chēutbihn yáuh yàhn 6 Kéuih móuh behng 7 Léih yáuh-móuh láihmaht a? 8 Bún syū móuh Jūngmàhnjih 9 Sātìhn yáuh-móuh fóchējaahm a? 10 Kàhmyaht yáuh taaiyèuhng

Exercise 6.2 1 Yáuh a/Móuh a 2 Yáuh a (ngóh yáuh géi go)/Móuh a (yāt go dōu móuh) 3 Yáuh a/Móuh a 4 Yáuh a/Móuh a/Juhng meih yáuh a 5 Yáuh gé, daahnhaih mh gau/Móuh māt a 6 Yáuh a (heuigwo)/Móuh a (meih heui-gwo) 7 Yáuh a/móuh a 8 Yáuh a (hóu yáuh hingcheui)/Móuh a (móuh māt hingcheui)

Exercise 6.3 1 Léih yáuh-móuh chē a? 2 Léih yáuh-móuh hīngdaih iímuih a? 3 Léih váuh-móuh sáutàih dihnwá a? 4 Léih váuh-móuh heui gwo Bākgīng a? 5 Kéuih yáuh-móuh taam-gwo léih a? 6 Nīdouh móuh jeukjái 7 Hēunggóng yáuh hóu dō síubā 8 Yahpbihn váuh móuh vàhn a? 9 Fosāt (vahpbihn) váuh móuh hohksāang a? 10 Gāmvaht váuh móuh hóu sīusīk a?

Unit 7 Being: haih

Exercise 7.1 1 mhaih a 2 haih a 3 mhaih a 4 haih a 5 mhaih a 6 mhaih a 7 haih a 8 haih a 9 haih a 10 mhaih a 11 haih a 12 haih a

Exercise 7.2 1 haih 2 haih 3 hái 4 hái 5 haih 6 haih 7 hái 8 haih 9 hái 10 haih

Exercise 7.3 1 Haih lóuhbáan góng béi ngóh tēng ge 2 Haih ngóh béi bún svū léih ge 3 Kéuih haih gām jīu jáu ge 4 Gihn sāam haih géisih máaih ge 5 Go chēung haih bīngo hōi ge? 6 Ngóh haih hái nīdouh dáng léih ge 7 Haih kéuih taaitáai wán dóu ge 8 Kéuih haih hái Taaigwok johng chē ge

Unit 8 Noun Classifiers

Exercise 8.1 1 gān (catty) 2 dā (dozen) 3 fūng 4 bohng (pound) 5 dvuhn (portion, segment) 6 būi (glass)/jī (bottle) 7 deui (pair) 8 tou (set)

Exercise 8.2 1 Mgōi léuhng būi hùhng jáu 2 Mgōi yāt dihp cháau mihn 3 Mgōi sāam wún faahn 4 Mgōi (béi) dō deui faaijí 5 Mgōi béi jēun sēui 6 Mgōi béi vāt jēung/go chāanpáai ngóh 7 Mgōi léuhng go jáu-būi 8 Mgōi yāt wùh yiht séui 9 Mgōi yāt gihn daahn-gōu 10 Mgōi vāt būi gafē

Exercise 8.3 (A) 1b 2d 3e 4c 5a (B) 1b 2d 3e 4a 5c

Exercise 8.4 1c 2a 3e 4b 5d

Unit 9 Adjectives

Exercise 9.1 1 Kéuih hóu leng pretty/hó-oi lovely/lēk smart 2 Kéuihdeih hóu yáih naughty/gwāai nice, obedient/chūngmìhng clever 3 Kéuih hóu lēk smart/yáuh hohkmahn learned/yáuh-méng famous 4 Kéuih hóu làhnggon capable/kàhnlihk diligent/yáuh láihmaauh polite 5 Ngóh hóu kàhnlihk diligent/yáuh seunsām confident 6 Kéuih hóu lengjái handsome/lengléui pretty/gōu tall 7 Ga chē hóu yáuh-yìhng stylish/taai gwai too expensive 8 hóu làahn-sihk pretty bad/géi hóu-sihk quite good 9 Tīnhei hóu sāp humid/taai yiht too hot 10 Bún síusyut hóu chèuhng long/géi hóu-tái quite good (to read)

Exercise 9.2 1 hóu sai small/daai big/syūfuhk comfortable ge haaktēng 2 hóu pèhng cheap/gwai expensive/dái-sihk good value/ge chāantēng 3 hóu yāumahk humorous/hóu muhn boring ge syū 4 hóu dākyi cute/hó-oi lovely ge gáujái/māaujái 5 hóu muhn boring/chèuhng long/gámyàhn moving ge hei 6 hóu làahn/sām difficult/yáuh-yuhng useful ge gūngfo 7 hóu yìhmjuhng serious ge mahntàih 8 hóu yāumahk humorous/fuhjaakyahm responsible ge lóuhsī

Exercise 9.3 1 Ngóhdeih géi (gau saai) múhnyi 2 Kéuih gam (taai, gau saai) lēk 3 Kéuihdeih taai (gam, gau saai) guih 4 Dī sailouhjái gam (géi, gau saai) dākyi 5 Tou hei gam (taai, gau saai) lohngmaahn 6 Dī tàuhfaat taai (gam, gau saai) dyún 7 Dī gāsī gam (géi, gau saai) péhng 8 Go gaausauh gam (gau saai) yáuh-mēng 9 Go hohksāang taai (gam, gau saai) láahn 10 Dī séung gam (géi, gau saai) leng

Exercise 9.4 1 Nī dihp sung laaht-láat-déi 2 Dī tōng syūn-syūn-déi 3 Léih dī sāam sāp-sāp-déi 4 Tīnhei dung-dúng-déi 5 Kéuih faai mihn yùhn-yún-déi 6 Kéuih deui ngáahn hùhng-húng-déi 7 Kéuih go baahn-gūng-sāt lyuhn-lyún-déi 8 Lāp láu sūng-sūng-déi 9 Léih fu ngáahn-géng mùhng-múng-déi 10 Léih lóuhgūng jeui-jéui-déi

Unit 10 Adverbs of manner

Exercise 10.1 1 Kéuihdeih màahn-máan hàahng fāan ūkkéi 2 Kéuih hóu hīngfáhn gám gaaisiuh jihgéi 3 Kéuih hóu daaih-dáam gám mahn-jó yāt go mahntàih 4 Kéuih hóu síusám gám só-jó douh mùhn 5 Ngóh go jái hóu faai gám waak-jó géi fūk wá 6 Kéuih hóu lóuhlik gám hohk-gán Gwóngdūng-wá 7 Dī hohksāang hóu làuhsām gám tēng-gán yín-góng 8 Dī Hēunggóng hohksāang hóu hīngsūng gám yèhng-jó béichoi 9 Yi-ngoih hóu dahtyìhn gám faatsāng-jó 10 Ngóh jūngyi hōihōi-sām-sām gám hingjūk sāangyaht

Exercise 10.2 1 Léih sé dāk hóu hóu 2 Ga fēigēi fēi dāk hóu dāi 3 Ngóhdeih fan dāk hóu svūfuhk 4 Kéuihdeih wáan dāk hóu hōisām 5 Kéuih tiu dāk hóu yúhn 6 Kéuih yíng-séung yíng dāk hóu leng 7 Ngóh vàuh-séui vàuh dāk hóu maahn 8 Kéuih cheung-gō cheung dāk hóu sai-sēng 9 Ngóh jvú-faahn jvú dāk hóu faai 10 Ngóh tiu-móuh tiu dāk hóu chā

Exercise 10.3 1 hóu síusām gám (carefully) 2 hóu váuh-loihsing gám (patiently) 3 hóu syūfuk gám (comfortably) 4 jihng-jíng gám (quietly)/hóu lau gám (angrily) 5 hóu chingchó gám (clearly) 6 hóu faai gám (quickly) 7 hóu daaih sēng gám (loudly) 8 hóu làuhsām gám (attentively) 9 hóu hōisām gám (happily) 10 hóu sēungsām gám (sadly)

Unit 11 Adverbs of time

Exercise 11.1 (Note that the adverb can appear in more than one position.) 1 (Kàhmyaht) ngóh (kàhmyaht) hái Jīmsājéui 2 Kéuih ngāam-ngāam dou-jó gēichèuhng/(Tàuhsīn) kéuih (tàuhsīn) dou-jó gēichèuhng 3 (Yíhchìhn) Ngóh (víhchìhn) gin-gwo kéuih (Seuhngchi) kéuihdeih (seuhngchi) jung-jó tàuh-jéung 5 (Gójahnsìh) ngóhdeih (gójahnsìh) juhng sai 6 (Búnlòih) ngóh (búnlòih) jouh wuhsih ge 7 (Hah chi) ngóhdeih (hah chi) wán léih 8 Kéuih iīkhāak hóu lāu 9 (Daih vih sìh/daih sìh) ngóh (daih vih sìh/daih sìh) chéng léih sihkfaahn 10 (Yíhchìhn) ngóhdeih (víhchìhn) hái Méihgwok jyuh-gwo

Exercise 11.2 1 Ngóh yāt go láihbaai dá yāt chi móhngkàuh (once a week) 2 Ngóh yaht-yaht heui yàuh-séui (everyday) 3 Ngóh máahnmáahn tái dihnsih (every night) 4 Ngóh jīu-jīu tái boují (every morning) 5 Ngóh yāt go láihbaai sái sāam chi tàuh (three times a week) 6 Ngóh yāt go yuht jín yāt chi tàuhfaat (once a month) 7 Ngóh yāt go láihbaai máaih yāt chi sung (once every week) 8 Ngóh yāt lìhn heui géi chi vāmngohk-wúi (a few times a year) 9 Ngóh vāt go vuht sihk yāt chi syutgōu (once a month) 10 Ngóh yāt go láihbaai taam yāt chi **chānchīk** (once a week)

Exercise 11.3 1 (Ngóh yaht-yaht) dá bun go jūngtàuh gēi 2 lihn yāt go jūngtàuh Gwóngdūng-wá 3 góng sāamsahp fānjūng dihnwá 4 jyú go bun jūngtàuh faahn 5 tēng sèhng máahn yām-ngohk 6 tái sèhng yaht syū 7 kīng yāt jahn gái 8 séuhng géi go jūngtàuh móhng 9 chūng sahp fānjūng lèuhng 10 sé vāt go jūngtàuh vahtgei

Exercise 11.4 1 géi go jūngtàuh (a few hours) 2 sèhng máahn (a whole evening) 3 yāt go hah-jau (one afternoon) 4 sèhng yaht (a whole day) 5 yāt go láihbaai (one week) 6 géi yaht (a few days) 7 sèhng jīu (a whole morning) 8 géi máahn (a few evenings) 9 sèhng go yuht (a whole month) 10 géi lìhn (a few years)

Unit 12 Comparison

Exercise 12.1 1 Dī: Gāmyaht lyúhn di 2 Dī: Kéuih yìhgā hōisām dī 3 Gwo: Ngóh go pàhngyáuh daaih gwo ngóh 4 Gwo: Kéuih gōu gwo yíhchìhn hóu dō 5 Dī: Gām chi maahn dī 6 Gwo: Nī gāan chāantēng/jáulàuh pèhng gwo gó gāan 7 Gwo: Ngóh jūngyi tiu-móuh dō gwo cheung-gō 8 Dī: Léih ge lámfaat hóu dī

Exercise 12.2 1 Gāmyaht dung (cold) gwo kàhmyaht 2 Léuihjái gwāai (well-behaved) gwo làahmjái 3 Sēutsāam gwai (expensive) gwo léhngtāai 4 Dōlèuhndō (juhng) dung (cold) gwo Lèuhndēun 5 Jūngmán làahn (difficult) gwo Yīngmán 6 Yàuh-séui syūfuhk (comfortable) gwo páauh-bouh 7 Gwóngdūng choi chēutméng (famous) gwo Chìuhjāu choi 8 Jouh sāangyi sānfú (hard) gwo gaau-syū

Exercise 12.3 1 Gām-lín dung gwo gauh-lín hóu dō 2 Gāmyaht lyúhn hóu dō 3 Léih dī tàuhfaat yìhgā dyún síu-síu 4 Hēunggóng gwai gwo nīdouh géi púih 5 Ngóh juhng guih gwo kéuih 6 Sihk faahn juhng pèhng gwo sihk mihn 7 Gām chi hohkfai béi seuhng chi gwai yāt baak mān 8 Kéuih gōu (gwo) ngóh sāam chyun

Exercise 12.4 A 1 Hói-yú gwai gwo yéuhng-yú 2 Hēungpín hēung gwo hùhng chàh 3 Làahnfā leng gwo gūkfā 4 Go léui daaih (gwo) go jái léuhng seui 5 Nī bāan hohksāang kàhnlihk gwo go bāan B 1 Gauh hàaih béi sān hàaih syūfuhk 2 Yìhgā heui Oujāu béi yíhchìhn yùhngyih(-jó) 3 Gūngsī gām-lín béi gauh-lín jaahn dāk dō(-jó) 4 Nī bún síusyut béi daih yāt bún hóu-tái 5 Léih gām chi béi seuhng chi jouh dāk hóu(-jó)

Unit 13 Prepositions

Exercise 13.1 1 Hohksāang hái fóng yahpbihn/douh 2 Jek māau hái tói seuhngbihn 3 Go jámtàuh hái chòhng seuhngbihn/douh 4 Jī bāt hái háp yahpbihn 5 Bún syū hái dang hahbihn 6 Go jūng hái chèuhng seuhngbihn 7 Bá jē hái mùhn hauhbihn 8 Dī séung hái séungbóu yahpbihn/douh 9 Pō syuh hái gāan ūk chìhnbihn 10 Dihnsihgēi hái syūgwaih jākbīn

Exercise 13.2 1 chèuhng hauhbihn 2 syūgwaih seuhngbihn 3 ngàhnhòhng deuimihn 4 máhlouh jūnggāan 5 gūngyún tùhng vàuh jaahm jīgāan 6 (chóh) hái léih jākbīn 7 háp yahpbihn/léuihmihn 8 bāanfóng chēutbihn 9 geng chìhnmihn 10 tói hahmihn 11 heung nī go fōngheung/ heung nībihn 12 vàuh jīu dou máahn

Exercise 13.3 1 Tói seuhngmihn váuh vāt daahp svū (a pile of books) 2 Chèuhng seuhngmihn yáuh fūk wà (a picture) 3 Chyùhfóng yahpbihn móuh vàhn (nobody) 4 Haak-tēng léuihmihn váuh géi go haakvàhn (several guests) 5 Yīgwaih yahpbihn yáuh hóu dō leng sāam (lots of nice clothes) 6 Chòhng hahmihn váuh jek māau (a cat) 7 Dang hahbihn váuh jī bāt (a pen/pencil) 8 Svūgwaih seuhngmihn váuh go gūngjái (a doll) 9 Sáisáu-gāan vahpbihn váuh tìuh mòuhgān (a towel) 10 **Syūfóng vahpbihn váuh bouh dihnlóuh** (a computer)

Exercise 13.4 1 yàuh nīdouh heui yīyún 2 yàuh tòuh-syū-gwún heui faahn-tohng 3 vàuh deih-há heui baat láu 4 heung Gáulùhng 5 gīng Tòihbāk heui Dünggīng 6 yàuh Hēunggóng gīng Maahn-gūk heui Lèuhndēun 7 vàuh syūfóng heui chyùhfóng 8 vàuh daih vāt chi dou vìngā 9 vàuh gēichèuhng heui ūkkéi 10 vàuh tàuh dou méih

Unit 14 Negation

Exercise 14.1 1 Kéuih ūkkéi móuh mahntàih 2 Ngóhdeih mhaih hóu guih 3 Ngóh móuh sīng-jīk 4 Kéuih gihn sāam mhaih hóu gwai 5 Ngóh tàuhsīn móuh sihk yeuhk 6 Yīsāng móuh heui douh-ga 7 Lóuhbáan mhaih hóu lāu 8 Dī hohksāang móuh séuhng-móhng 9 Dī hohksāang mhaih hóu kàhnlihk 10 Gó tou hei mhaih taai chèuhng

Exercise 14.2 1 Sihk hóisīn hóu gwai (ga) 2 Wòhng Sāang chéng kéuih (a) 3 Ngóh (váuh) duhk-gwo Faatmán (a) 4 Kéuihdeih git-jófan (la) 5 Ngóh bou-jó-méng (la) or Ngóh yáuh bou-méng (a) 6 Dī háausíh tàihmuhk hóu làahn (a) 7 Gāan fóng géi/hóu gōnjehng (a) 8 Kéuih vìhgā dākhàahn (a) 9 Gāmvaht váuh tòhng 10 Ngóhdeih sihkgwo sèh-gāng (a)

Exercise 14.3 1 msānsīn not fresh, stale 2 msíusām careless 3 mhóuchói unfortunate 4 mgōuhing discontented 5 mgihnhōng unhealthy 6 mjūngyi dislike 7 m-mìhngbaahk fail to understand 8 mtùhngvi disagree 9 m-vānséung not appreciate 10 mlàuhsām inattentive

Exercise 14.4 A 1 Kéuih mhaih móuh seunsām 2 Kéuih góng ge yén mhaih móuh douhléih 3 Léih gājē mhaih mh wúih bōng léih 4 Ngóhdeih mhaih mh gau chín 5 Léih gāmyaht mhaih mdākhàahn B 1 Ngóhdeih mhaih mtùhngyi 2 Ngóhdeih mh hóyíh mh jáu 3 Gūngsī mhaih mh háng gā yàhn-gūng 4 Ngóh mh wúih mgeidāk 5 Léih mhaih máaih mh héi

Unit 15 Verbs of motion

Exercise 15.1 1 séuhng làih ngóh ūkkéi 2 fāan heui hohkhaauh 3 séuhng heui làuhseuhng 4 gwo làih Yīnggwok 5 lohk heui séjihlàuh 6 gwo làih tái-háh 7 fāan làih taam ngóhdeih 8 yahp heui hōi-wúi 9 lohk làih sihk-faahn 10 chēut heui jouh-yéh

Exercise 15.2 1 Ngóh tīngyaht heui hohkhaauh (to school) 2 Léih làih nīdouh (here) sihk-faahn 3 Ngóh gwo heui góbihn (there) wán yàhn 4 Léih dākhàahn séuhng làih ngóh ūkkéi (my place) chóh 5 Ngóhdeih yiu fēi fāan heui Oujāu (to Australia) 6 Go léuihjái jáu chēut heui chēutbihn (outside) 7 Ngóh dī chānchīk fāan làih Hēunggóng (to Hongkong) douh-ga 8 Léih hóyīh lohk heui gwóng-chèuhng (to the shopping centre) máaih yéh 9 Ngóh jīkhāak yahp heui sái-sáu-gāan (bathroom) wuhn sāam 10 Ngóh tùhngsih gwo làih ngóh gāan fóng (to my room) kīng-gái

Exercise 15.3 1 gwo heui 2 yahp làih 3 lohk làih 4 séuhng heui 5 chēut heui 6 fāan làih 7 lohk làih/heui 8 séuhng heui 9 yahp heui/làih 10 fāan heui/làih

Exercise 15.4 1 Ga fochē fāan-jó làih 2 Dī seun gei-jó heui Méihgwok 3 Dī gúpiu sīng-jó séuhng heui gōu wái 4 Kéuih hái fóng hàahng-gán chēut làih 5 Kéuihdeih pàh-gán séuhng làih sāandéng 6 Bún syū dit-jó lohk (heui) deihhá 7 Go kàhm būn-jó gwo heui deuimihn 8 Ga chē hōi-gán yahp làih tìhng-chē-chèuhng 9 Kéuih hàahng-gān chēut heui gāai douh 10 Kéuihdeih būn-gán lohk heui yih láu

Unit 16 Verbs of giving

Exercise 16.1 1 Béi chín ngóh taaitáai (my wife) 2 Wàahn syū béi tùhnghohk (a classmate) 3 Sung láihmaht béi léuih-pàhngyáuh (one's girlfriend) 4 Gei seun béi Léih haauhjéung (Principal Li) 5 Dá-dihnwá béi gíngchaat (the police) 6 Gāau gūngfo béi sīnsāang (teacher) 7 Làuh sung béi ngóh (me) sihk 8 Máaih sāam béi go léui (daughter)

jeuk 9 Gáan tou hei béi léih (you) tái 10 Dím gō béi ngóh pàhngyáuh (my friend) teng

Exercise 16.2 1 Kéuih sung-jó dī hēungséui béi ngóh 2 Yīsāng béijó dī yeuhk ngóh (sihk) 3 Ngóh wúih wàahn (fāan) dī màhn-gín béi léih/Ngóh wúih béi fāan dī màhn-gín léih 4 Lóuhbáan gyūn-jó hóu dō chín béi gaauwúi 5 Kéuih gei-jó fūng seun béi kéuih ūkkéi-yàhn 6 Ngóh je-ió jī vùhnbāt béi kéuih 7 Mgój béi-mín kéuih 8 Léih viu wàahn (fāan) tìuh sósìh béi ngóh/Léih viu béi fāan tìuh sósìh ngóh 9 Kéuih séung je ngóh léuhng bún syū/Kéuih séung tùhng ngóh je léuhng bún svū 10 Go góngsī béi-jó dī gūngfo ngóhdeih jouh

Exercise 16.3 1 Ngóhdeih juhng viu béi chín kéuih (to him) 2 Ngóh gājē je-jó ngóh hóu dō sāam/je-jó hóu dō sāam béi ngóh (to me) 3 Gó go vàhn sèhngvaht tāu gūngsī (the company) véh 4 Yáuh vàhn chéungjó kéuih lóuhbáan (his boss) hóu dō chín 5 Ngóh heui je go tùhnghohk (a classmate) géi bún syū 6 Kéuih séung mahn sīnsāang (the teacher) géi yeuhng yéh 7 Ngóh go pàhngyáuh gaau sailouhjái (children) Yīngmán ge 8 Jingfú wúih faht gūngsī (the company) chín ge

Unit 17 Verbs and Particles

Exercise 17.1 1 dóu 2 dāi 3 fāan 4 gwo 5 dóu 6 vùhn 7 cho 8 **hōi** 9 **dóu** 10 **dou**

Exercise 17.2 1 Kéuih sèhngyaht tēng gújái 2 Ngóh tēng dóu yìuhyìhn 3 Kéuih yíhgīng lám dóu go daahp-on 4 Ngóh gin dóu go gwónggou 5 Léih gámgok dóu ngaatlihk 6 Ngóh màhn dóu vīnmeih 7 Kéuih jūngyi tái síusyut 8 Kéuih mh jūngyi tái hei

Exercise 17.3 1 Ngóh sāu mh dóu kéuih fūng seun 2 Ngóh máaih mh dóu hei fēi 3 Ngóh tái mh dóu/gin mh dóu go páai 4 Ngóh màhn mh dóu dī sung 5 Ngóh tēng mh dóu fēigēi sēng 6 Ngóh lám mh dóu dím daap 7 Ngóh gei mh dóu gam dō méng 8 Ngóh sihk mh dóu gam dō syutgōu 9 Ngóh wán mh dóu fūng seun 10 Ngóh pàhngyáuh heui mh dóu Sātìhn

Exercise 17.4 1 béi dāk dóu 2 gáau dāk dihm 3 tái dāk dóu 4 jouh dāk sèhng 5 seun dāk gwo 6 máaih dāk héi 7 jouh dāk chit 8 tēng dāk mìhng

Unit 18 Actions and events

Exercise 18.1 1 gin-gwo 2 sái-jó 3 sihk-jó 4 tēng-gwo 5 heui-gwo 6 bou-jó-méng 7 yèhng-jó 8 háau-gwo 9 máaih-gwo 10 maaih-jó

Exercise 18.2 1 lám-gwo 2 fan-jó 3 si-gwo 4 yeuk-jó 5 sānchíng-jó 6 johng-gwo 7 chēutbáan-jó 8 cheung-gwo 9 tái-jó 10 fāan-jó

Exercise 18.3 1 Dī hohksāang meih jáu 2 Ngóh go jái meih heui-gwo Yīnggwok 3 Kéuih meih ló chēpàaih 4 Ngóhdeih meih jouh-gwo jingfú gūng 5 Ngóh móuh dehng fóng 6 Go beisyū móuh fong ga 7 Ngóh meih yám-gwo Chīngdóu bējáu 8 Ngóh móuh tùhng kéuih paak-gwo-tō 9 Dihnfai móuh gā ga 10 Lóuhbáan móuh laauh-gwo kéuih

Exercise 18.4 1f Kéuih chùhnglòih meih si-gwo chìh dou 2d Ngóhdeih yíhchìhn heui-gwo léih ūkkéi 3a/b Ngóh sīnsāang yíhgīng/ngāam-ngāam fāan-jó séjihlàuh 4b/e Kéuih ngāam-ngāam/jeuigahn sāang-jó go jái 5c/d/e Ngóh chàhnggīng/yíhchìhn/jeuigahn háauleuih-gwo chìhjīk 6a/b Gāan jáulàuh yíhgīng/ngāam-ngāam sāan-jó mùhn

Unit 19 Activities: gán and jyuh

Exercise 19.1 1 Ngóh yìhgā wuhn-gán sāam 2 Kéuihdeih kàhm-máahn háidouh dá màhjéuk 3 Kéuih góng-gán dihnwá 4 Yìhgā lohk-gán yúh 5 Dī sailouhjái háidouh wáan séui 6 Ngóhdeih hàahng-gán làih 7 Kéuih yìhgā chūng-gán-lèuhng 8 Ngóh go jái háidouh waahk-wá 9 Lóuhbáan hōi-gán-wúi 10 Kéuih juhng lāu-gán ngóhdeih

Exercise 19.2 1 Ngóh jā-jyuh tìuh sósìh 2 Kéuih máaih-gán sung 3 Ngóhdeih hóu gwa-jyuh léih 4 Léih jyú-gán mātyéh a? 5 Kéuih yām-gán gafē 6 Dímgáai léih mohng-jyuh ngóh a? 7 Dī sailoujái chūng-gán-lèuhng 8 Hóu dō yàhn wán-gán gūng 9 Ngóh yìhgā daap-gán mahntàih 10 Kéuih sèhngyaht jeuk-jyuh dī gauh sāam

Exercise 19.3 1 Kéuih jeuk-jyuh sāam yàuh-séui He swims with his clothes on 2 Kéuih līng-jyuh dī hàhngléih jáu He left carrying the baggage 3 Kéuih tái-jyuh dihnsih jouh gūngfo She does her homework while watching television 4 Dímgáai léih mh mohng-jyuh ngóh góng? Why don't you look at me while talking? 5 Ngóh jūngyi tēng-jyuh yāmngohk yāusīk I like to relax while listening to music 6 Kéuih sèhngyaht chī-jyuh léih go léuih heui gāai He always goes around with your daughter 7 Go māmìh póuh-jyuh go jái chēut gāai The mother goes out carrying her son

8 Dímgáai léih daai-jyuh ngáahn-géng fan-gaau a? Why do you sleep with your glasses on? 9 Ngóh lóuhgūng jā-jyuh ga sān chēlàih jip ngóh My husband is driving his new car to meet me 10 Ngóh mh wúih jó-ivuh léih faat daaht I won't get in the way of your making money

Unit 20 Auxiliary verbs

Exercise 20.1 1 Ngóh viu fāan ūkkéi 2 Kéuih sīk jā-chē 3 Ngóh wúih douh-hip 4 Ngóh pàhngyáuh wúih daai léih heui 5 Léih hóyíh daap fóchē heui 6 Ngóhdeih yīnggōi jéunsìh dou 7 Léih hóyíh jóu jáu 8 Ngóh wúih wàahn svū 9 Kéuih sīk daap mahntàih 10 Kéuih yīnggōi git-fān 11 Kéuih háng gáam ga 12 Ngóhdeih háng tóhhip 13 Kéuihdeih mh háng dáng loih dī 14 Ngóh taaitáai msái hōi-wúi 15 Ngóhdeih msái dāamsām

Exercise 20.2 1 Ngóh mìh sīk kéuih 2 Ngóh mìh sīk heui gódouh 3.Ngóh msái fan-gaau 4 Kéuih mh yiu faahn 5 Kéuih mh wúih fāan ūkkéi 6 Léih mìh hóyíh làuh dāi 7 Léih mìh hóyíh wuhn sāam 8 Ngóhdeih mh vīnggōi yāusīk 9 Kéuih mh vīnggōi máaih láu 10 Kéuih mìh sīk tàahn kàhm

Exercise 20.3 1 Ngóh séung yeuk kéuih (chēut gāai) 2 Ngóh wúih tũngjī léih (ge la) 3 Deuimjyuh, gām chi ngóh mìh hóyíh bōng léih/ngóh bōng mìh dóu léih 4 Ngóh msái sihk yéh 5 Léih yīnggōi síusām dī jāchē 6 Léih hóyíh chìh dī gāau gūngfo 7 Léideih mìh yīnggōi gam chōlóuh 8 Ngóh mìh háng béi gam dō chín 9 Ngóh mìh sīk heui vàuhgúk 10 Ngóh pàhngyáuh mh wúih tùhngyi

Exercise 20.4 1 Ngóh gām-lín waahkjé wúih git-fān 2 Ngóh gām-lín hángdihng wúih git-fān 3 Kéuihdeih yātdihng hái ūkkéi 4 Kéuihdeih hólàhng hái ūkkéi 5 Ngóh yātdihng wúih sahpyih dím jīchìhn fāan dou ūkkéi 6 Ngóh yātdihng yiu sahpyih dím jīchìhn fāan dou ūkkéi 7 Fūng seun vātdihng yiu tīngyaht dou ge 8 Fūng seun yātdihng haih kàhmyaht dou ge 9 Go leuhtsī vātdihng viu hóu lēk 10 Go leuhtsī vātdihng hóu lēk

GLOSSARY OF GRAMMATICAL TERMS

adjective a class of words used to describe nouns.

adverb a class of words used to describe verbs or to modify sentences. **antonym** a word having the opposite meaning to another, e.g. *unclear* as opposed to *clear*.

aspect a grammatical distinction involving whether an event is seen as complete (as in the Cantonese perfective form -jó) or ongoing, as in the English progressive form -ing and Cantonese -gán.

auxiliary a class of words used together with a verb and carrying a grammatical function, e.g. **wúih** (will).

classifier a class of words used to 'classify' nouns by shared features such as shape or function, e.g. tìuh for elongated objects as in tìuh yú (fish). demonstrative words indicating proximity (this) or distance (that). digraph a combination of letters representing a single sound, e.g. ng, eu. diphthong a combination of two vowel sounds, e.g. au as in sau (thin). experiential a form of the verb denoting experience, or something which has happened at least once (expressed by gwo in Cantonese).

hanging topic an instance of topicalization in which the topic is not subject or object of the verb, but bears a loose relation to the subject or object.

localizer a class of words used after a noun to specify location, e.g. **yahp-bihn** (inside).

measure similar to classifier; more precisely, those classifiers which denote a measured quantity, e.g. **yāt dā gāidáan** 'a dozen eggs'.

minimal pair a pair of words or sentences differing in only one feature.

modal having to do with possibility and necessity, as opposed to fact.

modality the field of meaning involving possibility and necessity.

negation forms used to deny the truth of a statement.

particle a word which does not belong to any of the major word classes but plays a grammatical or communicative role. Verb particles, such as dóu indicating completion of an action, appear after the verb, while sentence particles, like a added to questions for politeness, come at the end of the sentence.

passive a type of sentence which shows action being done to the subject. **perfective** a form of the verb denoting an event viewed as complete (expressed by the suffix **-jó** in Cantonese).

predicate the part of the sentence which says something about the subject, typically a verb or adjective.

preposition a word which precedes a noun (more precisely a noun phrase), indicating a spatial or other relationship to it.

pronoun a word which substitutes for a noun (more precisely a noun phrase, i.e. the noun and any modifiers which go with it).

topicalization the process by which some constituent is placed first in the sentence, so that the sentence appears to be 'about' that constituent, e.g. **ga chē ngóh juhng meih maaih** (The car I haven't sold yet).

transitive verb a verb that can or must take a noun as its object, e.g. hit.
